INERTIA DRIVEN™

S T O E G E R

INERTIA DRIVEN™

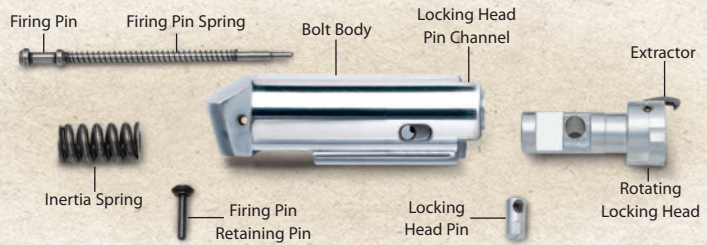

The advanced inertia technology that has driven Benelli to its position as the manufacturer of the world's most dependable shotguns is now available in all Benelli USA Brands: Benelli, Franchi and Stoeger.

The "Inertia Driven™" logo proclaims that the Model 2000 action now features the patented Benelli inertia bolt with its rotating locking head—the same system that has given Benelli shotguns their reputation for being the fastest cycling, most reliable shotguns in the world.

The revolutionary inertia bolt has fewer moving parts and eliminates the gas cylinders, O-rings and other complicated parts of traditional gas operating systems. It also keeps the gun's action cleaner, as gas and burnt powder are kept in the barrel where they belong. The Inertia Driven™ system is the finest engine to put under the hood of a semi-automatic shotgun and it's now available in the hard working Model 2000.

# Stoeger Inertia Operating System

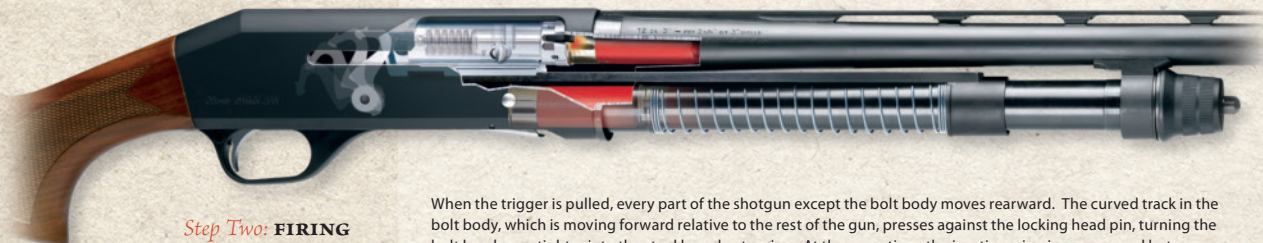

No operating system is faster or more reliable than the inertia system used in the Model 2000. A rotary bolt head gives a vault-like lockup for smooth, secure shooting...faster...cleaner... with fewer parts for ease of maintenance.

1

## Step One: CHAMBERING

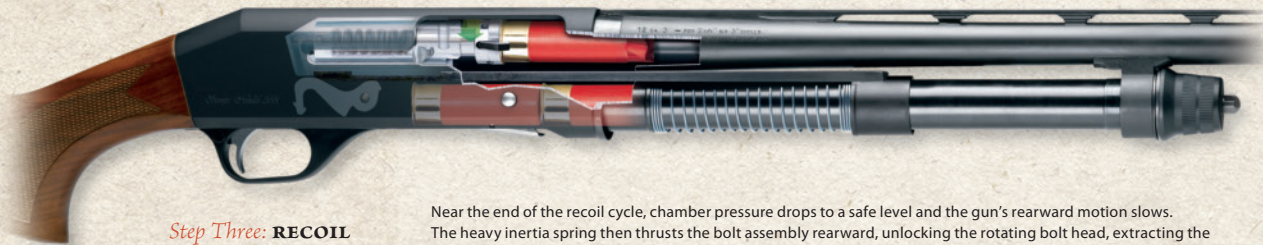

As the bolt assembly moves into battery, the locking head pin moves along a curved track in the bolt body to rotate the steel bolt head into engagement with the barrel extension. The cartridge drop lever is down, its red dot indicating the gun is cocked.

2

## Step Two: FIRING

When the trigger is pulled, every part of the shotgun except the bolt body moves rearward. The curved track in the bolt body, which is moving forward relative to the rest of the gun, presses against the locking head pin, turning the bolt head even tighter into the steel barrel extension. At the same time, the inertia spring is compressed between bolt head and body. The cartridge drop lever moves up, allowing a shell to move from the magazine to the carrier.

3

## Step Three: RECOIL

Near the end of the recoil cycle, chamber pressure drops to a safe level and the gun's rearward motion slows. The heavy inertia spring then thrusts the bolt assembly rearward, unlocking the rotating bolt head, extracting the spent shell from the chamber and pulling it against the ejector.

4

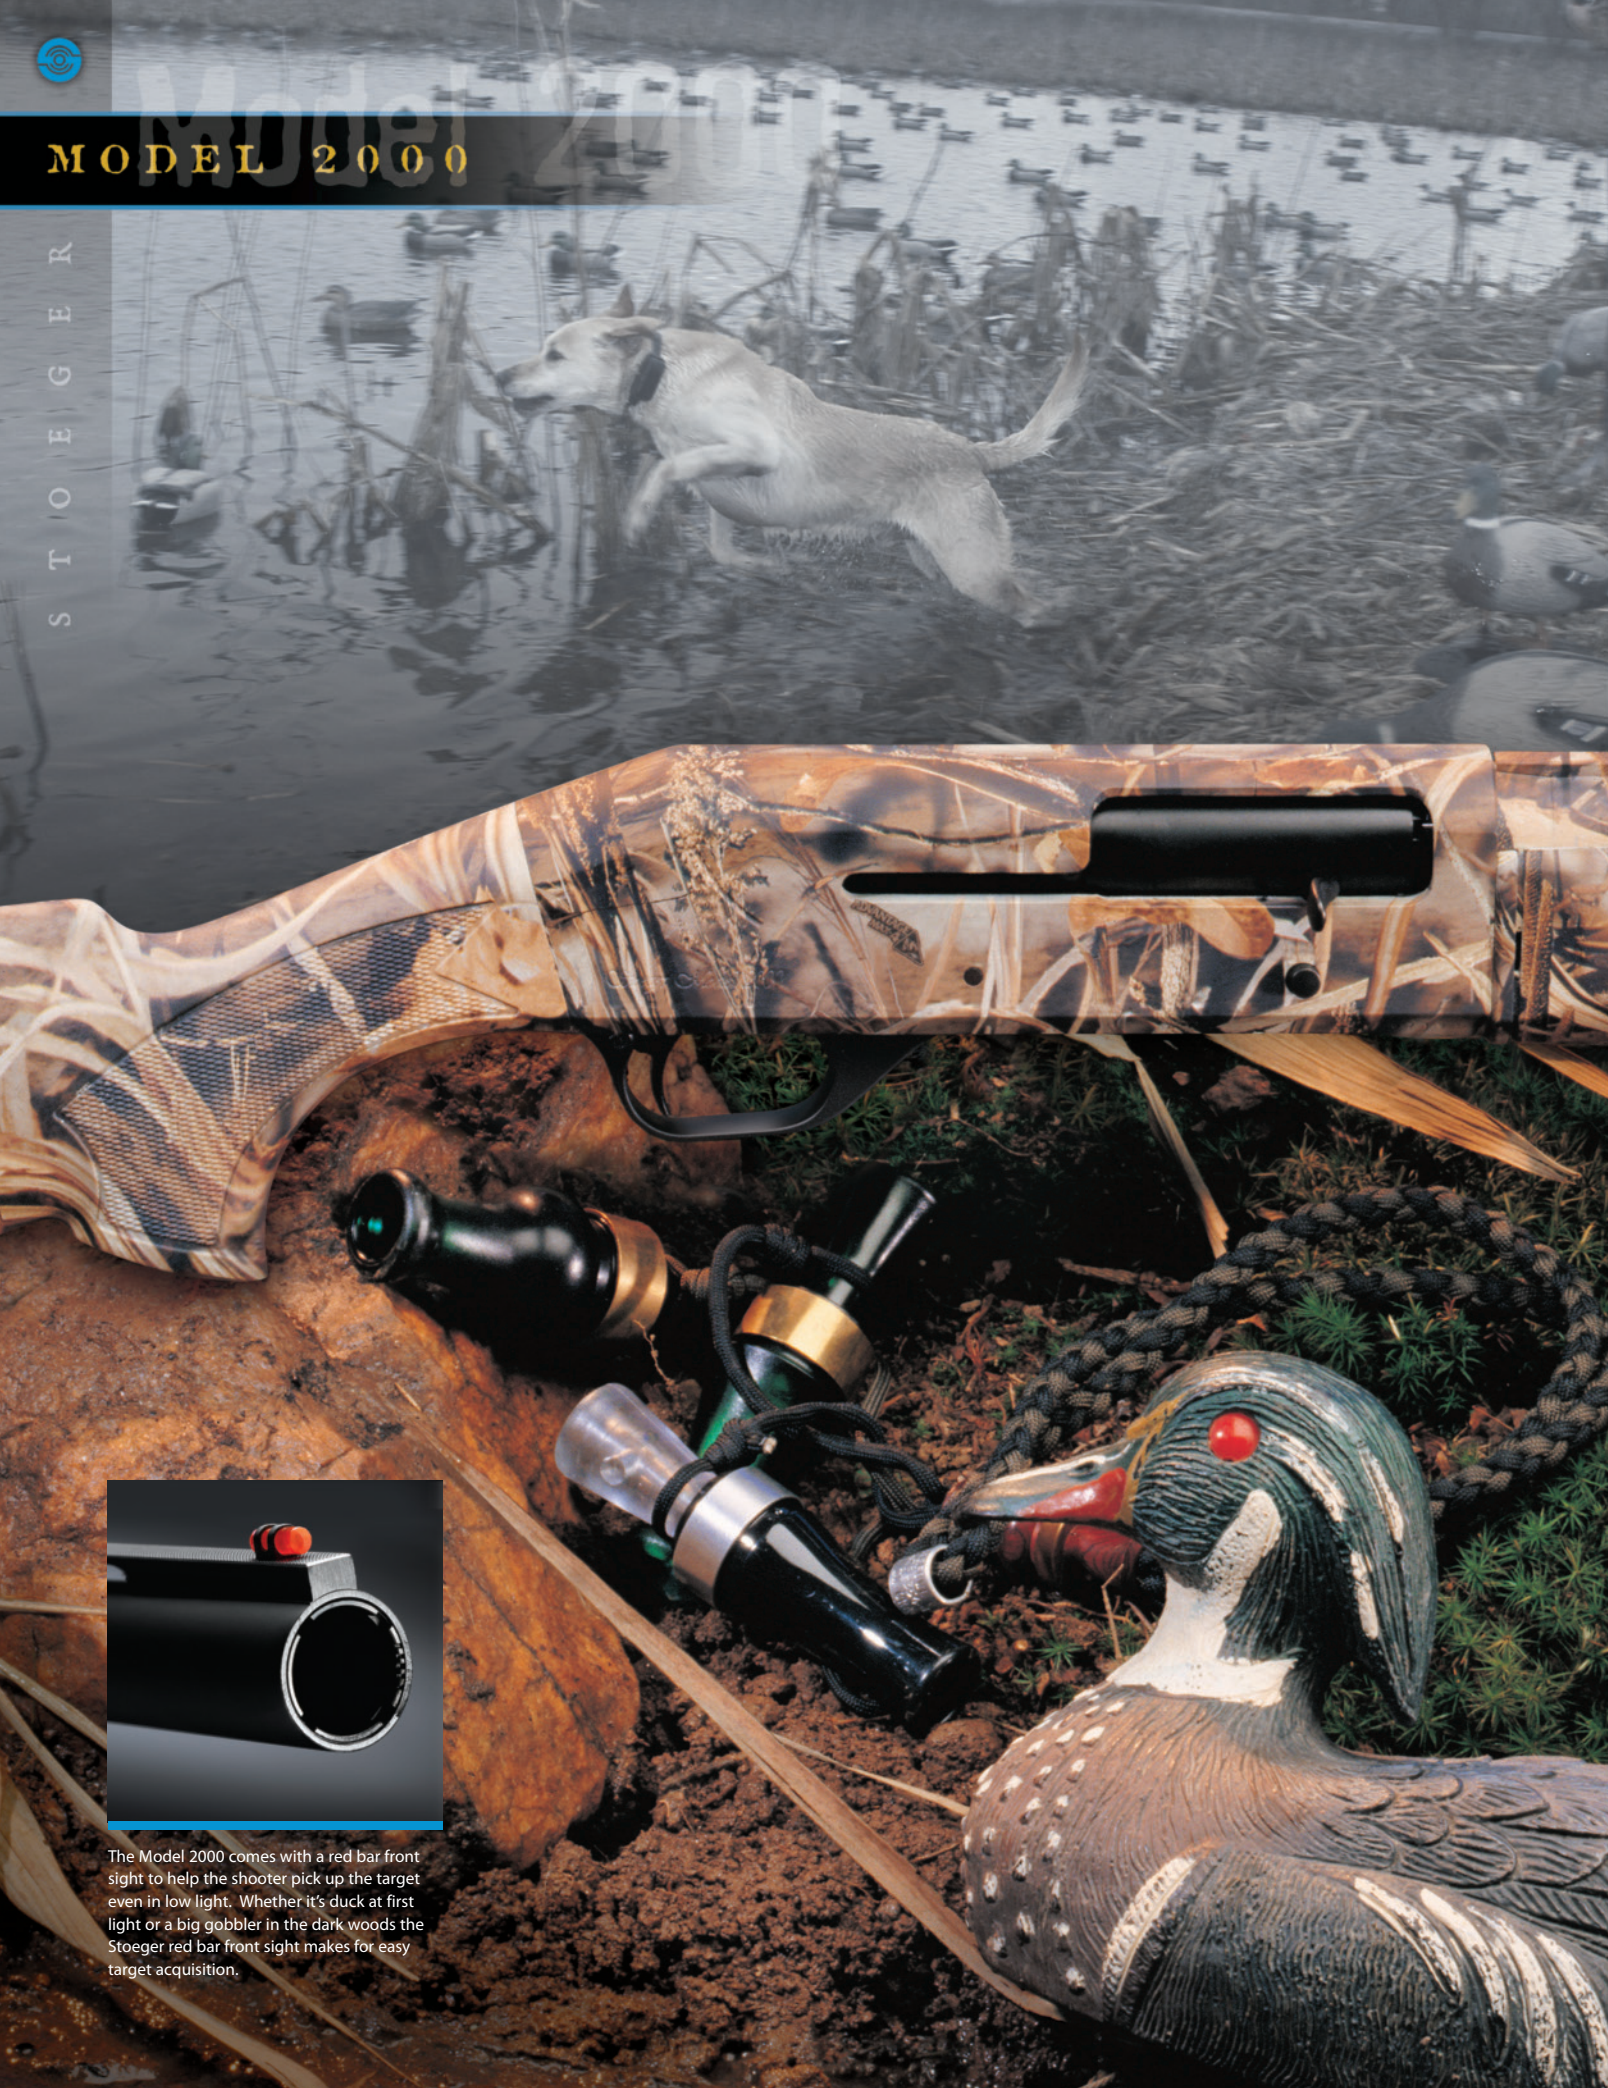

## Step Four: EJECTION

As the empty shell exits the receiver, the energy of the moving bolt assembly recocks the hammer and compresses the recoil spring on the magazine tube. The recoil spring then thrusts the bolt assembly forward lifting the oncoming shell into position and chambering a fresh cartridge. The gun is ready to fire again...in a fraction of a second!

# MODEL 2000

S T O E G E R

The Model 2000 comes with a red bar front sight to help the shooter pick up the target even in low light. Whether it's duck at first light or a big gobbler in the dark woods the Stoeger red bar front sight makes for easy target acquisition.

Get the operating system  
that's at the heart of the  
most expensive autoloaders  
... at your price

INERTIA DRIVEN™

The Stoeger Model 2000 is licensed to use Benelli's Inertia Driven™ operating system — the heart of the world's most prestigious and expensive autoloaders. Unlike common gas-operated guns whose fore-ends conceal operating rods, pistons, O-rings, valves and other moving parts, the inertia system is primarily contained inside the receiver. The results? A trimmer fore-end, better balance, more reliable operation and the ability to fire everything from light field ammunition to the heaviest waterfowl loads without adjustments. And because propellant gas isn't vented from the barrel, Inertia-Driven™ guns like the Model 2000 stay cleaner, even after hundreds of shots — even in the toughest conditions your new Model 2000 will keep on firing!

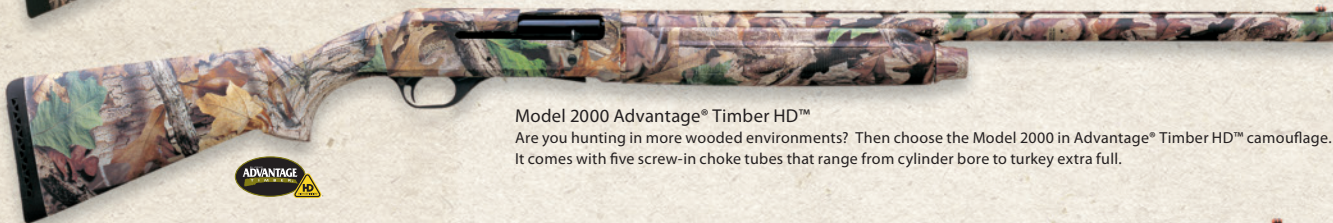

Shown here in Advantage® MAX-4™, a rugged camo finish helps the Model 2000 stand up to any waterfowling weather.

**Model 2000 Advantage® MAX-4™**

Love waterfowling? You'll blend into any wetland with the new Model 2000 in Advantage® Max-4™ camo. Like all Model 2000s, it fires 2¾" or 3" ammo, and is available in 26" or 28" barrel lengths.

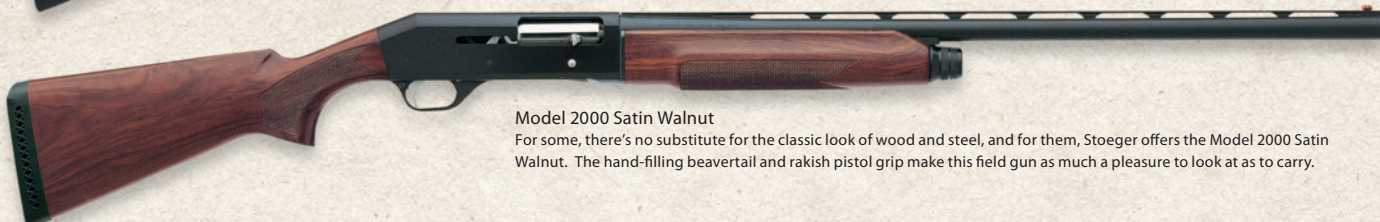

**Model 2000 Advantage® Timber HD™**

Are you hunting in more wooded environments? Then choose the Model 2000 in Advantage® Timber HD™ camouflage. It comes with five screw-in choke tubes that range from cylinder bore to turkey extra full.

**Model 2000 Synthetic**

Basic black is always in fashion, and the Model 2000 Synthetic is dressed in a weather-proof black injection-molded stock. The barrel and receiver are finished in subdued matte black for low visibility with durability.

**Model 2000 Satin Walnut**

For some, there's no substitute for the classic look of wood and steel, and for them, Stoeger offers the Model 2000 Satin Walnut. The hand-filling beavertail and rakish pistol grip make this field gun as much a pleasure to look at as to carry.

# MODEL 2000

S T O E G E R

Stoeger's new fully rifled cantilever slug barrel is a tack-driver with today's new super-fast sabot slugs. This three-shot 100 yd. group was achieved from a bench rest, with Federal® Premium Vital-Shok™, 1700 fps, 3/4-oz. Barnes Expander™ Slugs.

Reliability,  
Versatility,  
Value —  
Model 2000

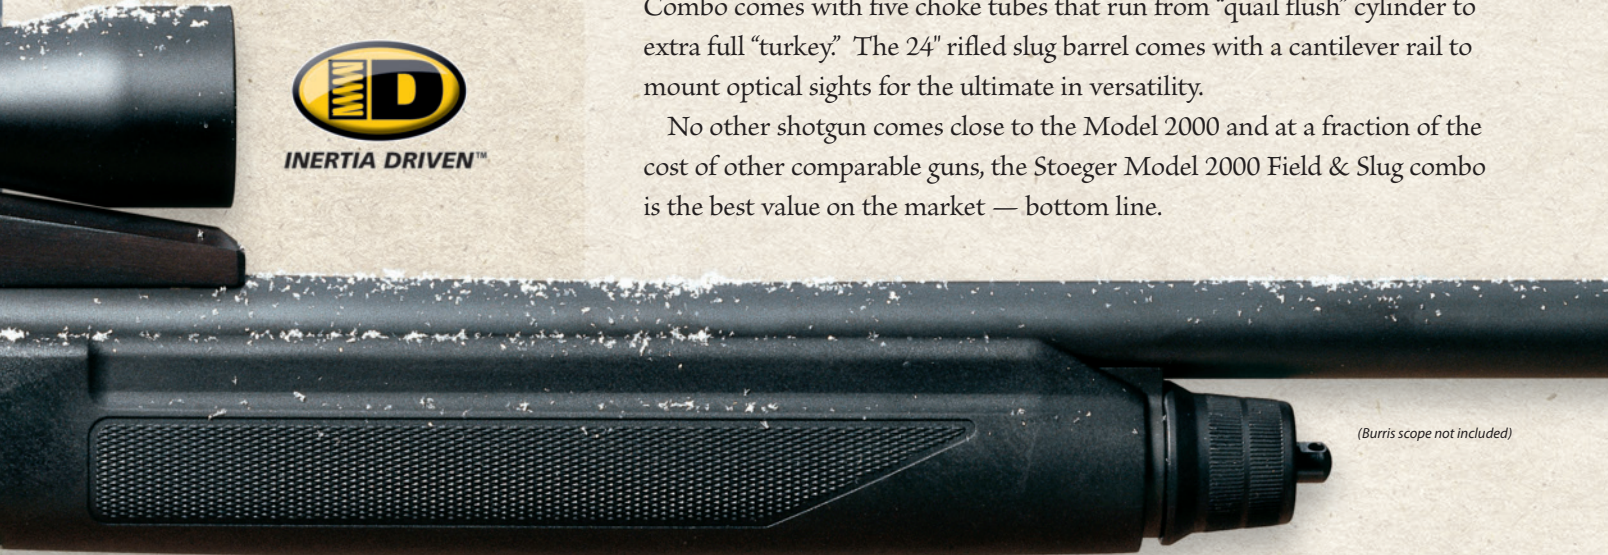

INERTIA DRIVEN™

Reliability, versatility and value are what you expect in a semi-automatic shotgun and no other semi-automatic shotgun in its price range even compares to the Model 2000. The Stoeger Model 2000 is Inertia™ Driven, with only two moving parts in the bolt: the bolt body and the rotating locking head. Simplicity ensures reliability and the Model 2000 is quickly gaining the reputation as the most reliable semi-auto on the market in its price range.

Whether it quacks, struts or ruts, with a Model 2000 Field & Slug Combo you've got the right gun for the hunt. The Model 2000's Field & Slug Combo comes with five choke tubes that run from "quail flush" cylinder to extra full "turkey." The 24" rifled slug barrel comes with a cantilever rail to mount optical sights for the ultimate in versatility.

No other shotgun comes close to the Model 2000 and at a fraction of the cost of other comparable guns, the Stoeger Model 2000 Field & Slug combo is the best value on the market — bottom line.

*(Burris scope not included)*

#### Model 2000 Field & Slug Combo

Be a multi-season hunter with a gun that will take you from doves on Labor Day to deer in January. Available in matte black synthetic or Advantage® Timber HD™. The 26" field barrel has a ventilated rib and is fitted with five choke tubes that run from cylinder to turkey extra full. The rifled slug barrel features a cantilever accessory rail for mounting optical sights.

#### Model 2000 Cantilever Slug Barrel

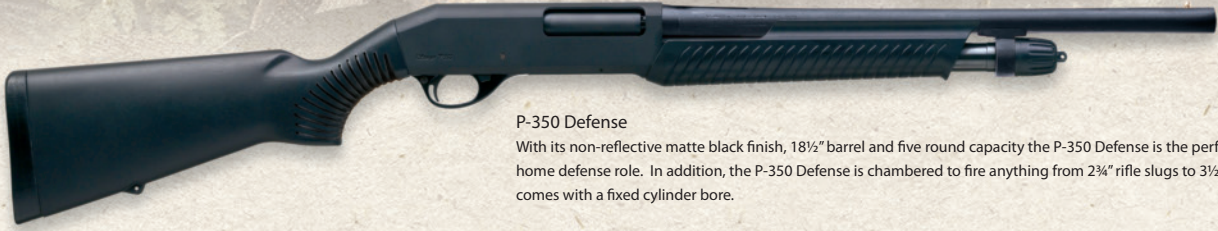

The new cantilever slug barrel is also sold separately in both matte black and Advantage® Timber HD™. The 24" barrel is fully rifled, ideal for stabilizing today's sabot slugs.

# MODEL P-350

S T O E G E R

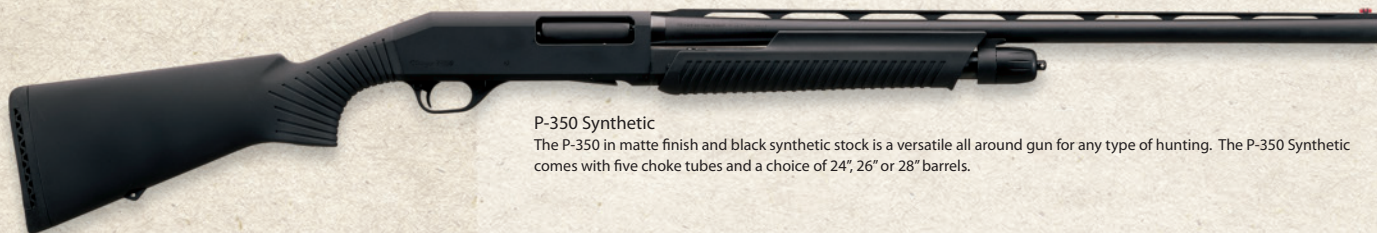

**P-350 Defense**  
With its non-reflective matte black finish, 18½" barrel and five round capacity the P-350 Defense is the perfect gun to take on the home defense role. In addition, the P-350 Defense is chambered to fire anything from 2¾" rifle slugs to 3½" 00 buck shot and comes with a fixed cylinder bore.

Bring it on: target loads,  
lead shot, steel shot,  
slugs, 2-3/4", 3" or 3-1/2"  
they're all on the  
P-350's diet

The Stoeger P-350 pump shotgun is a no-nonsense, rugged and reliable hunting gun designed to fire any and all 12-gauge ammunition from field loads to 3 1/2" magnums. Whether it's dove loads in September or steel shot in November, the Stoeger P-350 will digest them all without so much as a hiccup. And there's even an 11 ounce recoil reducer that screws right onto the tail of the stock bolt to tame the kick of the heavy magnums.

There are nine different models of the Stoeger P-350 to choose from — an 18 1/2" barreled home security model, the Max-4™ HD camo gun for waterfowlers, a Timber™ HD for turkeys or the standard black synthetic for all around. In addition, every P-350 field gun comes with five choke tubes, including an extra-full extended turkey choke, so no matter what your game the Stoeger P-350 has you covered.

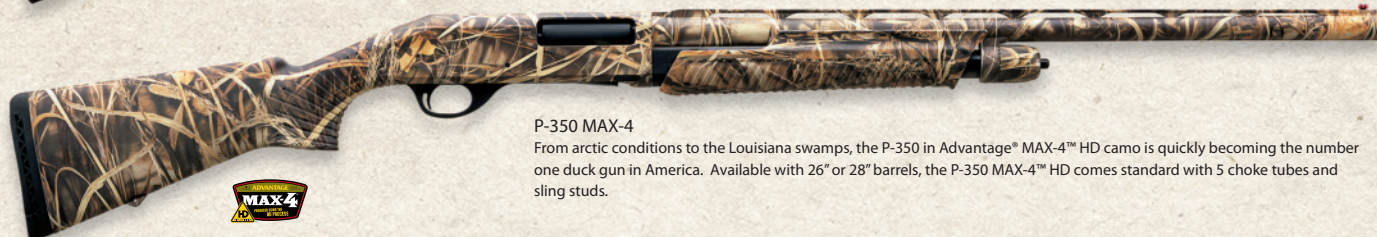

**P-350 Synthetic**

The P-350 in matte finish and black synthetic stock is a versatile all around gun for any type of hunting. The P-350 Synthetic comes with five choke tubes and a choice of 24", 26" or 28" barrels.

**P-350 Timber**

The P-350 Timber is the best turkey gun for the price on the market today. Not only does the P-350 Timber come in the Advantage® Timber HD™ camo, it comes with five screw-in choke tubes including a special extra-full extended turkey choke.

**P-350 MAX-4**

From arctic conditions to the Louisiana swamps, the P-350 in Advantage® MAX-4™ HD camo is quickly becoming the number one duck gun in America. Available with 26" or 28" barrels, the P-350 MAX-4™ HD comes standard with 5 choke tubes and sling studs.

# CONDOR COMPETITION

S T O E G E R

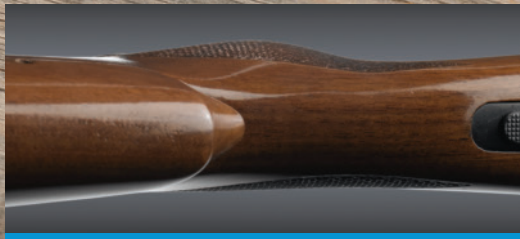

STOEGER, INC. - ACCOKEE, MARYLAND

*Stoeger Condor*

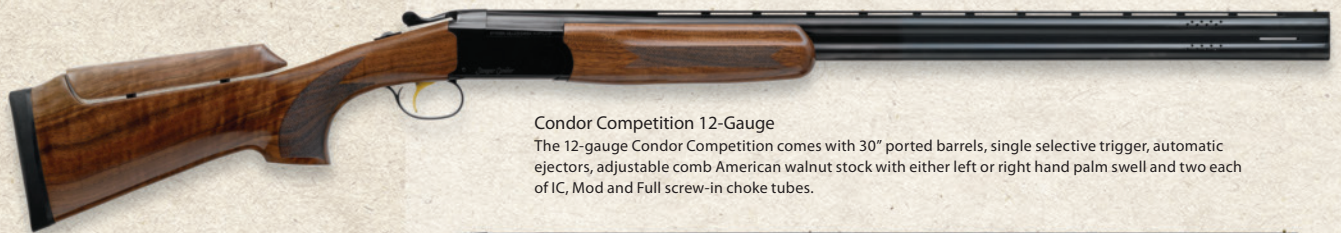

The fully adjustable comb on the Condor Competition allows you to custom fit the stock to your personal stock dimensions for whatever target game you favor. For that matter, with the Condor Competition you can shoot sporting clays in the morning and raise the comb for trap in the afternoon.

A distinctive palm swell for both left and right handed shooters gives the Condor Competition a real custom feel. With the adjustable comb set to your personal dimensions and your hand wrapped around the palm swell, you'll swear the Condor Competition was made for you.

The only thing better  
than first class is first  
class at half-price.  
The Condor Competition

The Stoeger Condor Competition over/under target gun is nicely balanced, quick handling and has the stylish lines of guns that cost three times as much or more. At home on the sporting clays field or the trap range, the Condor Competition has an adjustable comb stock, ported barrels and a palm swell in both left and right hand models in either 12- or 20-gauge. Throw in a gold single selective trigger, automatic ejectors, manual safety, center bead, fine-line checkering on a stock carved from genuine American walnut and you might just think that you have the real deal, but not yet. Take a hard look at all of the features that come on the new Condor Competition, compare them to the other target guns on the market, now look at the price... at just \$599, it's the real deal.

**Condor Competition 12-Gauge**  
The 12-gauge Condor Competition comes with 30" ported barrels, single selective trigger, automatic ejectors, adjustable comb American walnut stock with either left or right hand palm swell and two each of IC, Mod and Full screw-in choke tubes.

**Condor Competition 20-Gauge**  
The 20-gauge Condor Competition comes standard with all of the features of the 12-gauge Condor Competition including 30" ported barrels.

Accessory choke tubes (both flush and extended) for 12- and 20-gauges are available in Cyl, IC, Mod, IM and Full, for Condor and Uplander models (screw-in choke versions only).

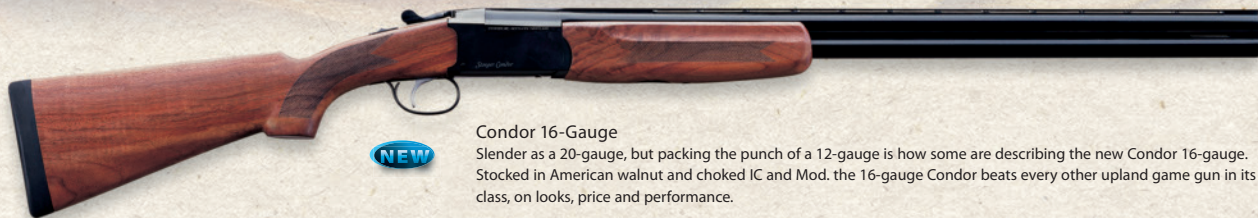

Ported barrels come standard on the Condor Competition. Barrel porting lets gas escape through the top of the barrel and helps keep barrel climb to a minimum for a quick second shot.

# CONDOR

S T O E G E R

**NEW**

### Condor 16-Gauge

Slender as a 20-gauge, but packing the punch of a 12-gauge is how some are describing the new Condor 16-gauge. Stocked in American walnut and choked IC and Mod. the 16-gauge Condor beats every other upland game gun in its class, on looks, price and performance.

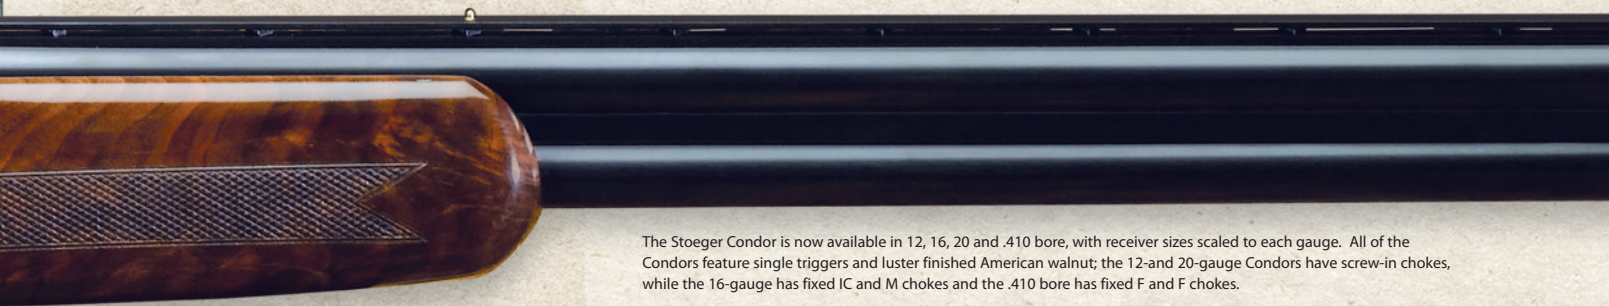

### Condor

The Stoeger Condor offers screw-in choke tubes (IC and M) with 26" and 28" barrels. Available in (12, 16, 20 and .410 bore frames scaled to gauge), the Condor offers the flexibility to master any shooting situation.

High style, high value  
and a high five  
(when you see the price)  
...The Stoeger Condor

From the standard Condor field gun to the elegant Condor Supreme, there's been something for everyone in the Stoeger Condor line... well, almost. Now, with the new Condor .410 and 20-gauge Youth models and the new 16-gauge, young shooters and ladies can get into the action. Of course the Condor .410 with its petite and slender barrels and action also comes in standard stock dimensions for the quail hunting aficionado or skeet shooter looking for a new challenge. The Condor also comes in 12/20-gauge combo sets for the ultimate in versatility. Whether it's ducks with a 12-gauge or quail with a 20-gauge, you can now shoot the same gun with whichever gauge the sport calls for.

With screw-in chokes, ventilated ribs, single trigger, ejectors (specified models), all four gauges and American walnut there's now a Stoeger Condor for everyone, at a price that everyone can afford.

The Stoeger Condor is now available in 12, 16, 20 and .410 bore, with receiver sizes scaled to each gauge. All of the Condors feature single triggers and luster finished American walnut; the 12-and 20-gauge Condors have screw-in chokes, while the 16-gauge has fixed IC and M chokes and the .410 bore has fixed F and F chokes.

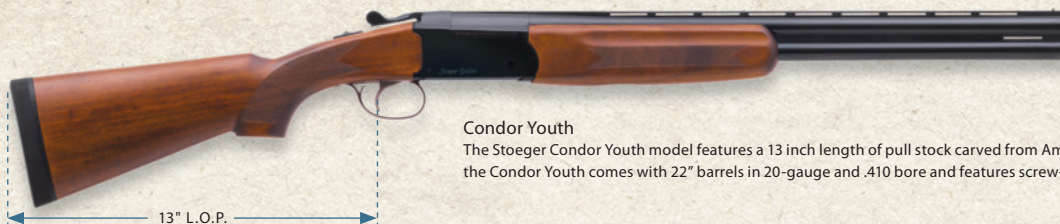

**Condor Supreme**

The Supreme features a cut-checked American walnut stock with a soft rubber recoil pad and high-luster blueing on the barrels. The single selective trigger and automatic ejectors show that the Supreme is perfectly suited for competition or hunting.

**Condor Combo**

The Condor Combo features two barrel sets (12-and 20-gauge); each gauge is fitted to the same receiver. Both the 28" barrel, 12-gauge and the 26" barrel, 20-gauge come with bead sights and screw-in IC and M chokes. Available in two grades and starting at only \$550 MSRP, you won't find a better value in over-under shotguns!

**Condor Youth**

The Stoeger Condor Youth model features a 13 inch length of pull stock carved from American walnut. For proper balance, the Condor Youth comes with 22" barrels in 20-gauge and .410 bore and features screw-in chokes (in 20-gauge only).

13" L.O.P.

# UPLANDER

S T O E G E R

The receiver is precision machined to exacting tolerances to ensure that the Uplander will hold up year-after-year no matter how much it's used. The Uplander is even fitted with a removable firing pin bushing to protect the receiver from firing pin wear, a feature found on the world's best side-by-sides.

### Uplander

The Stoeger Uplander carries on the tradition of sturdy double-trigger arms the hunter can rely on. The 12-gauge, 20-gauge, and .410 all handle 3" ammunition; all barrels are proofed for steel shot. The 12- and 20-gauge models are available with screw-in interchangeable choke tubes.

Traditional design,  
timeless value--  
The Stoeger  
Uplander

The side-by-side shotgun was invented in England before the first shotgun shell. In recent years this ageless design has gained in popularity. The old English gunmakers that are still in business, charge thousands of dollars for their double-barrels and make their customers wait for years to get one. If you don't like to wait and don't want to spend more on your shotgun than your house, the Stoeger Uplander just might be the gun for you.

You can have your Stoeger Uplander plain or fancy, with traditional double or single triggers. Stocked with American walnut, the Uplander can be had in pistol grip or straight English stock, in two different grades from field grade up to the eye-catching Uplander Supreme. There is even a youth model. For the connoisseur, there are also combo sets in 12-/20-gauge and 20-/28-gauge.

Whether kicking up rabbits in the wood lot or bagging woodcock in New England, there's an Uplander for your style of shooting and your wallet.

**Uplander Supreme**

The Uplander Supreme is the ultimate refinement of the Uplander, with a single gold trigger, interchangeable choke tubes and a cut-checked A-grade American walnut stock. It offers an exciting combination of features and low price.

**Uplander Combo**

The new Uplander Combo side-by-side shotguns are now available as two barrel sets. The 12-/20-gauge two barrel set has 28" barrels in both gauges, while the 20-/28-gauge set has 28" barrels for the 20-gauge and 26" barrels for the 28-gauge.

**Uplander Short Stock**

With a mere 13" length-of-pull, the Short Stock Uplander is an excellent choice for women or junior shooters. The Short Stock is offered in 20-gauge with 22" improved cylinder and modified barrels, and in .410 with 22" modified and full barrels. The American walnut hardwood stock is fitted with a soft rubber recoil pad.

# COACH GUN SUPREME

S  
T  
O  
E  
G  
E  
R

12- and 20-gauge Coach Guns come with improved cylinder and modified choke tubes and their wrench. The .410 models have fixed improved cylinder and modified chokes.

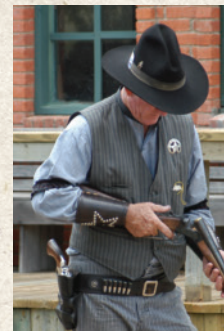

An attractive new trigger guard gives the Coach Gun Supreme a more refined appearance, with smooth curves that complement the double triggers. (This new trigger guard is now standard on all Stoeger over-under and side-by-side shotguns.)

## Dressed up for a night out in Tombstone— Coach Gun Supreme

If your six-guns have ivory grips and your Model 73 sports engraving, you need a scattergun that makes a statement—you need a Coach Gun Supreme. All three models are stocked with figured American walnut, fitted with a soft rubber recoil pad and feature extensive cut checkering in a border point pattern. For metal finish, you have a choice of high luster blue, blued barrels on a stainless receiver or polished nickel, but no matter which one you choose, you'll have a real eye-catcher. Although the Coach Gun Supreme was designed with Cowboy Action Shooters in mind, the screw-in chokes make it a great handling field gun as well.

### Coach Gun Supreme Blue

The traditionalist will specify the Coach Gun Supreme Blue, with classic blued receiver and barrels. The recoil pad, pistol grip and husky beavertail fore-end make for comfortable firing in the longest match.

### Coach Gun Supreme Blue with Stainless Receiver

A stainless frame gives this model both enhanced corrosion resistance and attractive contrast. Improved cylinder and modified screw-in choke tubes are supplied with 12- and 20-gauge models; you can order optional tubes in cylinder bore, improved modified and full choke.

### Coach Gun Supreme Polished Nickel

Nickel plating was all the rage in frontier times, and you can specify full-coverage polished nickel plating on your Coach Gun Supreme. You'll stand out on any range with this striking shotgun!

## Double barreled fun— Stoeger Coach Gun

The sawed-off shotgun, romanticized in hundreds of Hollywood Westerns as the stagecoach guard's weapon of choice, is an integral part of the fast growing sport of Cowboy Action Shooting. Competitors are required to shoot a six-gun, rifle and shotgun in every match, so the demand for a value priced, short-barreled scattergun led Stoeger to develop the Coach Gun. Available in blue, satin nickel or polished nickel metal finish and stocked with American walnut, the Coach Gun is as handsome as it is affordable. The short-barreled Coach Gun also makes a potent home defense gun and is chambered in 12-gauge 3", 20-gauge 3", and .410 bore 3". So whether you're headed for a competition shootout at a modern day OK Corral or just want a little security to help you sleep better, the Stoeger Coach Gun is the right shotgun at the right price.

**Coach Gun**  
With light loads, the Coach Gun is at home on the range. Stoke it with 12- or 20-gauge 3" magnum ammunition and it's a potent force for personal defense.

**Nickel Coach Gun**  
For those who prefer a distinctive appearance, the Coach Gun is available with nickel-plated frame and barrels and a black finished hardwood stock.

**Silverado Coach Gun**  
Luster finished American walnut compliments a tasteful matte nickel metal treatment on the Silverado Coach Gun. It's available in 12-gauge, 20-gauge and .410 bore versions, all with 3" chambers. This is the perfect combination of style and performance.

**Silverado Coach Gun with English Stock**  
Like the classic look of a straight-gripped stock? Select this Silverado variant, available in 12- and 20-gauge models.
