ED WEATHERBY

**2007 MARKS THE 50TH
ANNIVERSARY OF THE
WEATHERBY HUNTING
AND CONSERVATION AWARD,**

presented annually by the Weatherby Foundation International (formerly the Roy E. Weatherby Foundation). We are extremely proud of the continuing educational efforts of the Foundation to promote the benefits of ethical sport hunting among the non-hunting public.

**THE HISTORY
OF WEATHERBY**

began in the mid-1940s when a young cartridge “wildcatter” named Roy Weatherby set out to change the world of firearm performance. Contrary to then-popular thinking (heavy bullets pushed at slow speeds), Roy believed that lightweight bullets traveling at super high speeds provided the best combination for one-shot kills. Based

upon that philosophy, he spent the next decade developing the high-powered Weatherby® Magnum cartridges for which the company is known today (.224, .240, .257, .270, 7mm, .300, .30-378, .340, .338-378, .375, .378, .416 and .460). Throughout that period, Roy began producing rifles designed specifically to accommodate his hyper velocity ammunition. At that time, he was producing his rifles on FN Mauser

and French Brexev Magnum Mauser actions. However in 1957, Roy would again catch the attention of the shooting and hunting world with a proprietary action that is today recognized around the world as the Mark V®

ROY WEATHERBY congratulates his son, Ed Weatherby on taking his first lion on safari in Mozambique, 1970.

SEND US YOUR FAVORITE photo with your Weatherby®! If you have a photo of yourself, or a member of your family with a Weatherby rifle or shotgun, we'd love to see it. Send a photo print (or high resolution digital file) and a few words about your hunt, and we may use it in a future Weatherby catalog or on the Weatherby web site. Sorry, photos cannot be returned.

MIKE BREYMAN - CALIFORNIA

WEATHERBY®

MANY OF THE WORLD'S BIGGEST CELEBRITIES recognized the superior performance and unique styling of Weatherby rifles and shotguns. As the legend grew, so too did its presence among many of these high profile, public figures.

Of particular note is the growing success of their Outdoor Exposition series, to date reaching nearly 1 million people with 78 events in 19 states. Nearly 40% of our country's geography has benefited from the good—and vitally important—work of the Foundation. For more information on Weatherby Foundation International, visit www.weatherby-foundation.org

And speaking of “foundations,” we are also pleased to introduce our new Mark XXII® rifle. For many of us, the .22 was our introduction into the shooting sports—taking instruction from Dad or Grandpa, plinking with friends, or honing your shooting eye on targets at the range or on small game. Our new Mark XXII (pages 4-5) is a testament to that heritage, as well as a shining example of Weatherby style and performance. And, it comes with a factory-shot target as your assurance of guaranteed accuracy. As you might expect, we're very excited about the new Mark XXII and we hope you will be, too. You can learn more about it and all our products at www.weatherby.com

We hope you enjoy your time with our 2007 catalog. And from everyone here at Weatherby, thank you for your continued support. God Bless and good shooting.

The foundation for the Mark V was the need for a stronger, safer action, able to withstand tremendous pressure, and the possibility of blown primers and ruptured case heads (due to the unpredictability of early handloaded and wildcat cartridges). After nearly a half century of proven performance, the Mark V continues to be known as “the world's strongest bolt action.”

In 1970, Roy once again showed his entrepreneurial spirit when he introduced the Weatherby Vanguard® action, borrowing many of the characteristics and design elements of the Mark V, but based on a dual-opposed lug Mauser-style action. Over the years, the Vanguard has steadily gained in popularity for its superior performance, guaranteed accuracy and exceptional value.

The Weatherby lineage continued in 1986 when Roy's son, Ed Weatherby, assumed the leadership mantle of the company. Under Ed's guidance, the company has seen growth and expansion both in Mark V and Vanguard rifle offerings, as well as a full line of Over/Under, Side-by-Side and Semi-Automatic shotguns, and shooting and hunting accessories.

The innovation and pacesetter performance associated with the Weatherby name spans more than 60 years. Yet, while our place in history is firmly established, it is the prospects for the future that shine brightest of all.

ROY WEATHERBY was famous for demonstrating the power of his magnum cartridges in dramatic fashion. Here he examines the results of shooting a tree with a .300 Weatherby Magnum.

Weatherby
FOUNDATION INTERNATIONAL
HUNTING PRESENTATION & WILDLIFE CONSERVATION

Formerly known as the Roy E. Weatherby Foundation, the mission of the non-profit, tax-exempt Foundation is to educate the non-hunting public on the beneficial role of ethical sport hunting and its contributions to wildlife conservation. Active in its mission, the Foundation currently leads a national initiative to foster the development of educational outdoor expositions, sponsoring 78 events to date in 19 states, with combined attendance figures of nearly 1 million people. The Foundation also annually sponsors the Weatherby Hunting and Conservation Award (2007 marks the 50th presentation of the Award). For more information, write P.O. Box 1027, Turlock, CA 95381-1027; (209) 634-4400; FAX (209) 634-5454; www.weatherby-foundation.org

JIMMIE C. ROSENBRUCH - 2006

“Wow! I haven’t had this much fun shooting a .22 since I was a kid. The Mark XXII is the real deal.”

BRAD PASKEY {MINNESOTA}

MARK XXII®

OUR NEW MARK XXII was developed with the discriminating shooter in mind, combining celebrated design, superior performance and unmatched fit and finish. Akin to our legendary Mark V® Deluxe, the Mark XXII is as much fun to shoot as it is to look at—offering guaranteed accuracy with a factory-shot target in every box. Our signature raised comb Monte Carlo wood stock is perfectly matched with a smooth, non-binding bolt action. Exceptional wood-to-metal fit, near custom embellishments and attention to detail. On small game, or at the range, the Mark XXII makes its mark with distinction in every way.

MARK XXII
(MSRP \$899*.22 LR/MSRP \$949*.17 HMR)

MARK XXII®	
.22 LR	DXT22LR30
.17 HMR	DXT17HMR30

LEGENDARY STOCK DESIGN — A true Weatherby, the Mark XXII® features our legendary raised comb Monte Carlo stock design with raised cheekpiece, maplewood spacers and rosewood forend and grip cap. Beauty and function come together as the stock design naturally allows for faster eye-to-scope alignment and target acquisition, enhancing shooter comfort and accuracy. Features rubber rifle pad to promote firm shoulder contact with the rifle.

UNIQUE BOLT DESIGN features special cam cocking mechanism with target type bolt handle. Precision CNC machining assures smooth, non-binding action, cycle after cycle. Bolt is easily removed and breaks down into three pieces for ease of cleaning and oiling.

GUARANTEED ACCURACY — Each Mark XXII rifle comes with a factory-shot target in every box—your assurance of guaranteed accuracy and superior performance at the range or in the field.

SCOPE MOUNTING OPTIONS — Offers both a dovetail mounting option with 11mm dovetail receiver rail, as well as drilled and tapped for ring and base scope mounts. Dovetail system fits popular mounts from Bushnell, Leupold, Redfield, Simmons, Talley, Warne and Weaver.

RECESSED BOLT FACE — Specially designed, recessed bolt face surrounds the cartridge head for complete support. Cartridge guide and claw extractor assures positive cartridge feeding and extraction.

FULLY ADJUSTABLE SINGLE STAGE TRIGGER allows for precise adjustment of sear engagement and let-off weight from 2 to 4.4 pounds (factory set at 2.5 pounds). You get a clean, crisp trigger that will break precisely—a key component of superior accuracy. (Sear engagement adjustments must be performed by a Weatherby Service Center or a qualified gunsmith.)

QUICK RELEASE MAGAZINE — The Mark XXII comes standard with a 5-shot (.22 LR) or 4-shot (.17 HMR) magazine that is precision fit. Releases at the push of a button.

ACCESSORY MAGAZINES — Additional 5-shot (.22 LR), 10-shot (.22 LR) and 4-shot (.17 HMR) accessory magazines for the Mark XXII are also available.

TARGET GRADE BARREL — To achieve superior accuracy, the Mark XXII features an 8-groove, target grade, button-rifled barrel with target crown. Built to exacting Olympic competition specifications.

STRATEGICALLY PLACED BEDDING POINT — Stock forearm features predetermined bedding point to help maintain consistent, repeatable accuracy.

PRECISION-CUT CHECKERING — The select walnut stock features a high gloss finish with precision-cut, fineline diamond point checkering at 18 LPI. Provides a custom look and a sure grip in all conditions.

EXCEPTIONAL FIT AND FINISH — Hand selected walnut is similar to that used in our popular Vanguard® Deluxe. In typical Weatherby fashion, the Mark XXII offers superior wood-to-metal fit and exceptional craftsmanship throughout.

ENGRAVED TRIGGERGUARD — Machined steel alloy triggerguard and floorplate features the famous Weatherby Flying “W” in gold. Superior fit, finish and Weatherby craftsmanship.

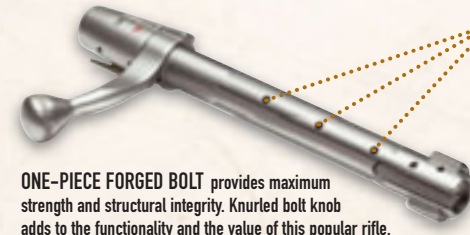

“...guaranteed to shoot a 1 1/2" or better 3-shot group at 100 yards from a cold barrel.”

{WEATHERBY VANGUARD ACCURACY GUARANTEE}

INTRODUCED IN 1970, the Vanguard® action first served as an economical alternative to the Mark V®. Over the years however, the Vanguard has continued to gain in popularity among all hunters who simply can no longer ignore the exceptional combination of value, wide range of features and guaranteed accuracy. Based on a Mauser-style dual-opposed lug design, the Vanguard offers many of the same design elements and superior materials as the Mark V. The result is a highly accurate and dependable rifle that delivers year after year. With models starting at just a few hundred dollars, Vanguard is perhaps the finest rifle value on the market today. And, it is the only production rifle that comes with a factory-shot target as your assurance of guaranteed accuracy.

A KEY FEATURE OF THE VANGUARD® is its massive M16-style claw extractor (left), ensuring reliable and positive extraction. Extracts and ejects the fired case without the necessity of full bolt retraction.

ONE-PIECE FORGED BOLT provides maximum strength and structural integrity. Knurled bolt knob adds to the functionality and the value of this popular rifle.

FLUTED BOLT BODY – Features three gas ports to allow high pressure gases to escape laterally in the event of an accidental case rupture. Longitudinal flutes reduce weight and bearing surface area, while minimizing binding for smooth action.

Features	THE VANGUARD COMPETITIVE ADVANTAGE				
	Weatherby Vanguard Synthetic	Browning Composite Stalker	Remington SPS	Savage 11 F	Tikka T3 Lite
Accuracy Guarantee	Yes – 1 1/2"	No	No	No	Yes – 1"

1-Piece Forged Bolt	Yes	No	No	No	No
Enclosed Bolt Sleeve	Yes	Yes	No	Yes	Yes
Fluted Bolt	Yes	Yes	No	No	No
Bolt Knob	Knurled	Smooth	Checkered	Smooth	Smooth

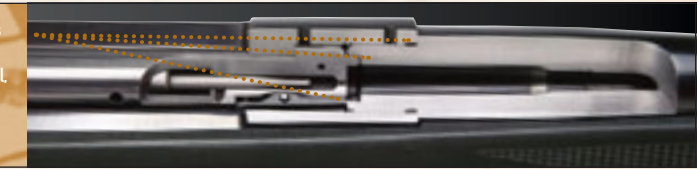

Specification information is from current competitor-published catalogs and Web sites.

VANGUARD®

FULLY ENCLOSED BOLT SLEEVE – (left) completely enshrouds the rear of the action to redirect high pressure gases and brass particles in the event of a case rupture. Also features an easy-to-see cocking indicator for an extra measure of safety in the field.

3 RINGS OF STEEL – The cartridge case head is encased in three rings of steel for greater safety. The recessed bolt face is surrounded by the barrel, which is surrounded by the forged and machined steel receiver, creating an extra measure of strength and structural integrity.

GROOVED TRIGGER – Weatherby Vanguard rifles feature a special grooved trigger surface for improved “feel” and control.

FULLY ADJUSTABLE TRIGGER – Precise adjustments for sear engagement (factory set at .008 to .014) and let-off weight (factory set at approximately 4 pounds). With a Weatherby, you get a clean, crisp trigger that will break precisely. This is a key component in delivering improved accuracy and can help make a better shot of any shooter. (Sear engagement adjustments must be performed by a Weatherby Service Center or a qualified gunsmith.)

INTEGRAL RECOIL LUG – One-piece forged and machined receiver features an integral recoil lug for the utmost in strength and structural integrity.

HINGED FLOORPLATE – Vanguard’s one-piece bottom metal and hinged floorplate are constructed from a combination of steel and lightweight alloy. Provides easy access to unfired cartridges in the magazine.

COLD HAMMER forged 24" barrel produces a guaranteed 1 1/2" or better 3-shot group at 100 yards when used with premium (non-Weatherby calibers) or Weatherby factory ammunition. The longer 24" barrel helps maximize velocity.

THE WEATHERBY® VANGUARD stock is an injection-molded composite that delivers superior accuracy and durability. The Monte Carlo design with raised comb is cast off to allow for quicker eye-to-scope alignment and faster target acquisition, and to reduce felt recoil. The forearm is dual tapered (back and upward) to deliver better grip and control under recoil, and is flat-bottomed to provide a steady, stable rest. Unlike most composite stocks that utilize a hard rifle pad, the Vanguard pad features a lower density material that greatly increases recoil absorption.

“Thanks for making my first Wyoming pronghorn hunt a success. One shot with my Weatherby® at 265 yards and it was time to call the taxidermist.”

BRUCE DIXON {CALIFORNIA}

ALL WEATHERBY® VANGUARD® RIFLES are guaranteed to shoot a 1 1/2" or better 3-shot group at 100 yards from a cold barrel when used with premium (non-Weatherby calibers) or Weatherby factory ammunition. Each rifle comes with a factory-shot target as your assurance of guaranteed accuracy.

VANGUARD® SYNTHETIC

This is perhaps the best rifle value on the market today. The Vanguard Synthetic will outperform rifles costing hundreds more and is guaranteed accurate. All metalwork is matte black, with a 24" barreled action bed to a Monte Carlo, injection-molded composite stock. An adjustable trigger lets you custom tune the rifle to your personal taste (within factory pre-set limits). Comes with a factory-shot target to assure guaranteed accuracy. See page 30 for complete specifications.

VANGUARD® STAINLESS

At 7 1/2 lbs, the Vanguard Stainless is the ideal choice for rugged durability and all-weather performance. Stainless steel is bead blasted to a matte finish to eliminate game-spooking glare while fighting off the effects of rain and snow. Bed to a Monte Carlo, injection-molded composite stock. Comes with factory-shot target and accuracy guarantee. For complete specifications, see page 30.

VANGUARD® VARMINT SPECIAL

Our Varmint Special will catch the eye of the most serious varmint hunting enthusiast. Features an injection-molded Monte Carlo synthetic stock with tan pebble grain finish and distinctive black spiderwebbing. A 22" #3 contour barrel (.740 muzzle dia.) is bead blasted to a matte finish and features a recessed target crown for consistent accuracy and protection of the rifling. Guaranteed accurate (1 1/2" or better 3-shot group) and comes with a factory-shot target in every box. For specifications, see page 31.

"The .257 Weatherby® Magnum dropped him in his tracks at 337 yards. I am very confident taking a shot like this with my Weatherby®."

KEVIN FENIMORE {PENNSYLVANIA}

THE VANGUARD SYNTHETIC PACKAGE with rifle, scope, mounts, sling and case is factory bore-sighted and "ready to go" to the range right out of the box. Also includes a factory-shot target as your assurance of guaranteed accuracy—1 1/2" or better 3-shot group when used with premium (non-Weatherby calibers or Weatherby factory ammunition).

VANGUARD® YOUTH/COMPACT
Here is the ideal rifle that literally grows with the youth or female shooter. It features a lighter Vanguard short action (20" #1 contour barrel) bed to a scaled-down hardwood stock with a shorter 12 1/2" length of pull (finished in non-reflective black). The rifle also comes with a full-size injection molded composite stock (\$139 retail value) that allows the rifle to grow with the shooter. Performance, value and the ideal way to bring a new hunter into the Weatherby family. See page 30.

VANGUARD® SYNTHETIC PACKAGE
Add a deer tag to our Vanguard Synthetic Package and you have everything a serious hunter needs to get started. The Package begins with our popular Vanguard Synthetic rifle—proven performance from the get-go and guaranteed accurate with a factory-shot target included with each rifle. Then, we add a Bushnell® Banner 3-9x40mm riflescope with phase-coated optics and 1/4-minute click adjustments. You get rugged dependability and a bright, clear view in all light conditions. Anchoring

the scope to the rifle is a set of Leupold® Rifleman rings and bases, world-renowned for their rock-solid durability. Each rifle/scope package is then individually mounted and bore-sighted at the Weatherby Custom Shop. And to top off this exceptional value, you get an Uncle Mikes® nylon sling and a Plano® PRO-MAX™ injection-molded gun case. The Vanguard Synthetic Package—more value, more performance and more reasons than ever to choose a Weatherby®. For complete specifications, see page 30.

TORBJORN LINDSKOG {SWEDEN}

TRADITIONAL WOOD

VANGUARD® DELUXE
What do you get when you combine a raised comb, Monte Carlo walnut stock with maplewood spacers and rosewood forend and grip cap, high gloss blued metalwork and guaranteed accuracy with a factory-shot target in every box? The answer is the Vanguard Deluxe. Sharing many of the same features of the Mark V® Deluxe, the Vanguard Deluxe offers exceptional wood quality and outstanding performance in a remarkably affordable package. For specifications, see page 30.

VANGUARD® SPORTER
The performance and value of the popular Vanguard is also available for wood stock enthusiasts. Features a handsome walnut stock with satin urethane finish, fineline diamond point checkering and a contrasting rosewood forend tip. All metalwork is matte blued to a low lustre finish. Comes with a factory-shot target that is your assurance of guaranteed accuracy (1 1/2" or better 3-shot group at 100 yards from a cold barrel). For complete specifications, see page 30.

VANGUARD® SPORTER SS
For a strikingly different and distinctive combination of metal and wood, we proudly offer the Vanguard Sporter SS. It features a walnut stock with satin urethane finish, fineline diamond point checkering and a contrasting rosewood forend tip, set against the stainless steel barrel and receiver. All metalwork is bead blasted to a matte finish. Comes with a factory-shot target in every box. See page 30 for complete specifications.

VANGUARDS feature a knurled bolt knob for a sure grip in all conditions. Trigger is adjustable for let-off weight to match individual preferences (within factory pre-set minimums). Sear engagement adjustments must be performed by a Weatherby Service Center or qualified gunsmith.

“I know the importance of anchoring a mountain goat dead in his tracks. My Weatherby® dropped this magnificent billy where he stood.”

TYLER JOHNERSON - GUIDE {MONTANA}

SUB-MOA/VARMINT

EACH SUB-MOA RIFLE IS TEST FIRED, hand selected, and shipped with a factory-shot target and written guarantee to shoot a 3-shot group of .99" or less at 100 yards, when used with specified Weatherby factory or premium ammunition.

WHAT IS SUB-MOA?

In ballistics terms, a Minute of Angle (MOA) is the arc formed by an angle of one minute (1/60th of a degree) at any range. At 100 yards, MOA is 1.047". Selected Weatherby® rifles are guaranteed to shoot a 3-shot group of .99" or less at 100 yards (SUB-MOA) when used with specified Weatherby factory or premium grade ammunition. Each SUB-MOA rifle is test fired, hand selected and comes with a factory-shot target. Put simply, a Weatherby SUB-MOA is the most accurate production rifle you can buy, guaranteed.

VANGUARD® SUB-MOA

The Vanguard SUB-MOA ups the ante on value and accurate performance. Guaranteed to shoot a 3-shot group of .99" or less at 100 yards when used with specified Weatherby factory or premium grade ammunition. It features a pillar-bedded Fiberguard™ composite stock with legendary Monte Carlo, raised cheekpiece and non-slip black spiderwebbing. Adjustable trigger and Pachmayr® Decelerator® pad. See page 31 for complete specifications.

VANGUARD® SUB-MOA STAINLESS

Accuracy, form and function come together in this performance-packed rifle. You get a pillar-bedded Fiberguard stock with our legendary Monte Carlo design with raised cheekpiece. Grey spiderwebbing accents the stock for a distinctive look. The stainless steel barreled action is bead blasted to a matte finish and provides all-weather protection for all metalwork. Fully adjustable trigger and a Pachmayr Decelerator pad. See page 31 for complete specifications.

VANGUARD® SUB-MOA VARMINT

Long shots at small targets are just what the new SUB-MOA Varmint was built for. Guaranteed to shoot a 3-shot group of .99" or less when used with premium ammunition. The hand-laminated, tan Monte Carlo composite stock features black spiderwebbing and a CNC-machined aluminum bedding plate for a solid, stable platform for the barreled action. A 22" #3 contour barrel with recessed target crown enhances accuracy in a portable package. For complete specifications, see page 31.

VANGUARD® SUB-MOA VARMINT

204 Ruger**	VSR204RG20
223 Rem.	VSR223RR20
22-250 Rem.	VSR222RR20
308 Winchester	VSR308RR20

IN NEAR-CUSTOM fashion the Vanguard SUB-MOA includes a Pachmayr® Decelerator® recoil pad. Compare to other production rifles that offer far less in embellishments.

**New for 2007.
*Price may vary by model and dealer.

VANGUARD SUB-MOA MATTE
{MSRP \$956*/MSRP \$884* .270 WSM and .300 WSM}

VANGUARD SUB-MOA STAINLESS
{MSRP \$994*/MSRP \$1027* .270 WSM and .300 WSM}

VANGUARD SUB-MOA VARMINT
{MSRP \$929*/MSRP \$979* .204 RUGER}

THE VANGUARD SUB-MOA VARMINT (above) features a hand-laminated, composite stock with CNC-machined aluminum bedding plate and specially-designed beavertail forearm for a strong, stable platform. Three strategically placed vents dissipate heat to help maintain repeatable accuracy. Also includes double swivel studs on the forearm for use with a bipod and a sling. As with all SUB-MOA rifles, we test fire, hand select and ship with a factory-shot target to guarantee a 3-shot group of .99" or less when used with premium ammunition.

“For tack-driving accuracy and performance,
I’ll put my Vanguard Custom up against
any other rifle out there.”

LARRY KNIGHT {UTAH}

GIVE YOUR VANGUARD® a custom touch with stock and metal upgrades and a host of other personalized embellishments available from the Weatherby Custom Shop. Start your Vanguard Custom by choosing a pillar-bedded Fiberguard™, composite Accuguard™ (with CNC-machined aluminum bedding plate) or upgraded wood stock. Then, add performance-based options such as longitudinal barrel flutes (to dissipate heat and reduce weight), accuracy-enhancing recessed field or 11-degree parabolic target crowns, or recoil-reducing Accubrake™ (page 17). For complete information on how to customize your Vanguard, contact the Weatherby Custom Shop at (805) 227-2600.

ACCUBRAKE™ PERFORMANCE						
Cartridge	Bullet Weight (Grains)	Bullet Type	Rifle Weight, Scope & Mount Average lbs.	Recoil Energy Ft. lbs.	Recoil Energy w/Accubrake™ Ft. lbs.	Estimated Felt Recoil Comparison
.270 Win.	130	SP	8 3/4	18.07	9.04	.243 Win.
7MM Rem.	160	Partition	8 3/4	23.91	11.95	7MM-08 Rem.
.30-06 Sprg.	150	SP	8 3/4	20.46	8.75	.243 Win.
.300 Win.	180	Barnes X	8 3/4	31.47	15.73	.308 Win.
.338 Win.	225	SP	8 3/4	37.84	18.92	.280 Rem.
.257 Wby.	100	SP	8 3/4	23.76	11.88	7MM-08 Rem.
.300 Wby.	180	Partition	8 3/4	41.39	20.69	.30-06 Sprg.

CUSTOMIZE YOUR VANGUARD by adding a recoil-reducing Accubrake. Cuts felt recoil by up to 53% without any adverse effects on accuracy (see chart at left). Constructed of stress proof steel alloy or 420 Series stainless steel in high polish, matte blue or matte stainless steel finish.

FOR A TRULY UNIQUE LOOK, the Weatherby Custom Shop offers a wood stock upgrade for your Vanguard® rifle. Each year, our craftsmen review thousands of stock blanks for grain structure, color, contrast and overall appeal. The hand-selected Claro walnut stock is finished with a rosewood forend and grip cap with maplewood spacers and Weatherby signature diamond inlay.

CUSTOM VANGUARD®

ADD TO THE PERFORMANCE of your Vanguard by adding an 11-degree parabolic target or recessed field crown. Enhances accuracy and protects the rifling of the barrel.

COMPOSITE STOCK UPGRADES are available in a pillar-bedded Fiberguard™ or Accuguard™ with CNC-machined aluminum bedding block. Choose from six distinctive color/camo patterns, including Dark Timber, Desert, Snow, Tan w/Black Web, Black w/Gray Web and Black w/Red Web.

DESIGN YOUR OWN WEATHERBY®

Our Custom Shop can create a Weatherby rifle that is uniquely your own. From custom stock dimensions to wood checkering and finish options, our custom gunmakers can create the rifle or shotgun of your dreams. The “Design Your Own Weatherby” feature is available on our web site at www.weatherby.com. This step-by-step interactive design area lets you look at different options, compare pricing and create the exact rifle you want. Your design will then be printable which you can take to your Weatherby dealer for final pricing and ordering.

CUSTOM VANGUARD (SHOWN ABOVE)
.257 Wby. Mag. with gray laminate wood stock. Features 24" fluted stainless barrel with factory-installed Weatherby Accubrake™ (overall barrel length 26").

CUSTOM VANGUARD (SHOWN ABOVE)
.30-06 Springfield with nutmeg laminate wood stock. 24" barreled action with matte bluing.

CUSTOM VANGUARD (SHOWN ABOVE)
.270 Win. Mag. in Desert Camo. Features pillar bedded, Fiberguard composite stock and chrome moly barreled action with black Teflon® coating.

CUSTOM VANGUARD (SHOWN ABOVE)
.338 Win. Mag. in black with gray spiderwebbing. Features pillar bedded, Fiberguard composite stock, hooded front sight, barrel band swivel stud, adjustable ramp rear sight.

"I was confident in the purchase of my .270 since I am also the proud owner of a Weatherby® .300 Mag. and a Weatherby® .340 Mag.

GRANT GARDNER {KENTUCKY}

MARK V®

IN 1957, ROY WEATHERBY changed the face of American firearms with the introduction of the Mark V...billed as the world's strongest bolt action. Three rings of steel surrounding the case head. Fluted bolt body with three gas ports. Nine locking lugs and a short 54-degree bolt lift. For those who want the ultimate in speed and power, particularly on the biggest and most dangerous animals, the Weatherby Mark V Magnum system has no equal.

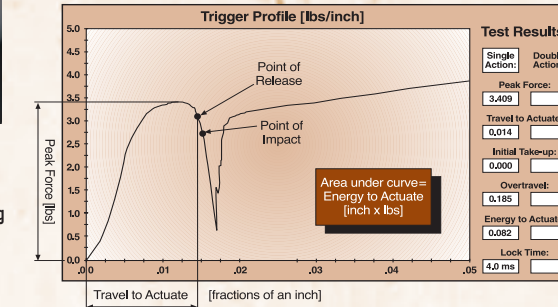

If you prefer less rifle weight for still hunting or climbing mountainous terrain, we offer the Mark V for standard calibers. Virtually identical in design, but dimensionally smaller and lighter, the standard caliber action gives deer hunters all the inherent benefits of the Magnum Mark V in a size that accommodates up to .30-06 cartridge length (including the .240 Wby. Mag.).

WEATHERBY® MARK V® rifles feature the highest quality in button-rifled barrels for better accuracy and performance in the field and better value for your money. Air gauge sampling insures bore uniformity throughout the length of the barrel, while our CNC-machining process assures critical concentricity in bore-to-chamber alignment. All Mark V rifles are finished with one of several application-specific, accuracy-enhancing crowns. Our barrels are renowned for their quality and their ability to maintain repeatable accuracy, shot after shot. Among all production rifles, you can simply do no better than a Weatherby.

THE FINEST FACTORY TUNED TRIGGER — Weatherby Mark V trigger assemblies are tested and profiled for optimum sear engagement for a clean, crisp break. The chart below illustrates the precise measurements that are taken on each trigger.

POINT OF RELEASE — Bold dot on chart shows where the trigger released the sear.
POINT OF IMPACT — Bold dot on chart shows where the firing pin contacts the primer.
LOCK TIME — Time interval between the point of release and the point of impact in milliseconds (4.0).
PEAK FORCE (LBS.) — Indicates let-off pressure.
TRAVEL TO ACTUATE — Indicates sear engagement or creep.

THE ONE-PIECE forged Mark V® bolt (magnum and standard) features longitudinal flutes that reduce weight and bearing surface for smooth operation and action. Positive cartridge extraction ejects the fired case without the need for full bolt extraction.

54-DEGREE BOLT LIFT — the shortest in the industry — is made possible by nine locking lugs. Faster chambering on follow-up shots and greater bolt-to-scope clearance for fewer battered knuckles.

POSITIVE CARTRIDGE EXTRACTION — extracts and ejects the fired case without the necessity of full bolt retraction.

MAGNUM OR STANDARD CARTRIDGES — The Mark V action for Magnum cartridges (9 lug) is available in 24" and 26" barrels. The Mark V action for standard cartridges (6 lug) is available in 22", 24", and 26" barrels (depending on model). Virtually identical in design, the standard cartridge action is dimensionally smaller and weighs 28% less (25.9 ounces versus 35.9 ounces). Each forged receiver features a one-piece integral recoil lug for superior strength and structural integrity. For specific chamberings by model, see pages 31-32.

COCKING INDICATOR — An industry first. Visually indicates whether the rifle is cocked or uncocked.

DIRECT STRIKER intervention safety offers direct, positive locking of the firing pin. Locks bolt in engaged position and disengages the sear to render the trigger inoperable. The safety operates easily with a rolling action of the thumb, and is virtually silent with a controlled release.

THREE GAS PORTS — In the event of a pierced primer or case rupture, these ports allow high pressure gases entering the bolt body to escape laterally for increased shooter safety.

ONE-PIECE forged and machined steel receiver with integral recoil lug provides superior strength and structural integrity for the strongest action anywhere.

BOLT SLEEVE (above) completely enshrouds rear of action — an industry first. Provides protection from remaining high pressure gases and brass particles in the event of a pierced primer or case rupture.

3 RINGS OF STEEL — The cartridge case head is encased in three rings of steel for greater safety. The recessed bolt face is surrounded by the barrel, which is surrounded by the forged and machined steel receiver, creating an extra measure of safety.

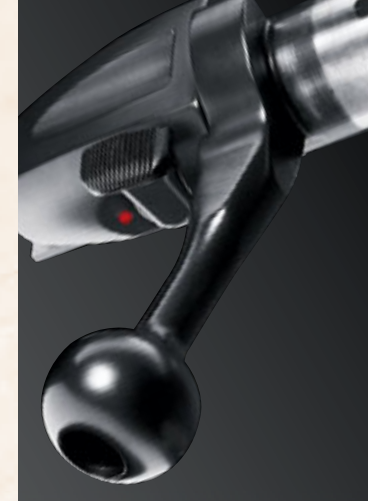

FULLY ADJUSTABLE TRIGGER — Precise adjustments for sear engagement (factory set at .008 to .014) and let-off weight (factory set at approximately 4 pounds). With a Weatherby, you get a clean, crisp trigger that will break precisely. This is a key component in delivering improved accuracy and can help make a better shot of any shooter. (Sear engagement adjustments must be performed by a Weatherby Service Center or a qualified gunsmith.)

FLOORPLATE/TRIGGERGUARD ASSEMBLY — All Weatherby® Mark V® rifles feature a one-piece alloy triggerguard frame for exceptional strength and fit and finish. Floorplate assembly is engraved with flying "W" monogram — just one of the custom touches you get with every Weatherby Mark V rifle.

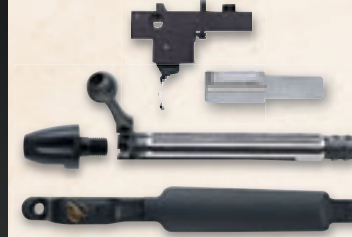

OUR MONTE CARLO STOCK is specifically designed to improve shooter performance and accuracy. The raised comb is cast off to allow for quicker eye-to-scope alignment and faster target acquisition and to reduce felt recoil. The forearm is dual tapered (back and upward) to deliver better grip and control under recoil, and is flat-bottomed to provide a steady, stable rest. All Mark V rifles feature three predetermined bedding points...strategically and precisely placed to consistently deliver the highest level of accuracy (Accumark® rifles feature free-floated barrels).

"I can carry the Ultra Lightweight all day long and I know I can count on it when it comes time to shoot."

CHAD KELLER, JR. WITH AUSTIN CASTRO {CALIFORNIA}

WE TRIMMED every available ounce of weight to give the Ultra Lightweight its feathery feel. It features state-of-the-art alloy materials and "skeletonized" handle and sleeve. Tips the scales at just 5 3/4 lbs. (standard action).

MARK V® ULTRA LIGHTWEIGHT

The Ultra Lightweight is just that and so much more, weighing in at just 5 3/4 pounds (6 3/4 pounds on magnum models). The 24" or 26" fluted stainless steel barrel (blackened to reduce game-spooking glare) delivers maximum velocity and features a recessed field crown (.583 for magnum and .547 for standard calibers). The Bell & Carlson tan composite stock with spiderweb pattern is finished with the renowned Pachmayr® Decelerator® recoil pad. Left-hand model also available. See page 31.

MARK V® ACCUMARK®

Features a hand-laminated, raised comb, Monte Carlo composite stock with matte gel coat finish, spiderweb accents and Pachmayr Decelerator recoil pad. The Mark V action is bed to an aircraft-grade 6061 T-6 aluminum bedding plate. A button-rifled, heavy contour free-floated barrel delivers maximum velocity and features a .705 muzzle diameter with target crown. Available in both right- and left-hand models. See page 31 for complete specifications.

MARK V® SVM

The Super VarmintMaster® starts with a tan, hand-laminated, raised comb Monte Carlo composite stock with beavertail forend for a stable rest. Also features black spiderwebbing for a better grip and a Pachmayr Decelerator recoil pad. A CNC-machined aluminum bedding block stiffens the receiver area for a stable platform for the barreled action. A button-rifled, fluted stainless steel barrel is finished with an 11-degree parabolic target crown, while an adjustable trigger rounds out this high performance varmint rig. See page 32.

SUPER VARMINTMASTER
(MSRP \$1825*)

ULTRA LIGHTWEIGHT, SVM AND ACCUMARK® rifles feature a specially-designed, hand-laminated raised comb Monte Carlo stock by Bell & Carlson. Constructed of Aramid, graphite unidirectional fibers and fiberglass.

A CNC-MACHINED bedding plate is constructed of aircraft-grade 6061 T-6 aluminum that stiffens the receiver area, providing a stable and rigid platform for securing the barreled action to the stock. Precisely-inletted, the bedding plate ensures repeatable accuracy.

“For us, hunting is very much a family affair. I have passed the Weatherby® tradition on to my children and I have no doubt they will do the same for theirs!”

DAVID DUFFY WITH JOHN AND STACY DUFFY {SOUTH DAKOTA}

MARK V® SYNTHETIC
Superior performance and uncompromised quality comes together in our most affordable Mark V® rifle. Hard-working. No nonsense. The Mark V Synthetic features a lightweight, injection-molded raised comb Monte Carlo stock. All metalwork is bead blasted and matte blued and features a button-rifled barrel in 24" or 26". See page 32 for complete specifications.

MARK V® FIBERMARK® COMPOSITE
The Fibermark takes production composites to an all-new level...offering a full host of performance-enhancing features not found on other production rifles. The platform for the rifle starts with a special hand-laminated, raised comb, Monte Carlo composite stock (a combination of Aramid, fiberglass and graphite unidirectional fibers). The stock is finished with the added touch of a Pachmayr® Decelerator® recoil pad. The Mark V® barreled action features a

button-rifled barrel with accuracy-enhancing target crown, secured to the stock at three predetermined bedding points. Pillar bedding reduces torque on the action to maintain repeatable, guaranteed accuracy that is the standard for all Mark V rifles. Dependable, consistent accuracy and knockdown power. Exceptional value. Available in Magnum calibers only. For complete specifications, see page 32.

MARK V® SVR
Back by popular demand, the SVR gives you superior performance in a short barrel varmint rig. The 22" button-rifled chrome moly barrel features a .739 muzzle diameter and 11-degree target crown. The barreled action is bed to a specially designed, hand-laminated, raised comb, Monte Carlo composite stock with a CNC-machined aluminum bedding block for stable, rigid platform. Gray spiderwebbing yields a non-slip grip and better concealment. Pachmayr Decelerator recoil pad. Available in .22-250 only. See page 32 for complete specifications.

**"This is my second ram with my Weatherby® .300.
I shot this Marco Polo at 700 yards at 16,000 feet!"**

SCOTT FAILOR {PENNSYLVANIA}

TRADITIONAL WOOD

WEATHERBY CRAFTSMEN take great care to bed, fit and finish each of the walnut stocks. Rosewood forends and pistol grip caps with inlays and maplewood spacers are carefully selected to match color and grain, then shaped and sanded to feel like a single piece of wood.

MARK V® ULTRAMARK™
The Ultramark bridges the legendary Mark V® Deluxe and a custom built rifle. We start with a hand-selected blank of highly figured, exhibition grade walnut. (The stock alone costs more than some rifles!) The high gloss, raised comb Monte Carlo stock receives elaborate 20 LPI checkering and maplewood/ebony spacers on the forend and pistol grip cap. All metalwork is polished to a high lustre finish. A beautifully elegant and distinctive representative of the gunmaking craft. See page 32.

MARK V® DELUXE
The quintessential Weatherby® and perhaps the most widely-recognized and copied rifle in the world. From the beautiful walnut stock to the critically-acclaimed Mark V® action, form and function come together to deliver superior performance. The Monte Carlo stock is accented with a rosewood forend tip and pistol grip cap with maplewood spacers and diamond inlay. Fineline checkering provides an additional custom touch. For complete specifications, see page 32.

MARK V® LAZERMARK®
This distinctive rifle features the same walnut stock as the Mark V Deluxe, with a laser-carved oak leaf pattern in lieu of point checkering. All metalwork is polished to a high gloss finish. The Lazermark combines modern technology and the legendary performance of the Mark V action with a look that is unique yet fully functional for all types of hunting. See page 32 for complete specifications.

MARK V® SPORTER
Quality and performance in an affordable wood stock design. Metalwork is bead blasted and matte blued to a low lustre finish, while the walnut stock sports a satin urethane finish, fineline diamond point checkering and contrasting rosewood forend tip. The Sporter evokes an element of pride, both in the rack and in the field. For complete specifications, see page 32.

IN TYPICAL Weatherby fashion, the recoil pad is precisely fit and finished to match the contour of the wood stock for a custom look.

“On a working ranch, coyotes cause all kinds of problems. I work hard at keeping them under control. The CFP makes me more effective and makes the job more fun.”

JIM MARTINEZ {CALIFORNIA}

CFP

MARK V® COMPACT FIRING PLATFORM (CFP)

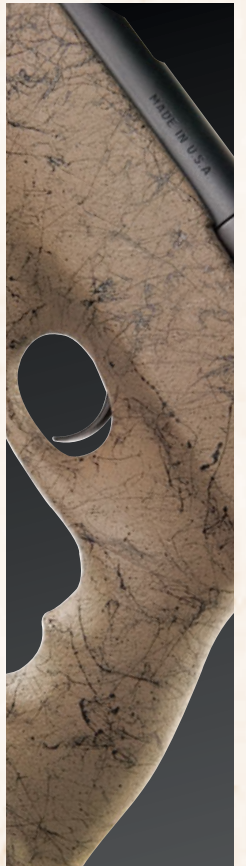

For big game and varmint hunters looking for an added challenge, the Mark V® CFP fits the bill. This exciting firearm offers all the legendary features and performance advantages of the traditional Mark V action in a compact, 27 1/2" package that tips the scales at just 5 1/4 lbs. The CFP features a Fibermark® composite stock (a combination of Aramid, graphite and unidirectional fibers) with tan pebble grain finish. Black spiderwebbing provides a

sure, positive grip and a distinctive look. A button-rifled, #2 contour 16" chrome moly (4140) barrel is pillar-bedded and is finished with a custom target crown for consistent, repeatable accuracy. All metalwork is bead blasted to a matte blue to reduce game spooking glare. As with all Mark V rifles, the CFP is guaranteed to shoot a 1 1/2" or better 3-shot group from a cold barrel at 100 yards (when used with premium ammunition). Available in .223 Remington, .22-250 Remington, .243 Winchester and 7mm-08 Remington.

offering proven popular chamberings for a diverse range of game from varmints to whitetails. For complete specifications, see page 31.

MARK V® COMPACT FIRING PLATFORM

.22-250 Rem.	CFP1222RR10
.243 Winchester	CFP1243NR10
7mm-08 Rem.	CFP17M8RR10

WITH THE LEGENDARY MARK V® action for standard calibers, the CFP one-piece forged bolt features a 6-lug design. The non-binding action is smooth and stable with a 54-degree bolt lift for faster cycling on follow-up shots.

COMPACT FIRING PLATFORM (CFP)
(MSRP \$1,579*/MSRP \$1,544* .243 Win.)

FOR 2007, THE MARK V® CFP comes with a set of Talley rings and bases that are specially designed for the short, low profile, long eye relief scopes used with the CFP. Unique one-piece design of 7000 Series billet alloy provides a lightweight, yet rock-solid mount.

A SPECIALLY-DESIGNED, FIBERMARK® composite stock (a combination of Aramid, graphite and unidirectional fibers) is the foundation for the 16" pillar-bedded barreled action. An integral recoil lug provides superior strength and structural integrity. Predetermined bedding points add to the consistent, repeatable accuracy of the CFP.

THE MARK V® CFP FEATURES an ambidextrous grip design for right- or left-hand shooters (bolt setup is on right-hand side). The grip area is pre-formed to match the natural shape of the hand for a sure, comfortable feel.

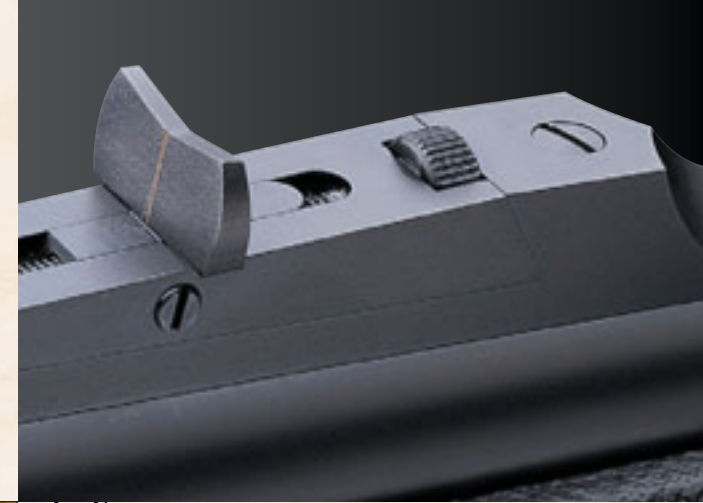

*Price may vary by model and dealer.

“The last thing I wanted was a rifle I would second guess. My Weatherby® performed just as I expected when this Cape Buffalo decided he wanted to play by his rules.”

BRYAN STAVE {NEBRASKA}

FROM CUSTOM WOOD, CHECKERING, metalwork, inlays and engraving, as well as synthetic stocks, the Weatherby Custom Shop can build a rifle to your exact specifications. Our 6/3/1 Grading System lets you choose similar grade embellishments for a matching look that is uniquely your own.

TO ADD TO THE PERSONALIZATION of an existing Weatherby® rifle, or to create a custom rifle of your dreams, choose from a variety of floorplate embellishments, as well as engraving for your name on the bolt. Bolts can also be damascened and checkered to add a distinctive and elegant look to the rifle.

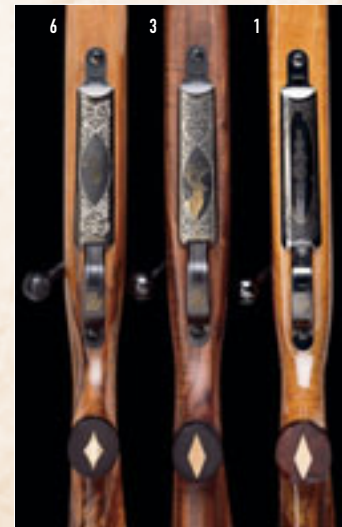

FOR A CLASSIC SAFARI LOOK, add the option of an adjustable ramp (left) with gold-filled “V” and a hooded barrel band front sight.

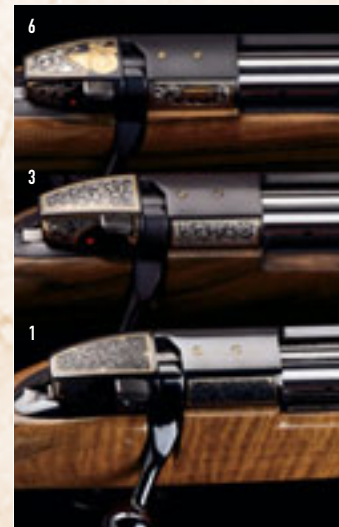

WEATHERBY® CUSTOM RINGS and bases are available in Grade 6 (top), Grade 3 (middle), and Grade 1 (bottom). Each offers options of different engraving patterns and gold overlays.

MARK V® CUSTOM

VISIT WWW.WEATHERBY.COM and “Design Your Own,” choose from one of several popular existing “custom” models (page 29) or contact the Weatherby Custom Shop at (805) 227-2600. Our skilled gunsmiths and craftsmen are ready to build you the rifle of your dreams—a source of pride and performance that is worthy of passing from generation to generation.

CUSTOM FLOORPLATE ENGRAVING is available in three different grades (6/3/1), as well as options for rosewood or ebony pistol grip caps with inlaid diamonds in maple or gold (wood stock rifles).

THE BOLT SLEEVE AND RECEIVER of your rifle can also be engraved, choosing from three different engraving patterns (6/3/1).

MARK V® OUTFITTER (SHOWN ABOVE)
300 Wby. Mag. in Desert Camo. Features Monte Carlo stock (Kevlar and carbon fibers) with aluminum bedding block. Teflon®-coated stainless steel fluted barrel with target crown and hand-honed action.

MARK V CROWN CUSTOM (SHOWN ABOVE)
270 Wby. Mag. with hand-carved walnut stock featuring inlays and gold monogram for your initials. Damascened bolt and follower with checkered bolt knob. Engraved barrel, receiver, triggerguard and floorplate (with choice of gold game scene).

MARK V ROYAL ULTRAMARK CUSTOM (SHOWN ABOVE)
257 Wby. Mag. with exhibition grade walnut stock and 24 L.P.I. hand checkering. Gold and silver engraved barrel and action with 24K gold scrolled floorplate in your choice of game scene. Damascened bolt and follower and checkered bolt knob.

MARK V SAFARI CUSTOM (SHOWN ABOVE)
.460 Wby. Mag. with French walnut Monte Carlo stock with satin oil finish. Features ebony forend and pistol grip cap and Fleur-de-lis checkering. Damascened bolt and follower with checkered bolt knob. Adjustable ramp, hooded barrel band front sight and barrel band swivel stud. The floorplate is engraved with “Safari Custom.”

MARK V DGR (SHOWN ABOVE)
.375 H & H Mag. with a Monte Carlo composite stock in black oxide matte finish to reduce glare. Features CNC-machined aluminum bedding block. Gold rear “V” and front bead for quick sight alignment and target acquisition. 24” barrel with barrel band swivel stud. Drop box magazine (optional). Left-hand model also available (contact the Custom Shop for available calibers).

OUR DROP BOX FLOORPLATE (left) expands the capacity of Mark V® Magnum rifles (.257 Wby. Mag. through .460 Wby. Mag.). This easy to install accessory kit allows you to hunt with 3 cartridges (or 4 depending on caliber) in the magazine +1 in the chamber.

AS A CUSTOM OPTION on select calibers of Accumark® and Super VarmintMaster® (SVM) rifles, Weatherby will guarantee a SUB-MOA (.99 in. or less) 3-shot group from a cold barrel at 100 yards (with specific calibers only). We will select the rifle and provide a factory-shot test target along with the specific ammunition load information. The floorplate will feature a distinctive engraved “SUB-MOA.” For more information, contact the Custom Shop.

“Weatherby® cartridges are extremely accurate and have unbelievable knockdown power. They have been instrumental in helping me qualify for the SCI World Hunting Award Ring.”

WILLIAM A. PAULIN {CALIFORNIA}

OVER HALF A CENTURY AGO, ROY WEATHERBY began his career in the firearms industry as a cartridge “wildcatter,” developing his revolutionary ideas about rifle cartridge performance and design. At the time, many industry “experts” were promoting the idea that optimum performance was a result of pushing big bullets at relatively slow speeds. Roy, however, believed just the opposite. It was his opinion that the faster a bullet traveled, the better—the flatter it would shoot, the less it would drop, the harder it would hit—the better its terminal performance. It was a concept that would spawn many an argument among ballistics experts, gun writers and in many a deer camp. But as people began to hear about and experience Roy’s notion firsthand, those questions, concerns and doubts were quickly laid to rest. Soon, the entire hunting world would know what Roy had always believed—generate enough speed to create hydrostatic shock in the animal and the result will be more one-shot kills. Today, our ammunition remains true to the concept Roy developed in the 1940s. At the same time, our ammunition also takes advantage of the latest in controlled expansion bullets which are capable of harnessing the higher velocities to create cartridges that provide the ultimate in penetration, large wound channels and more one-shot kills.

CHUCK SMITHEY – NORTH CAROLINA

AMMUNITION

ALL WEATHERBY® RIFLES ARE GUARANTEED TO SHOOT A 1 1/2" OR BETTER 3-SHOT group at 100 yards from a cold barrel when used with premium (non-Weatherby calibers) or Weatherby factory ammunition. Together, the Weatherby system (premium ammunition and rifle) forms the flattest shooting, hardest hitting, most accurate combination in the industry today.

WEATHERBY® AMMUNITION offers a variety of premium and super premium grade bullets that are carefully selected for specific hunting applications. To meet varying needs, we proudly load Hornady® InterLock®, the renowned Barnes TSK™, the popular Nosler® Partition®, the Nosler Ballistic Tip® and the Nosler® Accubond®. Whichever bullet you prefer, it has been ideally matched to maximize the performance potential of Weatherby ammunition.

A UNIQUE DOUBLE RADIUS Venturi shoulder design increases the velocity of escaping gases without increasing the pressure within the cartridge. This results in higher velocity within standard pressure ranges.

NORMA® HIGH-GRADE PREMIUM POWDER is used in all Weatherby ammunition to deliver maximum attainable velocity and energy. Each lot of powder is tested to assure consistency and to achieve the lowest standard velocity deviation from shot to shot, improving accuracy. Gives the non-handloader handloaded performance and accuracy.

SPECIALY-DESIGNED PRIMERS provide positive ignition of the large powder charges found within Weatherby Magnum ammunition.

**NOTHING SHOOT FLATTER,
HITS HARDER OR IS MORE ACCURATE.**

norma

WE USE NORMA PRECISION BRASS, offering CNC-machined primer pockets produced to match-grade specifications... the finest that money can buy.

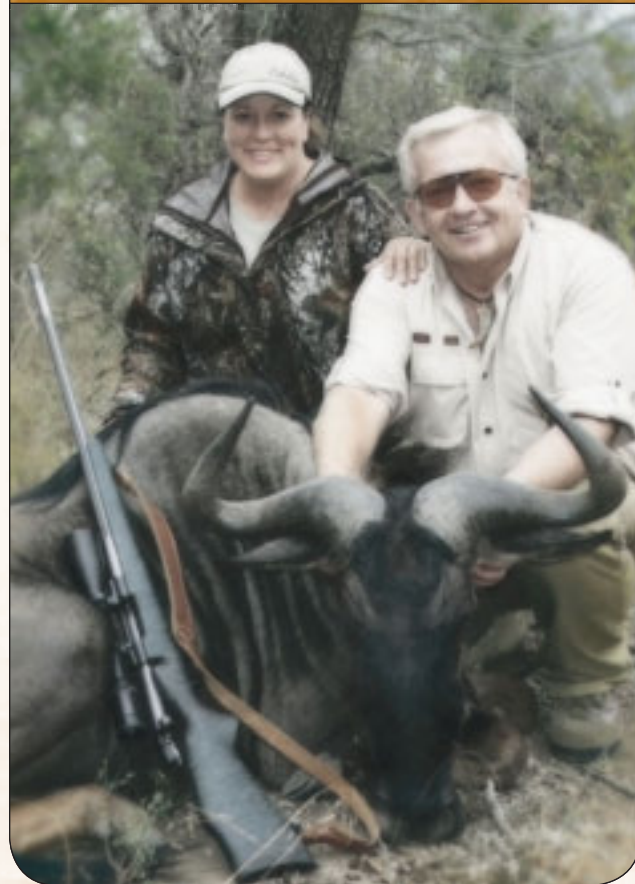

WE START WITH NORMA® PRECISION BRASS, the finest that money can buy (handloaders also tell us it's the finest for reloading). Then we add premium grade primers and bullets from the top names in the business – Hornady® Nosler® and Barnes. The result is that each Weatherby Magnum cartridge is produced with the precision of handloading...with the blistering speed and downrange power to deliver the opportunity for more one-shot kills. In virtually every case, no other commercially-produced ammunition provides the Maximum Point Blank Range of Weatherby. Nothing shoots flatter, hits harder or is more accurate out of the box than a Weatherby®.

“Our PH had never had a hunter use a big Weatherby® (.30-378). By the time we left, 15 kills later, he wanted one of his own.”

AL AND ELAINE HUENINK {GEORGIA}

AMMO

Hornady

INTERLOCK

A tried and true hunting bullet, the InterLock features an exclusive ring that ensures the core and jacket remain locked during expansion. The result is more mass, energy and momentum at impact for greater stopping penetration. Hornady's pioneering secant ogive design offers a high ballistic coefficient with maximum bearing surface for greater stability.

RETAINS MORE MASS and energy for deep penetration and large, consistent wound channels.

SECANT OGIVE DESIGN offers a high ballistic coefficient with maximum bearing surface for greater stability.

CANNELURE provides accurate and consistent crimping, and also works with InterLock ring to ensure the core and jacket remain locked during expansion.

THE RAISED INTERLOCK RING is embedded in the bullet's core, ensuring the core and jacket is locked in one piece during expansion to retain mass and energy.

HORNADY INTERLOCK WEIGHT RETENTION = 70-80%

BARNES

BARNES TRIPLE-SHOCK X (TSX)

Upon its introduction, the Barnes X™ bullet was generally regarded as a quantum leap in bullet design, retaining virtually all of its weight upon impact and delivering superior terminal performance with lighter weight bullets. Now, Barnes has taken the X to the next level with the Triple-Shock™ X-Bullet™ (TSX). Made of 100% copper (as opposed to lead), it incorporates a series of precisely positioned rings cut into the body of the bullet. These rings relieve firing pressure, allowing the TSX to be safely loaded at higher velocities. Upon impact, the TSX bullet expands into four sturdy petals with razor-sharp cutting edges that will not come apart. TSX bullets also promise reduced fouling for easier cleaning of the bore. Get greater penetration and more one-shot kills with the world's newest, and deadliest hunting bullet—the Triple-Shock X.

SPECIALLY DESIGNED nose cavity opens instantly into four petals on impact. Offers faster expansion than traditional lead-core bullets.

RAZOR-SHARP EDGES deliver lethal cutting power and deeper penetration through thick skin, flesh and bone.

100% copper construction.

PRECISELY POSITIONED RINGS relieve firing pressure, allowing the TSX to be loaded at higher velocities.

SOLID-CORE construction retains virtually 100% of original bullet weight. Will not come apart on impact.

BARNES TRIPLE-SHOCK X WEIGHT RETENTION = 99-100%

Nosler

NOSLER BALLISTIC TIP®

In a perfect world there would be no changing winds, no hunting pressure, and no wary, spooked, or running game that might require a fleeting or distant shot. And all it would take to bring down that trophy buck would be a textbook, 100-yard broadside shot.

However, the real world of hunting is a bit more challenging than that. In fact, the more you hunt, the more you realize how unpredictable and unforgiving nature can be—which is why Nosler engineered the Ballistic Tip® Hunting bullet to be very predictable and extremely forgiving...a proven performer for more than 20 years.

A POLYCARBONATE TIP resists deformation in the magazine and initiates expansion upon impact. The tip is color-coded by caliber.

FULLY TAPERED JACKET and special lead alloy core allows controlled expansion and optimum weight retention at all practical velocity levels.

BALLISTICALLY-ENGINEERED Solid Base® boat tail configuration combines with the streamlined polycarbonate tip for extreme long-range performance.

HEAVY JACKET BASE acts as a platform for large diameter mushroom and prevents bullet deformation during firing.

NOSLER BALLISTIC TIP WEIGHT RETENTION = 50%

WBV. CALIBER	.240	.257	.270	7mm	.300	.300	.30-378	.30-378	.338-378	.340
WEIGHT (GR)	95	115	140	150	165	180	165	180	200	200

Bullet weights listed above are available in Weatherby® Magnum Ammunition. Description, illustrations and weight retention specifications provided by bullet manufacturer. Impact velocities can significantly affect bullet weight retention.

Nosler

NOSLER ACCUBOND®

A serious hunting bullet designed to typical Nosler standards, AccuBond® represents the most advanced bonded core bullet technology to date. Through a proprietary bonding process that eliminates voids in the bullet core, AccuBond marries Nosler's traditional copper alloy jacket with its special lead alloy core. The result is a bullet that flies true, penetrates deep and retains its weight—and won't cause extensive barrel fouling. Nosler's AccuBond—the benchmark by which all bonded core bullets will be measured.

A POLYMER TIP resists deformation in the magazine and initiates expansion upon impact.

FULLY TAPERED, heavy alloy jacket is bonded to the special lead alloy core through a proprietary process designed for controlled expansion, deep penetration and a 60-70% weight retention.

TOTALLY CONCENTRIC, impact-extruded jacket bonds completely to the bullet core for extreme accuracy.

BALLISTICALLY ENGINEERED, the Solid Base® boat-tail configuration combines with the streamlined polymer tip for extreme long-range performance.

SOLID BASE® DESIGN JACKET base acts as a platform for large diameter mushroom and prevents bullet deformation during firing.

NOSLER ACCUBOND WEIGHT RETENTION = 60-70%

WBV. CALIBER	.257	.270	7mm	.300	.30-378
WEIGHT (GR)	110	140	160	180	180

Nosler

NOSLER PARTITION®

Favored the world over for its superior penetration and bone-crushing stopping power, the Nosler Partition® bullet provides the ultimate in accuracy, controlled expansion and weight retention in any caliber, on any game, and in any situation. Nosler Partition is truly the standard of excellence and value in big game hunting bullets.

FULLY TAPERED JACKET ruptures instantly at the thin jacket mouth, yet the gradual thickening along the bullet's axis controls expansion and curls the jacket uniformly outward at high or low velocities.

SPECIAL LEAD ALLOY dual-core construction provides superior mushrooming characteristics at virtually all impact velocities.

INTEGRAL PARTITION supports the expanded mushroom and retains the rear lead alloy core.

ENCLOSED REAR CORE retains more than half the original bullet weight for deep penetration.

SPECIAL CRIMP LOCKS in the rear core section add strength to resist deformation under the pressure of heavy magnums.

NOSLER PARTITION WEIGHT RETENTION = 65-70%

WBV. CALIBER	.240	.257	.270	.270	7mm	7mm	.300	.300	.300	.30-378	.338-378	.340	.340	.375

“There’s nothing I like better than knocking down a limit of doves. My Weatherby® double really does its job.”

ROB NIOA {AUSTRALIA}

SIDE-BY-SIDE

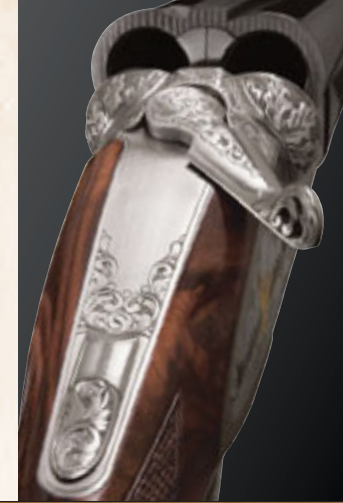

PERHAPS NO OTHER GUN elicits the devotion and emotional bond as the traditional English side-by-side shotgun. Refined over centuries of use, the double gun is the field standard among wingshooting loyalists.

Weatherby offers an Italian-made side-by-side that is certain to stir a response from the most discriminating enthusiasts, bringing together classic styling and craftsmanship with modern production techniques in a truly stunning way.

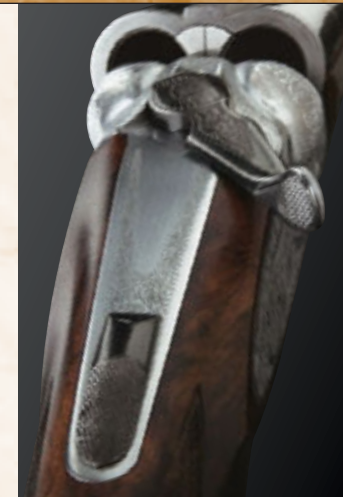

First introduced in 2005, we now offer three different models to meet different budgets and tastes. The D'Italia Deluxe is a head-turning work of art that is at the pinnacle of the gunmaking craft, complete with intricate renaissance floral engraving with gold inlay. The D'Italia PG features a beautiful walnut stock with rounded pistol grip and semi-beavertail forearm. And for straight grip enthusiasts, we once again present the well-appointed D'Italia.

ALL ATHENA® D'ITALIA shotguns feature a stainless steel Integral Multi-Choke (IMC) system to tailor choke patterns to shooting needs and field situations. Certified for steel shot through modified choke constrictions.

THE ATHENA® D'ITALIA DELUXE features the beauty of intricate engraving with cut-outs on the top lever.

THE ATHENA® D'ITALIA OFFERS checkered engraving on the top lever and safety for a striking look and functional, sure-handed performance.

SIDE-BY-SIDE ATHENA D'ITALIA DELUXE (BELOW)

BEAUTIFUL ENGRAVING adds elegance and non-slip functionality.

THE ATHENA D'ITALIA DELUXE features a single mechanical trigger. Right barrel fires first.

FANCY ENGRAVED triggerguard features rolled-formed border to eliminate sharp edges.

MONOBLOC BARRELS (26" or 28") feature automatic ejectors to discharge only spent shells when receiver is opened. Unfired shells are raised slightly for easy extraction.

SLENDER DESIGN of integrated slide safety is unobtrusive yet easy to operate in the field.

THE ATHENA® D'ITALIA FEATURES laser cut checkering in "New Scottish" pattern. 20 LPI adds a distinctive look and a sure grip in the field.

A TIME-TESTED Anson and Deeley action with Purdey double locking system provides perfect interlocking alignment of barrels to action.

CHROME-LINED BARRELS are built to withstand the wear and tear of heavy use. Lengthened forcing cones and backboring improve patterns while reducing felt recoil.

SIDEPLATES with intricate engraving leave no detail untouched. Screws are meticulously timed for perfect alignment.

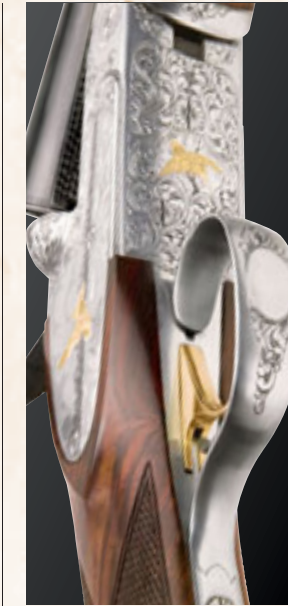

DOUBLE TRIGGERS are a signature touch to the classic English design.

TRIGGERGUARD features a special rolled-formed border to eliminate sharp edges. Bottom of action continues the intricate engraving pattern from the sideplates.

Weight varies by model.

THE ATHENA D'ITALIA DELUXE (above) houses a single mechanical trigger and can be personalized with your initials.

THE DISTINCTIVE WEATHERBY Flying "W" in gold adorns the Athena D'Italia straight grip (shown below) and pistol grip models.

ALL ATHENA D'ITALIA shotguns feature walnut stocks with deep oil finish for a classic look. Each stock is hand selected for figuring, density and weight. You also get exceptional wood-to-metal fit where the wood forend marries with stylish metal inserts with titanium nitride finish.

“The Weatherby® Side-by-Side was a big hit on our ranch. Looks really good and shoots even better.”

WILL AND WADE LATHAM - LAFONDA RANCH (TEXAS)

ATHENA® D'ITALIA

THE ENGLISH SCROLL with ribbons engraving carries the signature of the world-famous Cesare Giovannelli Studio.

SIDE-BY-SIDE ATHENA® D'ITALIA DELUXE

In a word: stunning. Our side-by-side Deluxe is a beautiful testament to the gunmaking craft. The action features sculpted frameheads and is adorned with Bolino-style game scene with renaissance floral engraving, hand-signed by the engraver. The stock is AAA Fancy Turkish walnut with classic straight grip buttstock, 24 LPI hand checkering and hand-rubbed oil finish. For the most discriminating double gun enthusiast, the D'Italia Deluxe is a true work of art. See page 39 for specifications.

SIDE-BY-SIDE ATHENA® D'ITALIA PG

Identical in action and frame to the Athena D'Italia, it features a rounded pistol grip and semi-beavertail forearm for exceptional between-the-hands balance. The hand-selected, oil-finished walnut stock carries laser cut "New Scottish" checkering at 20 LPI. Comes with foam-lined take-down case for the ultimate in portable protection. For complete specifications, see page 39.

SIDE-BY-SIDE ATHENA® D'ITALIA

The quality and craftsmanship of Italy's finest gunmakers deliver a classic side-by-side that rivals guns costing thousands more. Action is cut from a solid block of alloy steel, hardened and chromed with a coin finish. Unmatched wood-to-metal fit and every appointment worthy of a classic field double gun. Available in 12, 20 and 28 gauge models. For complete specifications, see page 39.

"I think I've found my new favorite turkey gun...really impressed with the Weatherby® SAS."

BRANDON ROTH {CALIFORNIA}

ITALIAN-MADE semi-automatics are renowned for their quality, craftsmanship and reliable function in the field. With the Weatherby SAS, you get every performance feature and advantage at a cost that is hundreds less than other name imports. Our self-compensating gas system significantly reduces felt recoil and delivers dependable, high volume performance. Additional recoil reduction comes as a result of internal dampening, lengthened forcing cones, backboring and recoil pad. A magazine cut-off with smart follower allows for easy loading and quick changeovers (2 3/4" or 3" shells), while a vent-ribbed barrel dissipates heat and reduces "mirage." The modern gas system disassembles quickly and easily for cleaning, and a special drop-out trigger is removed simply by punching out two side-mounted pins. Superior performance. Reduced recoil. Exceptional fit and finish. That's the SAS.

Weight varies by model.

SAS SHOTGUNS feature our screw-in Integral Multi-Choke system (IMC). Each shotgun comes with three steel choke tubes and an easy-to-use choke wrench. Tube constrictions are based upon barrel length and anticipated usage. Fall Flight™ and Apparition Excel™ models come with extended choke tubes.

ALL WEATHERBY CHOKES feature an easy-to-use identification system to allow you to quickly identify the proper choke for your shooting situation. The top of each choke has been notched to correspond with the specific choke pattern. The choke pattern is also stamped on the side of each choke.

SAS

CUSTOM FIT the stock of your SAS to your body size and shape with our special shim/spacer system. Spacers can be quickly added, removed or reversed to alter cast on/cast off or drop for improved target acquisition and more "hits."

DROP-OUT TRIGGER SYSTEM
Contributing to the exceptional functionality of the SAS is our specially-designed drop-out trigger system. Simply pushing two pins on the right side of the receiver allows you to remove the trigger assembly for easy cleaning. Snaps back into place in just seconds for fast reassembly.

RECEIVER CONSTRUCTED of CNC-machined, aircraft-grade 7075 T-6 alloy to reduce overall weight, improving handling characteristics.

INTERNAL DAMPENING SYSTEM significantly reduces felt recoil when bolt contacts rear of receiver during the ejection/reload cycle, and reduces stress and abuse on the receiver.

THE SAS features chrome-lined barrels to withstand the wear and tear of high-volume shooting. Lengthened forcing cones work to reduce felt recoil, curbing shooter fatigue while improving patterns.

UNIQUE DROP-OUT TRIGGER SYSTEM can be removed by simply punching out two pins. Allows for quick, easy cleaning and reassembly.

MAGAZINE CUT-OFF feature provides versatility, allowing for quick load changes and an additional margin of safety when clearing the chamber without completely unloading the shotgun.

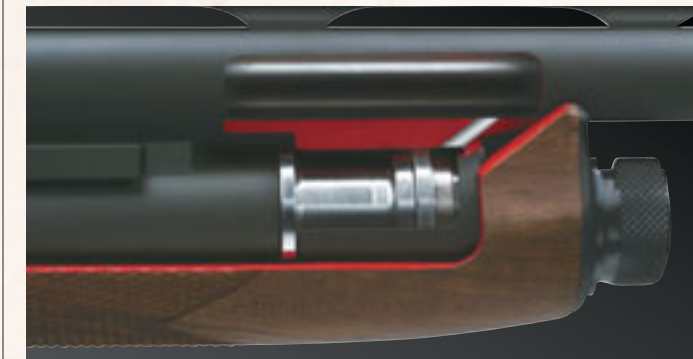

AMBIDEXTROUS OVERSIZED "DELTA" safety button is located on rear of triggerguard for easy access and fast disengagement in the field. Ideal for use with gloved hands.

SELF-COMPENSATING GAS SYSTEM — Form and function come together in a simple, but highly effective self-compensating gas system (shown at right) for reduced recoil and increased load versatility. The modern, in-line system significantly reduces the size of the forend, improving balance and pointability. The SAS easily handles 1 1/8 oz. 2 3/4" shells to the heaviest 3" duck and goose loads. A special internal dampening system reduces felt recoil to provide greater shooter comfort. The two-piece system is easy to assemble and disassemble for fast, convenient cleaning.

INTEGRAL MULTI-CHOKE SYSTEM — POINTS OF CONSTRICTION

WEATHERBY® SAS SHOTGUNS are backbored to .735 to improve shot patterns, reduce recoil and curb shooter fatigue.

"I had the turkey hunt of a lifetime with my Weatherby® SAS shotgun. My trophy 'Rio Grande' turkey will be taxidermied into a full body mount, proudly displaying it's 10 1/2-inch beard."

RICHARD E. WISELEY {CALIFORNIA}

SAS FIELD

The SAS Field features a traditional walnut stock for a classic look against the matte blued receiver and metalwork. The modern, self-compensating gas system makes volume shooting easy and comfortable, reducing felt recoil and affording fast and convenient cleaning. To aid in shooter accuracy and pointability, a special shim system lets you adjust the cast on/off or drop for a near custom fit. Built for long days and fast shooting, the SAS comes with three IMC chokes and wrench for quick changeovers. Available in 12 gauge. For complete specifications, see page 43.

SAS SLUG GUN

The quality, performance and value of our SAS is now available for slug gun hunters. The SAS Slug Gun features the same Italian-made, self-compensating gas system for reliable duty and easy maintenance, matched with a 22" rifled barrel (accommodates 2 3/4" and 3" shells) with cantilever base. The SAS Slug Gun also features a walnut Monte Carlo stock with Weatherby's special shim system to adjust cast. Sling swivel studs included. For complete specifications, see page 43.

OPTIONAL SAS RIFLED BARREL

Increase the versatility of any SAS shotgun with our slug barrel. The 22" rifled barrel with open sights offers exceptional performance and durability in the field.

“Calling in a big tom is never easy. I always count on my Weatherby® to finish the job.”

AARON SMITH {CALIFORNIA}

SAS SYNTHETIC

The SAS Synthetic delivers all the design and performance advantages of the SAS Field in a synthetic stock option. The black, injection-molded stock features our special shim system that allows right- or left-handed shooters the ability to adjust cast on/cast off or drop to fit individual preferences. Modern, self-compensating gas system is reliable under heavy use, reduces felt recoil and is easy to disassemble and clean. Comes with sling swivels and IMC choke system with three chokes. Available in 12 gauge. See page 43 for complete specifications.

SAS APPARITION EXCEL™

When concealment in the woods is key, this Weatherby SAS is the clear choice. It features Apparition Excel by Skyline Camouflage. The mid-point bead and high visibility front sight provides fast target acquisition. Features our special shim system that lets you custom fit for cast on/cast off and drop. Comes with sling swivel studs and IMC choke system with three extended choke tubes. Available in 12 gauge. For complete specifications, see page 43.

SAS FALL FLIGHT™

With Fall Flight by Skyline Camouflage, this autoloader is ideally suited to the heavy-duty action of the duck or goose blind. Reliable, self-compensating gas system is built for long days of shooting. Quickly disassembles for fast, easy cleaning. Barrels, available in 26" or 28" length, feature mid-point bead and high visibility front sight to get on target quickly. Stock can be custom fit for cast on/cast off and drop. Comes with sling swivel studs and IMC choke system with three extended choke tubes. Available in 12 gauge. See page 43.

CASEY TILLARD - WYOMING

NOTHING CAN RUIN A HUNT faster than a shotgun that fails to function. To assure that your SAS will stand up when it counts, Weatherby institutes stringent endurance and function testing that far exceeds industry standards, both at the lab and in the field. From Canadian goose pits to Louisiana gulf coast duck marshes, from the dove fields of Argentina to South Dakota pheasant country, tens of thousands of rounds have been put through our test shotguns. You get the confidence of knowing that your Weatherby will pass the most rigorous test of all: yours.

*Price may vary by model and dealer.

"I own a lot of different shotguns and my Weatherby® Over/Under is still my favorite to shoot. I just appreciate how naturally it points."

STEVE HARRIS {NORTH CAROLINA}

FLUSHING PHEASANTS. Decoying greenheads. Breaking bobwhites. When your pointing skills are put to the test, that's when you'll appreciate your Weatherby® Over/Under shotgun. The difference starts with a design that has proven itself time and time again since we first introduced it in 1982. The monobloc barrel is narrower and lower in profile to deliver lighter weight, better balance and a livelier feel. Our modified Greener crossbolt action actually "shoots in" with use to retain its rigidity and tight fit—recognized as one of the strongest and most reliably made. And, you get the distinctive beauty of a richly finished, Claro walnut stock, intricately engraved receivers and wood-to-metal fit that is the hallmark of the Weatherby name. From the elegant Athena® to the field-proven Orion®, a Weatherby Over/Under will elicit a true sense of pride, both in the gunrack and in the field.

Weight varies due to wood density.

ALL WEATHERBY® CHOKES feature an easy-to-use identification system to allow you to quickly identify the proper choke for your shooting situation. The top of each choke has been notched to correspond with the specific choke pattern. The choke pattern is also stamped on the side of each choke.

BRILEY
A Legacy of Shooting Innovation.

OVER/UNDER

WEATHERBY® OVER/UNDER stocks are precisely crafted for a seamless wood-to-metal fit...an extra measure of attention to detail found only on the finest custom shotguns.

AUTOMATIC EJECTORS — discharge spent shells when receiver is opened. Unfired shells are raised slightly for easy extraction.

SPECIAL BREECHING SYSTEM — provides seven points of engagement for a stronger, safer action.

SINGLE, SELECTIVE INERTIA TRIGGER — works independently of the safety. This allows the shooter to select a barrel regardless of safety setting. The barrel selector is stamped with "O" and "U" to readily indicate the barrel choices. Gold-plated for corrosion protection. Does not apply to Orion® Super Sporting Clays (SSC) which does not have this feature.

PATENTED SEAR BLOCK SAFETY DESIGN — prevents accidental discharge when loaded shotgun is closed with trigger depressed... even when the safety is in the "off" position. Does not apply to Orion Super Sporting Clays (SSC) which does not have this feature.

SLIDING TOP SAFETY — prevents firing unless top barrel release lever is fully engaged. Does not apply to Orion Super Sporting Clays (SSC) which does not have this feature.

HAMMER REGAIN — prevents accidental discharge if trigger is pulled to near "let-off" and then released. Sear to hammer engagement is fully reset for a consistently crisp trigger pull.

MODIFIED GREENER CROSSBOLT ACTION — one of the strongest and most reliable made. The crossbolt lockup actually "shoots in" with use to retain its rigidity and tight fit. Shallower in depth and thinner in profile, our 12-gauge receivers are proportionate to most other 20-gauge guns, generating that sought-after "between the hands" balance for quicker pointing and target acquisition.

MONOBLOC BARREL CONSTRUCTION — narrower and lower in profile. Delivers lightweight performance, superior balance and a livelier feel.

LENGTHENED FORCING CONES — work to reduce recoil...curbing shooter fatigue and improving patterns.

MATTE VENTILATED top rib reduces glare and works with side vents to dissipate heat buildup in the barrels. Improves shooting accuracy.

BACKBORING TO .735 — on all Weatherby 12-gauge models helps to improve shot patterns, reduce recoil and shooter fatigue.

INTEGRAL MULTI-CHOKE SYSTEM — POINTS OF CONSTRICTION										
Gauge	Cylinder	Skeet	Sporting Clays #1	Sporting Clays #1 (Ported)	Imp. CyL	Sporting Clays #2 (Ported)	Mod.	Imp. Mod.	Full	Extra Full

ALL WEATHERBY® O/U SHOTGUNS feature an interchangeable, screw-in Multi-Choke System by Briley to allow you to tailor your shot pattern for specific needs. Briley chokes are crafted from stainless steel. Certified for steel shot through modified choke constrictions. In addition, SC I and SC II ported choke (right) tubes are available for the sporting clays enthusiast.

WEATHERBY ATHENA® AND ORION® field shotguns feature our popular classic field stock designs (right), with a rounded pistol grip and slender forearm for better balance and a livelier feel. Our SSC model (below and right) features a target-style pistol grip and Schnaubel forend for better fit and feel on the sporting clays course.

THE WEATHERBY CUSTOM SHOP can build you a shotgun with multi-barrel sets (in any combination of 20 gauge, 28 gauge, and .410) which allow you to quickly change barrel gauges and lengths. Tailor your shotgun to the particular shooting situation at the drop of a hat. For more information, contact the Weatherby Custom Shop at (805) 227-2600, or see your Weatherby dealer.

“Opening day of dove season and my Weatherby® Athena®.
It doesn't get much better than that.”

KYLE WEAVER {VIRGINIA}

ATHENA®

A HALLMARK of Weatherby® Athena® shotguns is an attention to craftsmanship normally found on double guns of considerably more expense. You get exceptional fit and finish and extra detail, including the beauty of intricate rose and scroll, game scene or floral pattern engraving. Each shotgun carries engraved sideplates, receiver and tang.

ATHENA® GRADE V CLASSIC FIELD

When you set out to build the world's finest field guns, there's simply no room for compromise. And, the Athena V is more than a worthy result. The beautiful oil-finished stock is “AAA” grade fancy American Claro walnut with 20 LPI diamond point checkering, set against a silver/gray nitride sideplate receiver with delicate and intricate rose and scroll engraving. A rounded pistol grip and slender forearm position the shooter's hands for better control, a livelier feel, quicker pointing and target acquisition. An Old English recoil pad, matte ventilated top rib, side vents and top lever with gold Weatherby flying “W” round out this distinctive shotgun. For complete specifications, see page 49.

ATHENA® GRADE III CLASSIC FIELD

From the moment you put this shotgun to your shoulder, you'll recognize and feel a difference as form and function come together in a truly distinctive way. The Athena Grade III features an oil-finished Claro walnut stock (“AA” grade fancy) with intricate checkering, a rounded pistol grip and slender forearm. Gives new meaning to “between-the-hands” balance. Silver/gray nitride sideplates feature rose and scroll engraving with gold inlaid pheasant and quail hunting scenes, while the smooth-opening top lever carries the famous Weatherby flying “W.” Also features heat dissipating top and side vents (no side vents on 28 gauge models) and Old English recoil pad. See page 49.

THE WEATHERBY CUSTOM SHOP can build you a shotgun (left) with multi-barrel sets (in any combination of 20 gauge, 28 gauge, and .410) which allow you to quickly change barrel gauges and lengths. As an option, multi-barrel sets can be ordered with a beautiful custom-fitted Weatherby shotgun case for the ultimate in convenience and protection.

CUSTOM-FITTED CASES (far left) can be ordered separately for all Weatherby® shotguns and rifles. Cases give your custom rifle or shotgun the ultimate protection and a beautiful presentation. Choose from canvas/leather, solid leather or distinctive leather with oak trim. Each case is handmade to order and will accommodate full length rifles, take-down and multi-barrel shotguns. An optional Cordura™ slipcover is available to provide an extra measure of protection for the exterior of the gun case. For more information on Weatherby custom cases, contact your Weatherby dealer.

“Whenever a client shows up with a Weatherby®,
I know we’re going to have a good quail hunt.”

J.D. RUBY - LAFONDA RANCH {TEXAS}

ORION®

ALL ORION® GRADE III Over/Under shotguns carry the added beauty of an intricately-engraved receiver with waterfowl/upland scene in 24K gold plate overlay. Another example of Weatherby's unmatched commitment to form, function and value.

ORION® GRADE III CLASSIC FIELD

A stunning combination of aesthetic beauty and field-proven design. The hand-selected “A” grade fancy Claro walnut stock with fineline checkering sports a rich oil finish that complements the silver/gray nitride receiver. Intricate engraving and gold plate waterfowl/upland overlay add a near custom touch. The rounded pistol grip and slender forearm afford “between-the-hands” balance for fast shouldering and pointing. Heat dissipating top vent rib and an Old English recoil pad. For complete specifications, see page 49.

ORION® GRADE II CLASSIC FIELD

The Orion Grade II shines in every way possible. We start with a rounded pistol grip. Claro walnut fancy grade stock with high lustre finish and Old English recoil pad. You get exceptional balance, a lively feel and fast target acquisition. Receivers carry a distinctive silver/gray nitride finish with engraved waterfowl/upland game scene. The blue barrels are finished with a brilliant front bead sight and matte ventilated top rib to dissipate heat when the action starts. See page 49 for complete specifications.

ORION® UPLAND

Our entry level Over/Under is far from ordinary. The high lustre Claro walnut stock (standard grade fancy) features a rounded pistol grip and slender forearm design for exceptional balance, feel and swing-through. The blued receiver and barrels are meticulously fit to the stock, while the triggerguard features the famous Weatherby flying “W” in gold. Adding to the performance of this value-packed shotgun are a brilliant front bead and matte ventilated top rib. See page 49.

ORION® SUPER SPORTING CLAYS

The SSC features a satin, oil-finished, standard grade stock with a target-style pistol grip and a Schnaubel forearm. A longer buttstock allows the stock to be cut to fit your exact length of pull requirements. The shallow receiver helps align hands for improved balance and pointability, aided by a 12mm competition grooved rib with mid-bead and side vents. The sliding top safety also includes an integrated barrel selector switch. Ported barrels reduce muzzle jump. See page 49 for specifications.

SSC TRIGGER is fully adjustable for length of pull to accommodate different finger lengths.

SSC STOCK is cast off from top to bottom of the butt (3 mm to 6 mm) to provide a better fit against the shoulder and improved balance and feel. A Pachmayr® Decelerator® sporting clays recoil pad reduces felt recoil, as well as drag during mounting.

*Price may vary by model and dealer.

LEATHER SLING – Leather-lined with brushed suede. Embossed logo. Adjustable. | \$64*

LIGHTWEIGHT MOUNTAIN SLING – 1 1/4" black nylon web with non-slip lining. Adjustable. | \$25*

WEATHERBY® CARTRIDGE CARRIER – Fits over buttstock. Velcro® closure. Adjustable. | \$20*

SPECIALY-DESIGNED LIGHTWEIGHT Vanguard® mounts by Talley (above) featuring a unique one-piece design of 7000 Series billet alloy, are available for Weatherby rifles in matte blue or silver.

WEATHERBY® ACCUBRAKE™

All Weatherby Mark V® and Vanguard® rifles are available with our special Accubrake™ option (standard on .30-378, .338-378, .378, 416 and .460 models). By adding an Accubrake, you can significantly reduce felt recoil up to 53 percent...nearly 10 percent more effective than competitive options (see chart at right).

Accubrakes are available for four different barrel diameters, with checkered thread protector, for a near perfect brake-to-barrel contour match. Because the crown is located at the end of the barrel (not the brake), the lands are protected, with no adverse effect on accuracy. Bullets exit the barrel without contact with brake, preserving accuracy while reducing recoil and muzzle jump.

ALL WEATHERBY ACCUBRAKES are constructed of stress-proof steel alloy or 420 Series stainless steel and are available in high polish or matte blue finish or matte stainless steel.

THE WEATHERBY COLLECTORS ASSOCIATION was formed with the purpose of "creating an association where many Weatherby® admirers could pool their knowledge and experience for the benefit of all..." Members receive a newsletter with buy-sell-swap opportunities and bid opportunities on limited-edition, commemorative firearms. For information, write P.O. Box 478, Pacific, MO 63069; (636) 271-3336; E-mail: wcasecretary@aol.com.

LEARN THE HISTORY and lineage of your Weatherby firearm, researched and authenticated through our company records. Each certificate is personally signed by Roy E. Weatherby, Jr. and Dean Rumbaugh, Company Historian. \$50 per serial number, (\$75 for Custom Rifles, \$100 for Special Edition or Commemorative rifles). Write to Company Historian, 1605 Commerce Way, Paso Robles, CA 93446 or visit www.weatherby.com.

ACCESSORIES

WEATHERBY SOFT SIDE GUN CASES

Features heavy 18 oz. canvas with 40 oz. soft batting and flannel liner. Brass zippers, leather tips and slings and embroidered Weatherby® logo. Choose from two styles.

SCOPED RIFLE CASE WITH ACCESSORY POCKET – Ample room for scoped rifles up to 48" long (including Accubrake™).

SCOPED RIFLE CASE | \$99*

SHOTGUN CASE WITH ACCESSORY POCKET – Will hold Over/Under or repeating shotguns up to 50" in length.

SHOTGUN CASE WITH POCKET | \$91*

WEATHERBY SACK UPS™

Protect your investment. Silicone-treated cotton blend provides the maximum in rust protection. Ribbed fabric wicks moisture away from your firearm and allows gun to breathe. Provides extra protection from marring and scratches during transport or storage.

SACK-UP | \$11*

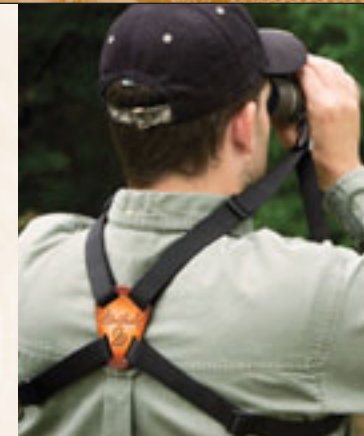

WEATHERBY MOUNTING SYSTEMS

Custom gunmakers have long sought the quality and durability of Talley mounts. Available for magnum or standard calibers (please specify when ordering), the Talley system features CNC-machined rings and bases of 2024-T4 aircraft-quality aluminum or cold-rolled carbon steel. Precision tolerances ensure a perfect fit where the ring and base contact. The double recoil shoulder base is rock solid and will withstand the repeated pounding of our largest magnum cartridges. All screws are heat-treated to prevent breakage.

For ease of use, the unique system is available in fixed or quick-detach (QD) models with a lever-lock or screw-lock release. With the QD system, a pre-sighted backup scope and ring system can be quickly installed in the event of a scope failure. Available in matte blue or high gloss in low, medium or high, 1" or 30mm. All rings and bases have been carefully finished to complement the finish of all Weatherby rifles.

OUR TALLEY-DESIGNED, Picatinny-style mounting system (right) gives you the ease and convenience of easy on/easy off mounting. The unique base and ring system lets you slide the scope forward or backward to allow for optimal eye relief.

WEATHERBY BINO SYSTEM

Our Bino-System uses your shoulders to support the weight of your binoculars, reducing neck fatigue over a long day in the field. Elastic straps allow binoculars to slide up and flex out when in use. Keeps binoculars secure and eliminates bouncing around when walking or on horseback. A quick release hook allows for fast, easy removal of optics. Fits all sizes and is fully adjustable. | \$24*

*Price may vary by model and dealer.

HARD-SIDE LUGGAGE CASES—Fitted cases hold your shotgun (take-down) or rifle and all accessories. Interior features felt-lined, foam padding with blocks and tie-downs for extra protection during transport. Extra compartments for scope, bolt, wrenches, choke tubes and accessories. 1000 Denier DuPont® Cordura® exterior with simulated leather ends, combination locking latches and circular belts. Inside features Weatherby logo embossed on simulated leather patch. Take-down shotgun case accommodates all Weatherby O/U and side-by-side shotguns to 28". | \$179* Rifle case fits all Weatherby Mark V and Vanguard rifles. | \$249*

MAGNUM ALUMINUM GUN CASES—Produced by Kalispel Case Line, these gun cases offer the ultimate in heavy-duty protection for your rifle(s) or shotgun. Each case is constructed of .080 aluminum with exclusive "Weatherby Gray" powdercoat finish. Extra strong latches, locks and handles provide for years of dependable use, while high-density foam padded interiors keep firearms from shifting inside. Available to fit single or double rifles with scopes and take-down shotguns. Single Rifle: 52" x 10" x 4 1/2" | \$340* Double Rifle: 52" x 14" x 4 1/2" | \$365* Take-down Shotgun: 38" x 12" x 4 1/2" | \$340*

WEATHERBY SUPPORTS OR IS A MEMBER OF ORGANIZATIONS DEDICATED to the conservation and management of our wildlife and habitat resources, including Ducks Unlimited, Foundation for North American Wild Sheep, Mule Deer Foundation, National Rifle Association, National Shooting Sports Foundation, National Wild Turkey Federation, Quail Unlimited, Quality Deer Management Association, Rocky Mountain Elk Foundation, Safari Club International and Wildlife Forever. Weatherby proudly sponsors the Resistol Relief Fund of the Professional Bull Riders, Inc. and the National High School Rodeo Association.
