ON THE COVER – Taylor Franklin (California) proudly shows off his 7x6 trophy mule deer and Weatherby Mark V Stainless in .270 Wby. Mag. The impressive trophy measured over 34 1/2" and made the SCI record book for both typical and non-typical mule deer. Taylor shot his deer on a Junior Hunt near Bishop, California.

“Those are the principles upon which the Weatherby name has been built over the past 60 years.”

ED WEATHERBY

WELCOME TO THE WEATHERBY CATALOG

If there is one thing I've learned over the years, it is that the shooting sports are like so many other "enthusiast" activities. Remaining content with the status quo and resting on your laurels is ultimately a recipe for failure. With that in mind, we are proud to present our 2006 lineup of products—familiar favorites as well as exciting new products that meet the changing tastes and demands of today's shooter; all of which represent the expected performance that has come to define the Weatherby name.

ED WEATHERBY PRESENTS shotgun enthusiast General H. Norman Schwartzkopf a custom Weatherby 20 gauge Athena® shotgun at the 1993 Weatherby Big Game Trophy Award dinner.

THE HISTORY OF WEATHERBY

began in the mid-1940s when a young cartridge "wildcatter" named Roy Weatherby set out to change the world of firearm performance. Contrary to then-popular thinking (heavy bullets pushed at slow speeds), Roy believed that lightweight bullets traveling at super high speeds provided the best combination for one-shot kills. Based

upon that philosophy, he spent the next decade developing the high-powered Weatherby® Magnum cartridges for which the company is known today (.224, .240, .257, .270, 7mm, .300, .30-378, .340, .338-378, .375, .378, .416 and .460). Throughout that period, Roy was also producing or re-chambering rifles designed specifically to accommodate his super-charged ammunition. At that time, he was

producing his rifles on FN Mauser and French Brevex Magnum Mauser actions. However in 1957, Roy would again catch the attention of the shooting and hunting world with a proprietary action that is today recognized around the world as the Mark V®.

ROY WEATHERBY was also one of the pioneers of using camouflage to get closer to game (shown here with a leopard taken on African safari in 1948).

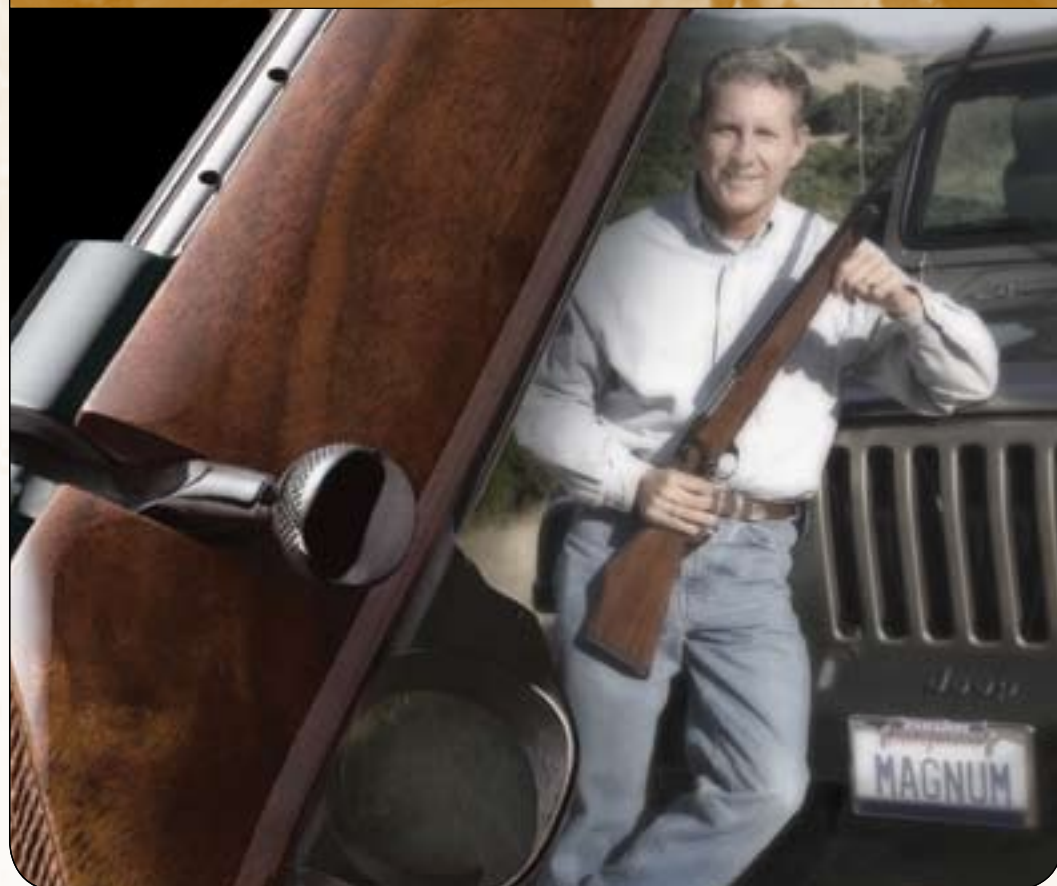

FRANK PIANO - NEW YORK

KEVIN JOHNSON - MICHIGAN

WEATHERBY®

Centerfire enthusiasts will appreciate the exhibition grade wood of the Mark V® Ultramark, while the addition of the Vanguard Deluxe gives wood stock fans guaranteed accuracy at a most attractive price. For something truly unique, we now offer the Mark V Compact Firing Platform (CFP), a varmint/whitetail firearm that takes its place between the long rifle and the handgun. And with all Weatherby rifles, we continue to pursue improvements and refinements that push our guaranteed accuracy to even tighter levels of control.

On the shotgun side, the stunning look of the Athena® D'Italia Deluxe is certain to capture the attention of the most discriminating side-by-side enthusiast. And, we've added a new rounded pistol grip/semi-beavertail stock option to our Athena D'Italia double gun lineup.

Improving existing products. Aggressively developing new ideas. Promising more performance, quality and value for your hard-earned dollar. Those are the principles upon which the Weatherby name has been built over the past 60 years. They remain so today. Enjoy your time with our catalog and may God bless your time in the field. Good shooting.

The foundation for the Mark V was the need for a stronger, safer action, able to withstand tremendous pressure, and the possibility of blown primers and ruptured case heads (due to the unpredictability of early handloaded and wildcat cartridges). After nearly a half century of proven performance, the Mark V continues to be known as "the world's strongest bolt action."

In 1970, Roy once again showed his entrepreneurial spirit when he introduced the Weatherby Vanguard® action, borrowing many of the characteristics and design elements of the Mark V, but based on a two locking lug Mauser-style action. Over the years, the Vanguard has steadily gained in popularity for its superior performance, guaranteed accuracy and exceptional value.

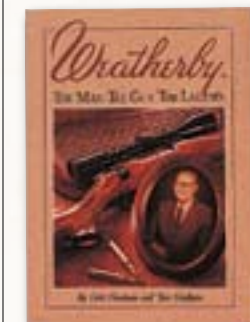

The Weatherby lineage continued in 1983 when Roy's son, Ed Weatherby, assumed the leadership mantle of the company. Under Ed's guidance, the company has seen growth and expansion both in Mark V and Vanguard rifle offerings, as well as a full line of Over/Under, Side-by-Side and Semi-Automatic shotguns, Weatherby Performance Wool hunting clothing, and shooting and hunting accessories.

The innovation and pacesetter performance associated with the Weatherby name spans more than 60 years. Yet, while our place in history is firmly established, it is the prospects for the future that shine brightest of all.

ROY WEATHERBY was famous for demonstrating the power of his magnum cartridges in dramatic fashion. Here he examines the effects of shooting through the Los Angeles phone book.

SEND US YOUR FAVORITE photo with your Weatherby®! If you have a photo of yourself, or a member of your family with a Weatherby rifle or shotgun, we'd love to see it. Send a photo print (or high resolution digital file) and a few words about your hunt, and we may use it in a future Weatherby catalog or on the Weatherby web site. Sorry, photos cannot be returned.

"WEATHERBY. THE MAN. THE GUN. THE LEGEND". This 290-page biography, written by Grits and Tom Gresham is a fascinating look at the man who began the Weatherby legend and mystique. Proceeds benefit Weatherby Foundation International. See your Weatherby dealer or visit www.weatherby.com. | \$30

“...guaranteed to shoot a 1 1/2" 3-shot group at 100 yards from a cold barrel.”

{VANGUARD ACCURACY GUARANTEE}

INTRODUCED in 1970, the Vanguard® action first served as an economical alternative to the Mark V®. Over the years however, the Vanguard has continued to gain in popularity among all hunters, who simply can no longer ignore the exceptional combination of value, wide range of features and guaranteed accuracy. Based on a two-lug design, the Vanguard offers many of the same design elements and superior materials as the Mark V. The result is a highly accurate and dependable rifle that delivers year after year. With models starting at just a few hundred dollars, Vanguard is perhaps the finest rifle value on the market today. And, it is the only production rifle that comes with a factory-shot target as your assurance of guaranteed accuracy.

A KEY FEATURE OF THE VANGUARD® is its massive M16-style claw extractor (left), ensuring reliable and positive extraction. Extracts and ejects the fired case without the necessity of full bolt retraction.

VANGUARD®

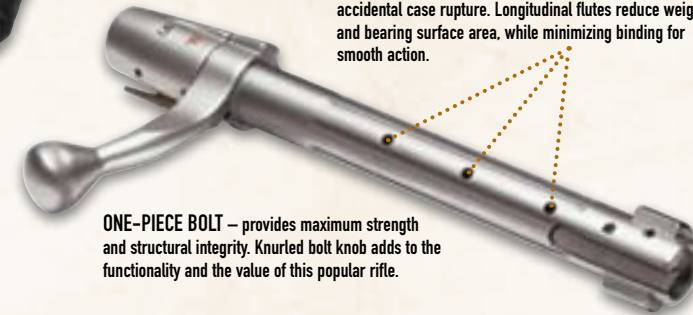

FULLY ENCLOSED BOLT SLEEVE – (left) completely enshrouds the rear of the action to protect high pressure gases and brass particles in the event of a case rupture. Also features an easy-to-see cocking indicator for an extra measure of safety in the field.

3 RINGS OF STEEL – The cartridge case head is encased in three rings of steel for greater safety. The recessed bolt face is surrounded by the barrel, which is surrounded by the forged and machined steel receiver, creating an extra measure of strength and structural integrity.

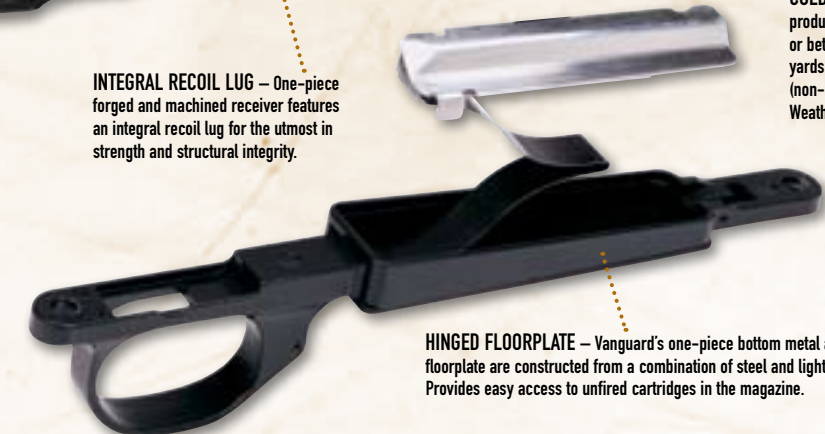

FULLY ADJUSTABLE TRIGGER – Can be precisely adjusted for let-off weight to match individual shooter preferences (within factory pre-set minimums). Sear engagement adjustments must be performed by a Weatherby Service Center or a qualified gunsmith.

FLUTED BOLT BODY – Features three gas ports to allow high-pressure gases to escape laterally in the event of an accidental case rupture. Longitudinal flutes reduce weight and bearing surface area, while minimizing binding for smooth action.

ONE-PIECE BOLT – provides maximum strength and structural integrity. Knurled bolt knob adds to the functionality and the value of this popular rifle.

INTEGRAL RECOIL LUG – One-piece forged and machined receiver features an integral recoil lug for the utmost in strength and structural integrity.

HINGED FLOORPLATE – Vanguard's one-piece bottom metal and hinged floorplate are constructed from a combination of steel and lightweight alloy. Provides easy access to unfired cartridges in the magazine.

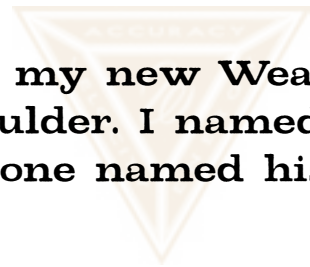

COLD HAMMER forged barrel produces a guaranteed 1 1/2" or better 3-shot group at 100 yards when used with premium (non-Weatherby calibers) or Weatherby factory ammunition.

THE WEATHERBY VANGUARD stock is an injection-molded composite that delivers superior accuracy and durability. The Monte Carlo design with raised comb is cast off to allow for quicker eye-to-scope alignment and faster target acquisition, and to reduce felt recoil. The forearm is dual tapered (back and upward) to deliver better grip and control under recoil, and is flat-bottomed to provide a steady, stable rest. Unlike most composite stocks that utilize a hard rifle pad, the Vanguard pad features a lower density material that greatly increases recoil absorption.

“On my first shot with my new Weatherby®, I nailed this pig right behind the shoulder. I named my rifle “Pig-Licker” just like Daniel Boone named his rifle “Tick-Licker.”

GARRETT ROTH (CALIFORNIA)

SYNTHETIC/STAINLESS

ALL VANGUARD® rifles are guaranteed to shoot a 1 1/2" or better 3-shot group at 100 yards from a cold barrel when used with premium (non-Weatherby calibers) or Weatherby factory ammunition.

VANGUARD® SYNTHETIC

This is perhaps the best rifle value on the market today. The Vanguard Synthetic will outperform rifles costing hundreds more and is guaranteed accurate. All metalwork is matte black, with a 24" barreled action bed to a Monte Carlo, injection-molded composite stock. An adjustable trigger lets you custom tune the rifle to your personal taste (within factory pre-set limits). Comes with a factory-shot target to assure guaranteed accuracy. See page 26 for complete specifications.

VANGUARD® STAINLESS

At 7 1/2 lbs., the Vanguard Stainless is the ideal choice for exceptional value, rugged durability and all-weather performance. Stainless steel is bead blasted to a matte finish to eliminate game-spooking glare while fighting off the effects of rain and snow. Bed to a Monte Carlo, injection-molded composite stock. Comes with factory-shot target and accuracy guarantee. For complete specifications, see page 26.

VANGUARD® SYNTHETIC OR STAINLESS COMBINATION PACKAGE

Add a deer tag and our new combination package offers everything a serious hunter needs to get started. The package begins with our popular Vanguard Synthetic or Stainless rifle—proven performance from the get-go and guaranteed accurate with a factory-shot target. Then, we add a Bushnell® Banner 3-9x40mm riflescope with phase-coated optics and 1/4-minute click adjustments. You get rugged dependability and a bright, clear view in all

light conditions. Anchoring the scope to the rifle is a set of Leupold® Rifleman rings and bases, renowned for their rock-solid durability. Each rifle/scope package is then individually mounted and bore-sighted at the Weatherby Custom Shop. And to finish off this exceptional value you get an Uncle Mikes® nylon sling and a Plano® PRO-MAX™ injection-molded gun case. The Vanguard Combination Package—more value, more performance and more reasons to choose a Weatherby. For complete specifications, see page 26.

"I have killed 14 Boone & Crockett antelope bucks, all with the same .300 Weatherby® Magnum. This buck was at 479 yards – my longest shot ever."

LEN GULDMAN, PRESIDENT, FIRING-LINE {AURORA, COLORADO}

WOOD/COMPACT-YOUTH

NEW! VANGUARD® DELUXE

What do you get when you combine a raised comb, Monte Carlo walnut stock with maplewood spacers and rosewood forend, polished action, high gloss blued metalwork and guaranteed accuracy with a factory-shot target in every box? The answer is the new Vanguard Deluxe. Nearly identical in appearance to the Mark V® Deluxe, the Vanguard Deluxe offers outstanding performance in a remarkably affordable package. For specifications, see page 26.

VANGUARD® SPORTER

The performance and value of the popular Vanguard is now available for wood stock enthusiasts. Features a handsome walnut stock with satin urethane finish, fineline diamond point checkering and a contrasting rosewood forend tip. All metalwork is matte blued to a low lustre finish. Comes with a factory-shot target that is your assurance of guaranteed accuracy (1 1/2" 3-shot group at 100 yards from a cold barrel). For complete specifications, see page 26.

VANGUARD® SPORTER SS

For a truly distinctive look in a value-packed rifle, we proudly offer the Vanguard Sporter SS. It features a walnut stock with satin urethane finish, fineline diamond point checkering and a contrasting rosewood forend tip, with stainless steel barrel and receiver. All metalwork is bead blasted to a matte finish. Comes with a factory-shot target in box. See page 26 for complete specifications.

VANGUARD® COMPACT

Here is the ideal rifle for a young or female hunter. The Vanguard Compact features our lighter than standard Vanguard short action (20" #1 contour barrel), bed to a scaled-down hardwood stock (finished in non-reflective matte black) with shorter 12 1/2" length of pull. The Compact also includes a full size injection-molded composite stock (\$139 retail value) that lets the Vanguard grow with the shooter. For complete specifications, see page 27.

VANGUARDS feature a knurled bolt knob for a sure grip in all conditions. Trigger is adjustable for let-off weight to match individual preferences (within factory pre-set minimums). Sear engagement adjustments must be performed by a Weatherby Service Center or qualified gunsmith.

*Price may vary by model and dealer.

"I've been fortunate to have taken many Boone & Crockett trophies, all with Weatherby® rifles. I would not consider using any other rifle."

WILLIAM FARLEY, JR. {FARLEY'S INTERNATIONAL ADVENTURES}

SUB-MOA/VARMINT

WHAT IS SUB-MOA?

In ballistics terms, a Minute of Angle (MOA) is the arc formed by an angle of one minute (1/60th of a degree) at any range. At 100 yards, MOA is 1.047". Selected Weatherby rifles are guaranteed to shoot a 3-shot group of .99" or less at 100 yards (SUB-MOA) when used with specified Weatherby factory or premium grade ammunition. Each SUB-MOA rifle is test-fired, hand selected and comes with a factory-shot target. Put simply, a Weatherby SUB-MOA is the most accurate production rifle you can buy, guaranteed.

VANGUARD® SUB-MOA

Available in matte black or stainless, the Vanguard SUB-MOA ups the ante on value and accurate performance. Guaranteed to shoot a 3-shot group of .99" or less at 100 yards when used with specified Weatherby factory or premium grade ammunition. It features a pillar-bedded Fiberguard composite stock with legendary Monte Carlo, raised cheekpiece and non-slip black or grey spiderwebbing. Adjustable trigger and Pachmayr® Decelerator® pad. See page 27 for complete specifications.

NEW! VANGUARD® SUB-MOA VARMINT

Long shots at small targets are just what the new SUB-MOA Varmint was built for. Guaranteed to shoot a 3-shot group of .99" or less when used with specified Weatherby factory or premium (non-Weatherby calibers) ammunition. The hand laminated, tan Monte Carlo composite stock features black spiderwebbing and a CNC-machined aluminum bedding plate for a solid, stable platform for the barreled action. A 22" #3 contour barrel with recessed target crown enhances accuracy in a portable package. For complete specifications, see page 27.

NEW! VANGUARD® VARMINT SPECIAL

Our new Varmint Special will catch the eye of the most value-conscious varmint hunting enthusiast. Features a tan, injection-molded Monte Carlo synthetic stock with distinctive non-slip black spiderwebbing. A 22" #3 contour barrel (.740 muzzle dia.) is bead blasted to a matte finish and features a recessed target crown for consistent accuracy and protection of the rifling. Guaranteed accurate (1 1/2" 3-shot group) and comes with a factory-shot target in every box. For specifications, see page 27.

EACH SUB-MOA RIFLE is test-fired, hand selected, and shipped with a factory-shot target and written guarantee to shoot a 3-shot group of less than .99" at 100 yards, when used with specified Weatherby factory or premium ammunition.

“I shoot Weatherby® because I don’t have time for equipment that may not be up to the task...gives me the edge I need.”

MARTIN KLITZE {KANSAS}

GIVE YOUR VANGUARD a custom touch with stock and metal upgrades and a host of other personalized embellishments available from the Weatherby Custom Shop. Start your Vanguard Custom by choosing a pillar-bedded Fiberguard™, composite Accuguard™ (with CNC-machined aluminum bedding plate) or upgraded wood stock. Then, add performance-based options such as a stainless steel barreled action with longitudinal flutes (to dissipate heat and reduce weight), accuracy-enhancing recessed field, 11-degree parabolic target crowns or recoil-reducing Accubrake™ (page 13). For complete information on how to customize your Vanguard, contact the Weatherby Custom Shop at (805) 466-1767.

ACCUBRAKE PERFORMANCE

.300 Wby.	180	Partition	8 3/4	41.39	20.69	.30-06 Springfield

CUSTOMIZE YOUR VANGUARD by adding a recoil-reducing Accubrake. Cuts felt recoil by up to 50% without any adverse effects on accuracy (see chart at left). Constructed of stress proof steel alloy or 420 Series stainless steel in high polish, matte blue or matte stainless steel finishes.

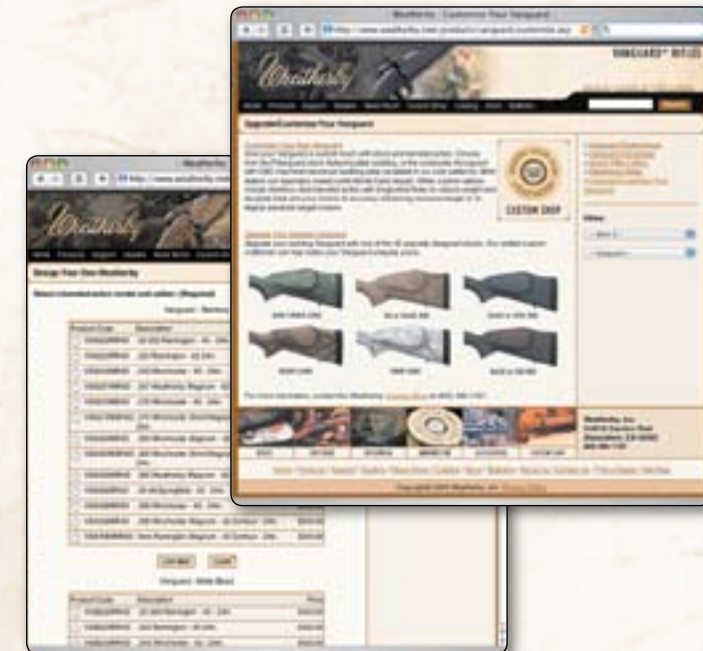

FOR A TRULY UNIQUE LOOK, the Weatherby Custom Shop offers a wood stock upgrade for your Vanguard® rifle. The hand-selected, Claro walnut stock features a rosewood forend and grip cap with maplewood spacers and Weatherby signature diamond inlay.

CUSTOM VANGUARD®

UPGRADE THE LOOK AND PERFORMANCE of your Vanguard® to include longitudinal flutes on the barreled action (matte black or stainless steel). The flutes not only reduce weight, but also actively dissipate heat to help preserve critical accuracy.

DESIGN YOUR OWN WEATHERBY®

Our Custom Shop can create a Weatherby rifle that is uniquely your own. From custom stock dimensions to wood checkering and finish options, our custom gunmakers can create the rifle or shotgun of your dreams. The “Design Your Own Weatherby” feature is available on our web site at www.weatherby.com. This step-by-step interactive design area lets you look at different options, compare pricing and create the exact rifle you want. Your design will then be printable which you can take to your Weatherby dealer for final pricing and ordering.

CUSTOM VANGUARD (SHOWN ABOVE)
.270 Win. Mag. in High Desert Brown. Features Fiberguard composite stock and chrome moly barreled action with black Teflon® coating.

CUSTOM VANGUARD (SHOWN ABOVE)
.22-250 Remington in Snow Camo. Features Fiberguard composite stock and stainless steel fluted barreled action with 11-degree parabolic target crown.

CUSTOM VANGUARD (SHOWN ABOVE)
.300 Wby. Mag. in Desert Camo. Features Fiberguard composite stock, stainless steel fluted barreled action and Accubrake™.

COMPOSITE STOCK UPGRADES are available in a pillar-bedded Fiberguard® or Accuguard® with CNC-machined aluminum bedding block. Choose from six distinctive color/camo patterns, including Dark Timber, Desert, Snow, Tan w/Black Web, Black w/Gray Web and Black w/Red Web.

"This is the first animal I've shot that didn't have wings. Thanks, Weatherby, for making my first big game hunt successful."

BETH OLSON {MINNESOTA}

IN 1957, ROY WEATHERBY changed the face of American firearms with the introduction of the Mark V®...billed as the world's strongest bolt action. Three rings of steel surrounding the case head. Fluted bolt body with three gas ports. Nine locking lugs and a short 54-degree bolt lift. For those who want the ultimate in speed and power, particularly on the biggest and most dangerous animals, the Weatherby Mark V Magnum system has no equal.

For hunters who prefer less weight and don't require the speed and power of a magnum, we offer the Mark V action for standard calibers. Virtually identical in design to the Magnum Mark V (but dimensionally smaller and 6 lugs vs. 9), the standard caliber action gives deer hunters all the inherent benefits of the Mark V in a size that accommodates up to .30-06 cartridge lengths (including the .240 Wby. Mag.)

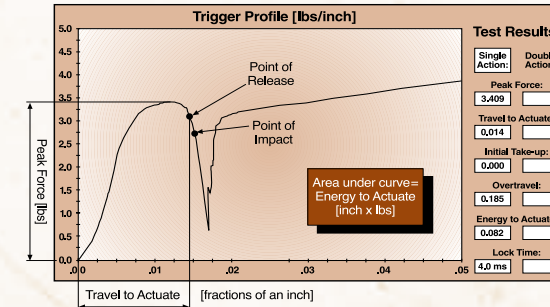

54-DEGREE BOLT LIFT – the shortest in the industry – is made possible by nine locking lugs. Faster chambering on follow-up shots and greater bolt-to-scope clearance for fewer battered knuckles.

WEATHERBY® MARK V® rifles are the only production rifles to feature barrels by one of the world's foremost custom barrel manufacturers, delivering better accuracy and performance in the field and better value for your money. All Weatherby Mark V rifles come with a Krieger™ Criterion™ button-rifled barrel, finished with one of several application-specific, accuracy-enhancing crowns. These barrels are renowned for their quality and their ability to maintain excellent accuracy, shot after shot. Among all production rifles, you can simply do no better than a Weatherby.

THE FINEST FACTORY TUNED TRIGGER – Weatherby Mark V trigger assemblies are tested and profiled for optimum sear engagement for a clean, crisp break. The chart below illustrates the precise measurements that are taken on each trigger.

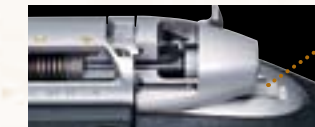

POINT OF RELEASE – Bold dot on chart shows where the trigger released the sear.
POINT OF IMPACT – Bold dot on chart shows where the firing pin contacts the primer.
LOCK TIME – Time interval between the point of release and the point of impact in milliseconds (4.0).
PEAK FORCE (LBS.) – Indicates let-off pressure.
TRAVEL TO ACTUATE – Indicates sear engagement or creep.

THE ONE-PIECE forged Mark V® bolt (magnum and standard) features longitudinal flutes that reduce weight and bearing surface for smooth operation and action. Positive cartridge extraction ejects the fired case without the need for full bolt extraction.

MARK V® ACTION

COCKING INDICATOR – an industry first. Visually indicates whether the rifle is cocked or uncocked.

DIRECT STRIKER intervention safety offers direct, positive locking of the firing pin. Locks bolt in engaged position and disengages the sear to render the trigger inoperable. The safety operates easily with a rolling action of the thumb, and is virtually silent with a controlled release.

THREE GAS PORTS – in the event of a pierced primer or case rupture, these ports allow high pressure gases entering the bolt body to escape laterally for increased shooter safety.

ONE-PIECE forged and machined steel receiver with integral recoil lug provides superior strength and structural integrity for the strongest action anywhere.

BOLT SLEEVE (above) completely enshrouds rear of action – an industry first. Provides protection from remaining high pressure gases and brass particles in the event of a pierced primer or case rupture.

3 RINGS OF STEEL – The cartridge case head is encased in three rings of steel for greater safety. The recessed bolt face is surrounded by the barrel, which is surrounded by the forged and machined steel receiver, creating an extra measure of safety.

FLOORPLATE/TRIGGERGUARD ASSEMBLY – all Weatherby® Mark V® rifles feature a one-piece alloy triggerguard frame for exceptional strength and consistent pull. Floorplate assembly is engraved with flying "W" monogram – just one of the custom touches you get with every Weatherby Mark V rifle.

ADJUSTABLE TRIGGER – precise adjustments for sear engagement (factory set at .008 to .014) and let-off weight (factory set at approximately 4 pounds). With a Weatherby, you get a clean, crisp trigger that will break precisely. This is a key component in delivering improved accuracy and can help make a better shot of any shooter.

OUR MONTE CARLO STOCK is specifically designed to improve shooter performance and accuracy. The raised comb is cast off to allow for quicker eye-to-scope alignment and faster target acquisition and to reduce felt recoil. The forearm is dual tapered (back and upward) to deliver better grip and control under recoil, and is flat-bottomed to provide a steady, stable rest. All Mark V rifles feature three predetermined bedding points...strategically and precisely placed to consistently deliver the highest level of accuracy (Accumark® rifles feature free-floated barrels).

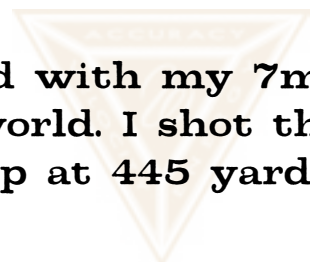

MAGNUM OR STANDARD CARTRIDGES – The Mark V action for Magnum cartridges (9 lug) is available in 24" and 26" barrels. The Mark V action for standard cartridges (6 lug) is available in 22", 24", and 26" barrels (depending on model). Identical in design, the standard cartridge action is dimensionally smaller and weighs 28% less (25.9 ounces versus 35.9 ounces). Each forged receiver features a one-piece integral recoil lug for superior strength and structural integrity. For specific chamberings by model, see pages 27-28.

"I have hunted with my 7mm Weatherby® all over the world. I shot this magnificent Marco Polo sheep at 445 yards at 16,500 feet."

GABRIEL TABIB {CALIFORNIA}

WE TRIMMED every available ounce of weight to give the Ultra Lightweight its feathery feel. It features state-of-the-art alloy materials and "skeletonized" handle and sleeve. Tips the scales at just 5 3/4 lbs. (standard action).

MARK V® ULTRA LIGHTWEIGHT

The Ultra Lightweight is just that and so much more, tipping the scales at 5 3/4 pounds (6 3/4 pounds on magnum models). The 24" or 26" fluted stainless steel barrel (blackened to reduce game-spooking glare) delivers maximum velocity and features a recessed field crown (.583 for magnum and .547 for standard calibers). The Bell & Carlson tan composite stock with spiderweb pattern is finished with the renowned Pachmayr® Decelerator® recoil pad. See page 27.

MARK V® ACCUMARK®

Features a hand-laminated, raised comb, Monte Carlo composite stock with matte gel coat finish, spiderweb accents and Pachmayr Decelerator recoil pad. The Mark V action is bed to an aircraft-grade 6061 T-6 aluminum bedding plate. A Krieger™ Criterion™ 26" heavy contour free-floated barrel delivers maximum velocity and features a .705 muzzle diameter with target crown. Available in both right- and left-hand models. See page 27 for complete specifications.

MARK V® SVM

The Super VarmintMaster® starts with a tan, hand-laminated, raised comb Monte Carlo composite stock with black spiderwebbing and Pachmayr Decelerator recoil pad. A CNC-machined aluminum bedding block stiffens the receiver area for a stable platform for the barreled action. A Krieger™ Criterion™ 26" fluted stainless steel barrel features an 11-degree parabolic target crown, while an adjustable trigger rounds out this high performance varmint rig. Complete specifications on page 27.

SUPER VARMINTMASTER
{MSRP \$1772*}

ULTRA LIGHTWEIGHT, SVM AND ACCUMARK® rifles feature a specially-designed, hand-laminated raised comb Monte Carlo stock by Bell & Carlson. Constructed of Aramid, graphite unidirectional fibers and fiberglass.

A CNC-MACHINED bedding plate is constructed of aircraft-grade 6061 T-6 aluminum that stiffens the receiver area, providing a stable and rigid platform for securing the barreled action to the stock. Precisely-inletted, the bedding plate ensures repeatable accuracy.

*Price may vary by model and dealer.

“When big game hunting I always carry a Weatherby.[®] My Mark V[®] .300 Weatherby Mag. shoots flat, is very accurate and delivers a lot of energy downrange.”

VINCE SCAVONE {PENNSYLVANIA}

SYNTHETIC

MARK V[®] SYNTHETIC
Superior performance and uncompromised quality comes together in an affordable package that puts a Weatherby Mark V[®] within reach of virtually any hunter. Hard-working. No nonsense. The Mark V Synthetic features a lightweight, injection-molded raised comb Monte Carlo stock. All metalwork is bead blasted and matte blued with Krieger[™] Criterion[™] button-rifled barrel in 24" or 26". See page 28 for complete specifications.

MARK V[®] FIBERMARK[®] COMPOSITE
The Fibermark takes production composites to an all-new level...offering a full host of performance-enhancing features not found on other production rifles. The platform for the barreled action starts with a special hand-laminated composite stock (a combination of Aramid, fiberglass and graphite unidirectional fibers). The raised comb, Monte Carlo pillar-bedded stock reduces torque on the action to maintain repeatable accuracy, shot after shot. The stock is finished with the added touch of a Pachmayr[®] Decelerator[®] recoil pad.

The barreled Mark V action features a button-rifled, Krieger Criterion barrel with accuracy-enhancing field crown, secured to the stock at three predetermined bedding points. Krieger Criterion barrels are recognized among the finest in the world for their quality and ability to maintain accuracy potential. An adjustable trigger lets you fine-tune the rifle for creep and let-off weight. Dependable, consistent accuracy and knockdown power. Exceptional value. Available in Magnum calibers only. For complete specifications, see page 28.

NO OTHER ACTION matches the functional design and structural integrity of the Mark V...renowned as the strongest in the world. Three rings of steel surround the cartridge case head. Forged and machined receiver. One-piece bolt with nine locking lugs (six lugs on standard action). Delivers a 54-degree bolt lift—the shortest in the industry—for fast follow-up shots and fewer battered knuckles.

"I have no doubt the confidence I have in my Weatherby allowed me to harvest this great buck. Keep up the good work."

DAN SCOTT {MAINE}

TRADITIONAL WOOD

WEATHERBY CRAFTSMEN take great care to bed, fit and finish each of the walnut stocks. Rosewood forends and pistol grip caps with inlays and maplewood spacers are carefully selected to match color and grain, then shaped and sanded to feel like a single piece of wood.

NEW! MARK V® ULTRAMARK™

The Ultramark is the bridge between the legendary Mark V® Deluxe and a custom-built rifle – a beautiful representative of the gunmaking craft. We begin with a hand-selected blank of highly figured, exhibition grade walnut. The high gloss, raised comb Monte Carlo stock receives elaborate 20 LPI checkering and double maplewood spacers on the buttstock, forend and pistol grip cap. All metalwork is polished to a high lustre finish. Elegant. Distinctive. A Weatherby® through and through. See page 28.

MARK V® DELUXE

The quintessential Weatherby® and perhaps the most widely-recognized and copied rifle in the world. From the beautiful walnut stock to the critically-acclaimed Mark V® action, form and function come together to deliver superior performance. The Monte Carlo stock is accented with a rosewood forend tip and pistol grip cap with maplewood spacers and diamond inlay. Fineline checkering provides an additional custom touch. For complete specifications, see page 28.

MARK V® LAZERMARK®

This distinctive rifle features the same walnut stock as the Mark V Deluxe, with a laser-carved oak leaf pattern in lieu of point checkering. All metalwork is polished to a high gloss finish. The Lazermark combines modern technology and the legendary performance of the Mark V action with a look that is unique yet fully functional for all types of hunting. See page 28 for complete specifications.

MARK V® SPORTER

Quality and performance in an affordable wood stock design. Metalwork is bead blasted and matte blued to a low lustre finish, while the walnut stock sports a satin urethane finish, fineline diamond point checkering and contrasting rosewood forend tip. The Sporter evokes an element of pride, both in the rack and in the field. For complete specifications, see page 28.

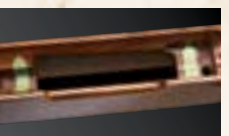

IN TYPICAL Weatherby fashion, the recoil pad is precisely fit and finished to match the contour of the wood stock for a custom look.

“The new Weatherby® CFP is awesome. My dad and I had one of the most fun days of shooting ever. The prairie dogs didn’t.”

MAX MAGUIRE WITH FATHER, MIKE {NEBRASKA}

CFP

NEW! MARK V® COMPACT FIRING PLATFORM (CFP)
It's been said that beautiful things come in small packages. Truer words were never spoken when it comes to our new Mark V® CFP. This exciting firearm offers all the legendary features and performance advantages of the Mark V action in a compact, 27 1/2" package that tips the scales at just 5 1/4 lbs. The CFP is pillar-bedded in a Fibermark® composite stock

(a combination of Aramid, graphite and unidirectional fibers). Black spiderwebbing provides both a sure, positive grip and a distinctive look. A button-rifled, #2 contour 16" chrome moly (4140) barrel features a custom target crown for consistent, repeatable accuracy. All metalwork is bead blasted to a matte blue to reduce game spooking glare. And, as with all Mark V rifles the CFP is guaranteed to shoot a 1 1/2" 3-shot group from a cold barrel at

100 yards (when used with premium ammunition). Available in .223 Remington, .22-250 Remington, .243 Winchester and 7mm-08 Remington, offering proven popular chamberings for a diverse range of game from varmints to whitetails. For complete specifications, see page 27.

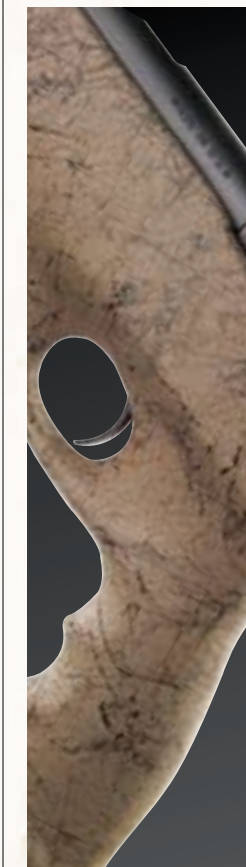

MARK V® COMPACT FIRING PLATFORM	
.223 Rem.	CFPI223RR10
.22-250 Rem.	CFPI222RR10
.243 Winchester	CFPI243NR10
7mm-08 Rem.	CFPI7M8RR10

WITH THE LEGENDARY MARK V® action for standard calibers, the CFP one-piece bolt features a 6-lug design. The non-binding action is smooth and stable with a 54-degree bolt lift for faster cycling on follow-up shots.

NEW FOR 2004
COMPACT FIRING PLATFORM (CFP)
(MSRP \$1,499*)

A SPECIALLY-DESIGNED, FIBERMARK® composite stock (a combination of Aramid, graphite and unidirectional fibers) is the foundation for the 16" barreled action. An integral recoil lug provides superior strength and structural integrity. Predetermined bedding points add to the consistent, repeatable accuracy of the CFP.

THE MARK V® CFP FEATURES an ambidextrous grip design for right- or left-hand shooters (bolt setup is on right hand side). The grip area is pre-formed to match the natural shape of the hand for a sure, comfortable feel.

*Price may vary by model and dealer.

MARK V® CUSTOM

FOR THOSE who prefer the lighter weight and durability of a composite, we offer a specially-designed, hand-laminated, raised comb, Monte Carlo stock. Available in distinctive Dark Timber (top), Desert Camo (middle) and Snow Camo (bottom). Custom length of pull is available on all our custom and production rifles.

CUSTOM FLOORPLATE ENGRAVING is available in three different grades (6/3/1), as well as options for rosewood or ebony pistol grip caps with inlaid diamonds in maple (wood stock rifles).

TO ADD TO THE PERSONALIZATION of your Weatherby, choose from three different grades (6/3/1) of intricate engraving patterns (including gold overlays) for the receiver area of the barreled action.

THE BOLT SLEEVE AND RECEIVER of your rifle can also be engraved, choosing from three different engraving patterns (6/3/1).

OUR CUSTOM SHOP offers you the options of multi-point, Fleur-de-lis with ribbon checkering or hand carving on wood stock rifles. All checkering and carving is crafted by hand by our skilled custom stockmakers.

OUR DROP BOX FLOORPLATE (above) expands the capacity of Mark V® magnum rifles (.257 Wby. Mag. through .460 Wby. Mag.). This easy to install accessory kit allows you to hunt with 3 cartridges (or 4 depending on caliber) in the magazine + 1 in the chamber. This is an important advantage for hunting dangerous game.

MARK V® OUTFITTER

Specially-designed, hand-laminated raised comb, Monte Carlo composite stock (a combination of Aramid, graphite unidirectional fibers and fiberglass) with custom Desert Camo and Pachmayr® Decelerator® recoil pad. Features a Krieger™ Criterion™ fluted stainless steel barrel and recessed target crown. CNC-machined aluminum bedding block provides a solid, stable platform for the hand-honed barreled action. Teflon® coating aids in corrosion resistance and creates super smooth operation. For available calibers and features, contact the Custom Shop.

MARK V® CROWN CUSTOM

Hand-carved walnut stock with inlays, damascened bolt and follower with checkered knob, engraved barrel, receiver and triggerguard. Floorplate engraving (multiple animal patterns available) in beautiful gold overlay. Engraved initials on solid gold monogram plate on forearm. For available calibers and features, contact the Custom Shop.

MARK V® ROYAL ULTRAMARK CUSTOM

Lazer-checked, hand selected exhibition grade walnut stock, damascened bolt and follower with checkered knob, engraved receiver and bolt sleeve. Floorplate with scroll pattern (with choice of animal), enhanced with selective 24K gold and nickel plating. For calibers and features, contact the Custom Shop.

MARK V® SAFARI CUSTOM

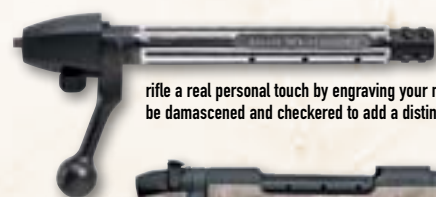

Satin oil-finished, French walnut modified Monte Carlo stock with Fleur-de-lis checkering. Ebony forend and pistol grip cap. Damascened bolt and follower with checkered bolt knob. Adjustable ramp, gold-filled "V" and a hooded barrel band front sight. Floorplate is engraved with "Safari Custom." For available calibers and features, contact the Custom Shop.

MARK V® DANGEROUS GAME RIFLE (DGR)

Designed for the hunter who is serious about their pursuit of dangerous game. It features a hand-laminated, raised comb, Monte Carlo composite stock, with a CNC-machined aluminum bedding block. Our cast off stock design allows for quick eye-to-sight alignment, a feature even more important on a rifle used for dangerous game. Black oxide matte finish on all metalwork reduces reflection and glare. An adjustable ramp, shallow gold-filled "V" rear and hooded barrel band front sight with large gold bead provide for immediate sight alignment and target acquisition.

AS A CUSTOM OPTION on select calibers of Accumark® and Super VarmintMaster® (SVM) rifles, Weatherby will guarantee a SUB-MOA (.99 in. or less) 3-shot group from a cold barrel at 100 yards (with specific calibers only). We will select the rifle and provide a factory-shot test target along with the specific ammunition load information. The floorplate will feature a distinctive engraved "SUB-MOA." For more information, contact the Custom Shop.

GIVE YOUR WEATHERBY rifle a real personal touch by engraving your name on the bolt. Bolts can also be damascened and checkered to add a distinctive and elegant look to the rifle.

WEATHERBY® CUSTOM RINGS and bases are available in Grade 6 (top), Grade 3 (middle), and Grade 1 (bottom). Each offers options of different engraving patterns and gold overlays.

THE WEATHERBY CUSTOM SHOP CAN DESIGN a Weatherby rifle that is uniquely your own, built to your specifications. For more information, contact the Weatherby Custom Shop or visit www.weatherby.com.

“These buffalo don’t like the .460 Weatherby® Magnum one bit.”

ROBERT NIOA WITH WIFE, ELIZA {AUSTRALIA}

AMMUNITION

WEATHERBY® AMMUNITION offers a variety of premium and super premium grade bullets that are carefully selected for specific hunting applications. To meet varying needs, we proudly load Hornady® InterLock® bullets, the renowned Barnes-X™ bullet, the popular Nosler® Partition® bullet and the Nosler Ballistic Tip® bullet, featuring a unique plastic nose for explosive expansion. Whichever bullet you prefer, it has been ideally matched to maximize the performance potential of Weatherby ammunition.

A UNIQUE DOUBLE RADIUS Venturi shoulder design increases the velocity of escaping gases without increasing the pressure within the cartridge. This results in higher velocity within standard pressure ranges.

NORMA® HIGH-GRADE PREMIUM POWDER is used in all Weatherby ammunition to deliver maximum attainable velocity and energy. Each lot of powder is tested to assure consistency and to achieve the lowest standard velocity deviation from shot to shot. Gives the non-handloader handloaded performance and accuracy.

norma WE USE NORMA precision brass, offering CNC-machined primer pockets produced to match-grade specifications...the finest that money can buy.

SPECIALY-DESIGNED PRIMERS provide positive ignition of the large powder charges found within Weatherby Magnum ammunition.

MOST WEATHERBY RIFLES will shoot groups that are significantly tighter than our written 1 1/2" 3-shot guarantee guarantee. Put simply, Weatherby is simply the most accurate production rifle you can buy.

OVER HALF A CENTURY AGO, ROY WEATHERBY began his career in the firearms industry as a cartridge “wildcatter,” developing his revolutionary ideas about rifle cartridge performance and design. At the time, many industry “experts” were promoting the idea that optimum performance was a result of pushing big bullets at relatively slow speeds. Roy, however, believed just the opposite. It was his opinion that the faster a bullet traveled, the better—the flatter it would shoot, the less it would drop, the harder it would hit—the better its terminal performance. It was a concept that would spawn many an argument among ballistics experts, gun writers and in many a deer camp. But as people began to hear about and experience Roy’s notion firsthand, those questions, concerns and doubts were quickly laid to rest. Soon, the entire hunting world would know what Roy had always believed—generate enough speed to create hydrostatic shock in the animal and the result will be more one-shot kills.

Today, our ammunition remains true to the concept Roy developed in the 1940s. At the same time, our ammunition also takes advantage of the latest in controlled expansion bullets which are capable of harnessing the higher velocities to create cartridges that provide the ultimate in penetration, large wound channels and more one-shot kills.

ALL WEATHERBY® RIFLES are guaranteed to shoot a 1 1/2" 3-shot group at 100 yards from a cold barrel when used with premium (non-Weatherby calibers) or Weatherby factory ammunition. Together, the Weatherby system (premium ammunition and rifle) forms the flattest shooting, hardest hitting, most accurate combination in the industry today.

We start with Norma® Precision brass, the finest that money can buy (handloaders also tell us it's the finest for reloading). Then we add premium grade primers and bullets from the top names in the business — Hornady® Nosler® and Barnes. The result is that each Weatherby Magnum cartridge is produced with the precision of handloading...with the blistering speed and downrange power to deliver the opportunity for more one-shot kills. In virtually every case, no other commercially-produced ammunition provides the Maximum Point Blank Range of Weatherby. Nothing shoots flatter, hits harder or is more accurate out of the box than a Weatherby.

Nosler®

WEATHERBY HAS LONG INCLUDED the legendary — and very effective — performance of Nosler® Partition® and Ballistic Tip® bullets in our Weatherby® Magnum ammunition. The Nosler Partition is a benchmark premium bullet engineered for maximum in-flight and terminal performance on big game — controlled expansion, penetration and weight retention. (Available in the following Weatherby Magnum calibers: .240, .257, .270, 7mm, .300, .340, .30-378, .338-378 and .375). The Nosler Ballistic Tip features a polycarbonate tip that initiates maximum expansion at impact. A heavy jacket base acts as a platform for large diameter mushrooms. Nosler Ballistic Tip bullets are color-coded for each caliber (available in the following Weatherby Magnum calibers: .240, .257, .270, 7mm, .300, .30-378, .338-378 and .340).

BALLISTIC TIP

POLYCARBONATE TIP resists deformation in the magazine and initiates expansion on impact.

FULLY TAPERED JACKET ruptures instantly at the thin jacket mouth. Gradual thickening along axis controls expansion and curls uniformly outward.

INTEGRAL PARTITION supports the expanded mushroom and retains the rear lead alloy core.

PARTITION

Hornady

WEATHERBY MAGNUM AMMUNITION is also available with the proven ballistic performance of the Hornady InterLock® bullet. Another tried and true hunting bullet, the InterLock features an exclusive ring that ensures the core and jacket remain locked during expansion. The result is more mass, energy and momentum at impact for greater penetration. Hornady's pioneering secant ogive design offers a high ballistic coefficient with maximum bearing surface for greater stability. The InterLock is available in the following Weatherby Magnum calibers: .224, .240, .257, .270, 7mm, .300, .340, .378, .416 and .460.

SECANT OGIVE DESIGN offers a high ballistic coefficient with maximum bearing surface for greater stability.

CANNELURE provides accurate and consistent crimping, and also works with InterLock ring to ensure the core and jacket remain locked during expansion.

THE RAISED INTERLOCK RING is embedded in the bullet's core, ensuring the core and jacket is locked in one piece during expansion. Upon impact, the InterLock retains more mass and energy for deep penetration and large, consistent wound channels.

BARNES

WEATHERBY® AND BARNES-X™...a terminal combination! Generally regarded as a quantum leap in bullet design, we believe the Barnes-X in Weatherby ammunition will deliver all the terminal performance you could hope for in a factory load. Due to its unique design, a Barnes-X will retain virtually all of its weight upon impact, so you can shoot a lighter weight bullet that will deliver extremely flat trajectory while performing like a heavier weight bullet of conventional design and construction. For each of our cartridges, we have selected the ideal weight and style of bullet to maximize the benefits of high velocity with the controlled expansion and aerodynamic design of the Barnes-X.

BARNES-X — SUPERIOR WEIGHT RETENTION											
BARNES-X WEIGHT RETENTION BY CALIBER AT 100 YARDS	.240	.257	.270	7MM	.300	.30-378	.338-378	.340	.378	.416	.460

Weatherby Magnum ammunition is available with the Barnes-X flat base bullet.

“The D'Italia has quickly become the ‘go-to favorite’ in my gun safe.”

STEVE RUSSELL {NEBRASKA}

SIDE-BY-SIDE

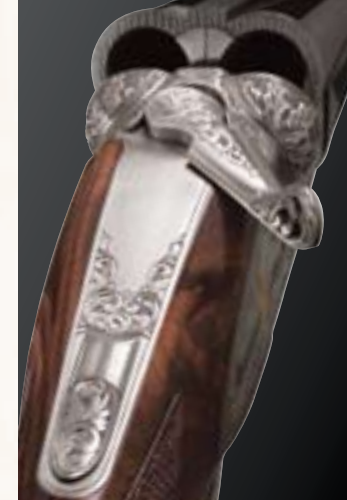

PERHAPS NO OTHER GUN elicits the devotion and emotional bond as the traditional English side-by-side shotgun. Refined over centuries of use, the double gun is the field standard among wingshooting loyalists.

Weatherby offers an Italian-made side-by-side that is certain to stir a response from the most discriminating enthusiasts, bringing together classic styling and craftsmanship with modern production techniques in a truly stunning way.

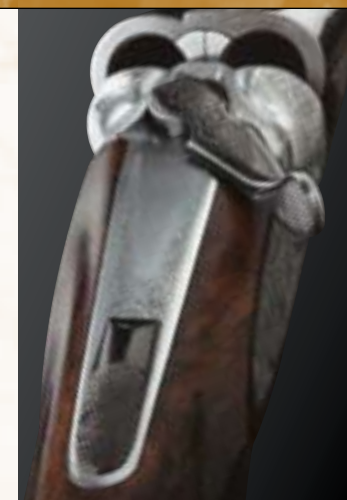

First introduced in 2005, we have now expanded our side-by-side lineup to include three models. The beautiful Athena® D'Italia returns featuring a highly figured, oil-finished walnut stock with traditional straight grip. Joining the D'Italia ranks in 2006 is a new model with a rounded pistol grip for those who prefer a more defined grip in hand. And for those who desire a more custom touch, we proudly offer the new Athena D'Italia Deluxe, a head-turning work of art that is at the pinnacle of the gunmaking craft.

ALL ATHENA D'ITALIA shotguns feature a stainless steel Integral Multi-Choke (IMC) system to tailor choke patterns to shooting needs and field situations. Certified for steel shot through modified choke constrictions.

THE NEW ATHENA® D'ITALIA DELUXE features the beauty of intricate engraving with cut-outs on the top lever.

THE ATHENA® D'ITALIA FEATURES laser cut checkering in “New Scottish” pattern. 20 LPI adds a distinctive look and a sure grip in the field.

SIDE-BY-SIDE ATHENA D'ITALIA DELUXE (BELOW)

BEAUTIFUL ENGRAVING adds elegance and non-slip functionality.

A TIME-TESTED Anson and Deeley action with Purdey double locking system provides perfect interlocking alignment of barrels to action.

THE ATHENA D'ITALIA DELUXE features a single inertia trigger. Right barrel fires first.

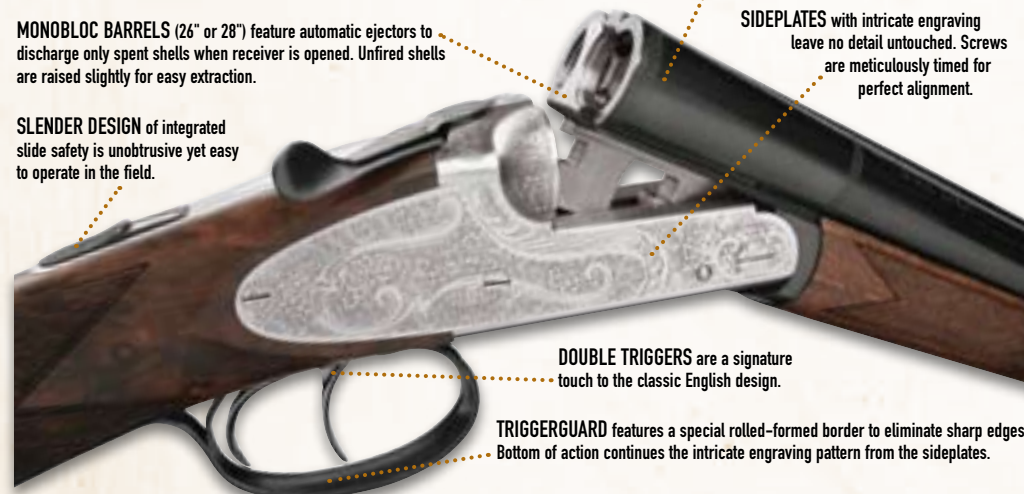

CHROME-LINED BARRELS are built to withstand the wear and tear of heavy use. Lengthened forcing cones and backboring improve patterns while reducing felt recoil.

FANCY ENGRAVED triggerguard features rolled-formed border to eliminate sharp edges.

MONOBLOC BARRELS (26" or 28") feature automatic ejectors to discharge only spent shells when receiver is opened. Unfired shells are raised slightly for easy extraction.

SIDEPLATES with intricate engraving leave no detail untouched. Screws are meticulously timed for perfect alignment.

SLENDER DESIGN of integrated slide safety is unobtrusive yet easy to operate in the field.

DOUBLE TRIGGERS are a signature touch to the classic English design.

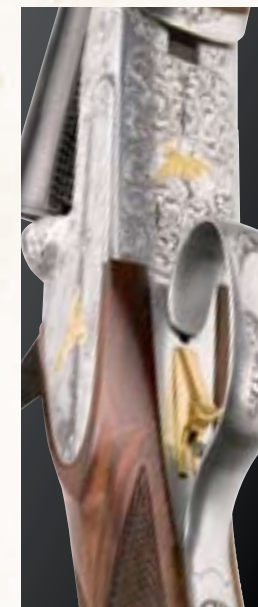

TRIGGERGUARD features a special rolled-formed border to eliminate sharp edges. Bottom of action continues the intricate engraving pattern from the sideplates.

THE ATHENA D'ITALIA DELUXE (above) houses a single inertia trigger and can be personalized with your initials.

THE DISTINCTIVE WEATHERBY Flying "W" in gold adorns the Athena D'Italia straight grip (below) and pistol grip models with double triggers.

ALL ATHENA D'ITALIA shotguns feature walnut stocks with deep oil finish for a classic look. Each stock is hand selected for figuring, density and weight. You also get exceptional wood-to-metal fit where the wood forend marries with stylish metal inserts with titanium nitride finish.

“My daughter, Lauren, uses my Weatherby® on everything from opening-day doves to late season ducks. At the age of 14, she’s become my favorite hunting partner.”

STAN RUDDELL WITH LAUREN AND PETEY (CALIFORNIA)

ATHENA® D’ITALIA

THE ENGLISH SCROLL with ribbons engraving carries the signature of the world-famous Cesare Giovannelli Studio.

NEW! SIDE-BY-SIDE ATHENA® D’ITALIA DELUXE

In a word: stunning. Our new side-by-side Deluxe is a beautiful testament to the gunmaking craft. The action features sculpted frameheads and is adorned with Bolino-style game scene with renaissance floral engraving, hand-signed by A. Posilini. The stock is AAA Fancy Turkish walnut with classic straight grip buttstock, 24 LPI hand checkering and hand-rubbed oil finish. For the most discriminating double gun enthusiast, the D’Italia Deluxe is a true work of art. See page 33 for specifications.

NEW! SIDE-BY-SIDE ATHENA® D’ITALIA PG

Identical in action and frame to the Athena D’Italia, it features a rounded pistol grip and semi-beavertail forearm for exceptional between-the-hands balance. The hand-selected, oil-finished walnut stock carries laser cut “New Scottish” checkering at 20 LPI. Comes with foam-lined take-down case for the ultimate in portable protection. For complete specifications, see page 33.

SIDE-BY-SIDE ATHENA® D’ITALIA

The quality and craftsmanship of Italy’s finest gunmakers deliver a classic side-by-side that rivals guns costing thousands more. Action is cut from a solid block of alloy steel, hardened and chromed with “Silver Slade” finishing. Unmatched wood-to-metal fit and every appointment worthy of a classic field double gun. Available in 12, 20 and 28 gauge models. For complete specifications, see page 33.

NEW FOR 2006
SIDE-BY-SIDE ATHENA D’ITALIA DELUXE
(MSRP \$7,625*/MSRP \$7,789* 28 gauge)

NEW FOR 2006
SIDE-BY-SIDE ATHENA D’ITALIA PG
(MSRP \$3,599*/MSRP \$3,725* 28 gauge)

SIDE-BY-SIDE ATHENA D’ITALIA
(MSRP \$2,925*/MSRP \$3,065* 28 gauge)

THE ATHENA D’ITALIA comes with a handsome foam-lined take-down case. Features individual areas for choke tubes and wrenches, forend, barrels and buttstock. Comes with velour sleeves for extra protection and combination locks for extra security. Case is embossed on top with Weatherby logo in distinctive gold.

THE NEW ATHENA D’ITALIA PG features a rounded pistol grip that cradles the hand to provide a sure grip and exceptional balance in the field.

*Price may vary by model and dealer.

“Setting up with the right equipment counts. I haven’t found a better combination when calling coyotes than a Weatherby® SAS and box of #4 buckshot...fast and effective.”

TIM O'CONNOR {OREGON }

ITALIAN-MADE SEMI-AUTOMATICS

are renowned for their quality, craftsmanship and smooth operation in the field. With the Weatherby SAS, you get every performance feature and advantage at a cost that is hundreds less than other name imports. Our self-compensating gas system significantly reduces felt recoil and delivers dependable, high volume performance. A magazine cut-off with smart follower allows for easy loading and quick changeovers in the field (2 3/4" or 3" shells), while the vent-ribbed barrel provides for cooler performance when the shooting heats up. The SAS also shines when it comes time to clean up. The modern gas system disassembles quickly and easily, and a special drop-out trigger is removed by simply punching out two side-mounted pins. Superior performance. Exceptional fit and finish. Common sense design. That's the SAS.

SAS SHOTGUNS feature our screw-in Integral Multi-Choke system (IMC). Each shotgun comes with three steel choke tubes and an easy-to-use choke wrench. Tube constrictions are based upon barrel length and anticipated usage. Shadow Grass® and Break-Up® models come with extended choke tubes.

ALL WEATHERBY CHOKES feature an easy-to-use identification system to allow you to quickly identify the proper choke for your shooting situation. The top of each choke has been notched to correspond with the specific choke pattern. The choke pattern is also stamped on the side of each choke.

SAS

CUSTOM FIT the stock of your SAS to your body size and shape with our special shim/spacer system. Spacers can be quickly added, removed or reversed to alter cast on/cast off or drop for improved target acquisition and more "hits."

DROP-OUT TRIGGER SYSTEM
Contributing to the exceptional functionality of the SAS is our specially-designed drop-out trigger system. Simply pushing two pins on the right side of the receiver allows you to remove the trigger assembly for easy cleaning. Snaps back into place in just seconds for fast reassembly.

RECEIVER CONSTRUCTED of CNC-machined, aircraft-grade 7075 T-6 alloy to reduce overall weight, improving handling characteristics.

INTERNAL DAMPENING SYSTEM significantly reduces felt recoil when bolt contacts rear of receiver during the ejection/reload cycle.

THE SAS features chrome-lined barrels to withstand the wear and tear of high-volume shooting. Lengthened forcing cones work to reduce felt recoil, curbing shooter fatigue while improving patterns.

UNIQUE DROP-OUT TRIGGER SYSTEM can be removed by simply punching out two pins. Allows for quick, easy cleaning and reassembly.

MAGAZINE CUT-OFF feature provides versatility, allowing for quick load changes and an additional margin of safety when clearing the chamber without completely unloading the shotgun.

AMBIDEXTROUS OVERSIZED "DELTA" safety button is located on rear of triggerguard for easy access and fast disengagement in the field. Ideal for use with gloved hands.

SELF-COMPENSATING GAS SYSTEM — Form and function come together in a simple, but highly effective self-compensating gas system (shown at right) for reduced recoil and increased load versatility. The modern, in-line system significantly reduces the size of the forend, improving balance and pointability. The SAS easily handles light, 1 oz. 2 3/4" shells to the heaviest 3" duck and goose loads. A special internal dampening system reduces felt recoil to provide greater shooter comfort. The two-piece system is easy to assemble and disassemble for fast, convenient cleaning.

WEATHERBY® SAS SHOTGUNS are backbored to .735 to improve shot patterns, reduce recoil and curb shooter fatigue.

“I’ve shot Weatherby® Over/Under shotguns and have always been impressed. This SAS looks like a winner to me.”

DENNIS WARREN – GUIDE AT HIGHLAND HILLS RANCH {OREGON}

SAS FIELD

The SAS Field features a traditional walnut stock for a classic look against the matte blued receiver and metalwork. The modern, self-compensating gas system makes volume shooting easy and comfortable, reducing felt recoil and affording fast and convenient cleaning. To aid in shooter accuracy and pointability, a special shim system lets you adjust the cast on/off or drop for a near custom fit. Built for long days and fast shooting, the SAS comes with three IMC chokes and wrench for quick changeovers. Available in 12 gauge. For complete specifications, see page 37.

SAS SLUG GUN

The quality, performance and value of our SAS is now available for slug gun hunters. The SAS Slug Gun features the same Italian-made, self-compensating gas system for reliable duty and easy maintenance, matched with a 22" rifled barrel (accommodates 2 3/4" and 3" shells) with cantilever base. The SAS Slug Gun also features a walnut Monte Carlo stock with Weatherby's special shim system to adjust cast. Sling swivel studs included. For complete specifications, see page 37.

OPTIONAL SAS RIFLED BARREL

Increase the versatility of any SAS shotgun with our slug barrel. The 22" rifled barrel with open sights offers exceptional performance and durability in the field.

“Thanks Weatherby®. I used your SAS to harvest my first Rio last spring. This fine shotgun made a tough shot seem easy.”

BRETT NELSON {OREGON}

SAS SYNTHETIC

The SAS Synthetic delivers all the design and performance advantages of the SAS Field in a synthetic stock option. The black, injection-molded stock features our special shim system that allows right- or left-handed shooters the ability to adjust cast on/cast off or drop to fit individual preferences. Modern, self-compensating gas system is reliable under heavy use, reduces felt recoil and is easy to disassemble and clean. Comes with sling swivels and IMC choke system with three chokes. Available in 12 gauge. See page 37 for complete specifications.

SAS BREAK-UP®

When concealment is the key, this semi-automatic shotgun is the clear choice. It features Mossy Oak's popular Break-Up® camouflage pattern, ideal when sitting in a deer stand or against a tree trunk calling in a spring tom. The mid-point bead and high visibility front sight provides fast target acquisition for that pressure-filled shot of a lifetime. Features our special shim system that lets you custom fit for cast on/cast off and drop. Comes with sling swivel studs and IMC choke system with three extended choke tubes. Available in 12 gauge. For complete specifications, see page 37.

SAS SHADOW GRASS®

With Mossy Oak® Shadow Grass® camo, this autoloader is ideally suited to the heavy-duty action of the duck or goose blind. Reliable, self-compensating gas system is built for long days of shooting. Quickly disassembles for fast, easy cleaning. Barrels, available in 26" or 28" length, feature mid-point bead and high visibility front sight to get on target quickly. Stock can be custom fit for cast on/cast off and drop. Comes with sling swivel studs and IMC choke system with three extended choke tubes. Available in 12 gauge. See page 37 for complete specifications.

BRIAN BOESCH - NEBRASKA

NOTHING can ruin a hunt faster than a shotgun that fails to function. To assure that your SAS will stand up when it counts, Weatherby institutes stringent endurance and function testing that far exceeds industry standards, both at the lab and in the field. Tens of thousands of rounds have been put through our test shotguns, pushing them well beyond normal limits, to give you the confidence of knowing your Weatherby will pass the most rigorous test of all.

*Price may vary by model and dealer.

"I was so impressed with the Weatherby® Over/Under that I bought one for myself. It's a great shotgun!"

MARK SHEARMAN — GUIDE AT HIGHLAND HILLS RANCH {OREGON}

FLUSHING PHEASANTS. Decoying greenheads. Breaking bobwhites. When your pointing skills are put to the test, that's when you'll appreciate your Weatherby® Over/Under shotgun. The difference starts with a design that has proven itself time and time again since we first introduced it in 1982. The monobloc barrel is narrower and lower in profile to deliver lighter weight, better balance and a livelier feel. Our modified Greener crossbolt action actually "shoots in" with use to retain its rigidity and tight fit — recognized as one of the strongest and most reliably made. And, you get the distinctive beauty of a richly finished, Claro walnut stock, intricately engraved receivers and wood-to-metal fit that is the hallmark of the Weatherby name. From the elegant Athena® to the field-proven Orion®, a Weatherby Over/Under will elicit a true sense of pride, both in the gunrack and in the field.

OVER/UNDER

WEATHERBY® OVER/UNDER stocks are precisely crafted for a seamless wood-to-metal fit...an extra measure of attention to detail found only on the finest custom shotguns.

AUTOMATIC EJECTORS — discharge spent shells when receiver is opened. Unfired shells are raised slightly for easy extraction.

SPECIAL BREECHING SYSTEM — provides seven points of engagement for a stronger, safer action.

SINGLE, SELECTIVE INERTIA TRIGGER — works independently of the safety. This allows the shooter to select a barrel regardless of safety setting. The barrel selector is stamped with "O" and "U" to readily indicate the barrel choices. Gold-plated for corrosion protection. Does not apply to Orion® Super Sporting Clays (SSC) which does not have this feature.

PATENTED SEAR BLOCK SAFETY DESIGN — prevents accidental discharge when loaded shotgun is closed with trigger depressed... even when the safety is in the "off" position. Does not apply to Orion Super Sporting Clays (SSC) which does not have this feature.

SLIDING TOP SAFETY — prevents firing unless top barrel release lever is fully closed. Does not apply to Orion Super Sporting Clays (SSC) which does not have this feature.

HAMMER REGAIN — prevents accidental discharge if trigger is pulled to near "let-off" and then released. Sear to hammer engagement is fully reset for a consistently crisp trigger pull.

MODIFIED GREENER CROSSBOLT ACTION — one of the strongest and most reliable made. The crossbolt lockup actually "shoots in" with use to retain its rigidity and tight fit. Shallower in depth and thinner in profile, our 12-gauge receivers are proportionate to most other 20-gauge guns, generating that sought-after "between the hands" balance for quicker pointing and target acquisition.

MONOBLOC BARREL CONSTRUCTION — narrower and lower in profile. Delivers lightweight performance, superior balance and a livelier feel.

LENGTHENED FORCING CONES — work to reduce recoil...curbing shooter fatigue and improving patterns.

MATTE VENTILATED top rib reduces glare and works with side vents to dissipate heat buildup in the barrels. Improves shooting accuracy.

BACKBORING TO .735 — on all Weatherby 12-gauge models helps to improve shot patterns, reduce recoil and shooter fatigue.

INTEGRAL MULTI-CHOKE SYSTEM — POINTS OF CONSTRICTION

ALL WEATHERBY® O/U SHOTGUNS feature an interchangeable, screw-in Multi-Choke System by Briley to allow you to tailor your shot pattern for specific needs. Briley chokes are crafted from stainless steel. Certified for steel shot through modified choke constrictions. In addition, SC I and SC II ported choke (right) tubes are available for the sporting clays enthusiast.

WEATHERBY ATHENA AND ORION field shotguns feature our popular classic field stock designs (right), with a rounded pistol grip and slender forearm for better balance and a livelier feel. Our SSC model (below and right) features a target-style pistol grip and Schnaubel forend for better fit and feel on the sporting clays course.

THE WEATHERBY CUSTOM SHOP can build you a shotgun with multi-barrel sets (in any combination of 20 gauge, 28 gauge, and .410) which allow you to quickly change barrel gauges and lengths. Tailor your shotgun to the particular shooting situation at the drop of a hat. For more information, contact the Weatherby Custom Shop at (805) 466-1767, or see your Weatherby dealer.

ALL WEATHERBY® CHOKES feature an easy-to-use identification system to allow you to quickly identify the proper choke for your shooting situation. The top of each choke has been notched to correspond with the specific choke pattern. The choke pattern is also stamped on the side of each choke.

BRILEY
A Legacy of Shooting Innovation.

“When you factor in excellent quality and outstanding design, I bought a Weatherby® shotgun because it’s the best value on the market today.”

GUY DANELLA {NEW YORK}

ATHENA®

A HALLMARK of Weatherby® Athena® shotguns is an attention to craftsmanship normally found on double guns of considerably more expense. You get exceptional fit and finish and extra detail, including the beauty of intricate rose and scroll, game scene or floral pattern engraving. Each shotgun carries engraved sideplates, receiver and tang.

ATHENA® GRADE V CLASSIC FIELD

When you set out to build the world’s finest field guns, there’s simply no room for compromise. And, the Athena V is more than a worthy result. The beautiful oil-finished stock is “AAA” grade fancy American Claro walnut with 20 LPI diamond point checkering, set against a silver/gray nitride sideplate receiver with delicate and intricate rose and scroll engraving. A rounded pistol grip and slender forearm position the shooter’s hands for better control, a livelier feel, quicker pointing and target acquisition. An Old English recoil pad, matte ventilated top rib, side vents and top lever with gold Weatherby flying “W” round out this distinctive shotgun. For complete specifications, see page 43.

ATHENA® GRADE III CLASSIC FIELD

From the moment you put this shotgun to your shoulder, you’ll recognize and feel a difference as form and function come together in a truly distinctive way. The Athena Grade III features an oil-finished Claro walnut stock (“AA” grade fancy) with intricate checkering, a rounded pistol grip and slender forearm. Gives new meaning to “between-the-hands” balance. Silver/gray nitride sideplates feature rose and scroll engraving with gold inlaid pheasant and quail hunting scenes, while the smooth-opening top lever carries the famous Weatherby flying “W.” Also features heat dissipating top and side vents (no side vents on 28 gauge models) and Old English recoil pad. See page 43.

CUSTOM CANVAS CASE

MULTI-BARREL SETS

BEAUTIFUL CUSTOM-FITTED cases (far left) can be ordered separately for all Weatherby® shotguns. Cases protect shotguns with individual compartments for barrels, buttstocks, choke tubes and accessories. For more information on Weatherby custom cases, see page 24 or contact your Weatherby dealer.

THE WEATHERBY Custom Shop can build you a shotgun (left) with multi-barrel sets (in any combination of 20 gauge, 28 gauge, and .410) which allow you to quickly change barrel gauges and lengths. As an option, multi-barrel sets can be ordered with a beautiful custom-fitted Weatherby shotgun case for the ultimate in convenience and protection.

*Price may vary by model and dealer.

“As a guide, I see a lot of different shotguns come through the ranch. The Weatherby Over/Under is one of the best I’ve seen.”

WAYNE YAMASHITA – GUIDE, HIGHLAND HILLS RANCH {OREGON}

ORION®

ALL ORION® GRADE III Over/Under shotguns carry the added beauty of an intricately-engraved receiver with waterfowl/upland scene in 24K gold plate overlay. Another example of Weatherby's unmatched commitment to form, function and value.

ORION® GRADE III CLASSIC FIELD

A stunning combination of aesthetic beauty and field-proven design. The hand-selected “A” grade fancy Claro walnut stock with fineline checkering sports a rich oil finish that complements the silver/gray nitride receiver. Intricate engraving and gold plate waterfowl/upland overlay add a near custom touch. The rounded pistol grip and slender forearm afford “between-the-hands” balance for fast shouldering and pointing. Heat dissipating top vent rib and an Old English recoil pad. For complete specifications, see page 43.

ORION® GRADE II CLASSIC FIELD

The Orion Grade II shines in every way possible. We start with a rounded pistol grip. Claro walnut fancy grade stock with high lustre finish and Old English recoil pad. You get exceptional balance, a lively feel and fast target acquisition. Receivers carry a distinctive silver/gray nitride finish with engraved waterfowl/upland game scene. The blued barrels are finished with a brilliant front bead sight and matte ventilated top rib to dissipate heat when the action starts. See page 43 for complete specifications.

ORION® UPLAND

Our entry level Over/Under is far from ordinary. The high lustre Claro walnut stock (standard grade fancy) features a rounded pistol grip and slender forearm design for exceptional balance, feel and swing-through. The blued receiver and barrels are meticulously fit to the stock, while the triggerguard features the famous Weatherby flying “W” in gold. Adding to the performance of this value-packed shotgun are a brilliant front bead and matte ventilated top rib. See page 43.

ORION® SUPER SPORTING CLAYS

The SSC features a satin, oil-finished, standard grade stock with a target-style pistol grip and a Schnaubel forearm. A longer buttstock allows the stock to be cut to fit your exact length of pull requirements. The shallow receiver helps align hands for improved balance and pointability, aided by a 12mm competition grooved rib with mid-bead and side vents. The sliding top safety also includes an integrated barrel selector switch. Ported barrels reduce muzzle jump. See page 43 for specifications.

SSC TRIGGER is fully adjustable for length of pull to accommodate different finger lengths.

SSC STOCK is cast off from top to bottom of the butt (3 mm to 6 mm) to provide a better fit against the shoulder and improved balance and feel. A Pachmayr® Decelerator® sporting clays recoil pad reduces recoil, as well as drag during mounting.

*Price may vary by model and dealer.

“There was plenty of snow and cold on my trip to Alberta. I’m here to say your Performance Wool really did the job. It was money well spent!”

WYNDELL WROTEN {LOUISIANA}

WEATHERBY® PERFORMANCE WOOL

takes all the inherent benefits of wool and makes it even better. Our hydrophobic synthetic micro-weave lining (itchproof mini-fleece) moves moisture away from your skin into the wool layer for faster evaporation and drying. Should you get soaked in subzero weather, this lining will help get the water away from your skin, maintaining a higher degree of warmth and insulation. In the toughest conditions, Weatherby Performance Wool will be your best friend. (Comfort zones will vary with activity level and layering combinations.) Weatherby Performance Wool is available in 28 oz. Heavyweight High Desert Brown and 14 oz. Early Season Midweight High Desert Brown. Choose the option that best fits your needs and hunting patterns.

HITCHES INCLUDED

30° ← COMFORT ZONE → 70° 14 OZ. MIDWEIGHT CARGO PANTS (WITH HITCHES) – Double layer knees and seat incorporated in a flexible, comfortable jean cut • Micro-weave lining stops wind dead, and offers maximum breathability • Articulated knee and generous crotch gusset for maximum range of movement • Full size cargo pockets with directional pleats eliminate hang-ups in the brush • 2" belt loops, ankle adjustments, jean pockets, and #5 YKK® fly zipper are standard • Hitches feature adjustable pack style webbing and elastic to deliver a custom fit

30° ← COMFORT ZONE → 70° 14 OZ. MIDWEIGHT DOUBLE YOKE SHIRT – Generous cut for maximum movement, but light enough to use by itself or for layering. Micro-weave lining stops wind dead, while offering maximum breathability when on the move • Double layer, quilted elbow and forearms • Double front and back yokes for extra rain and snow protection

0° ← COMFORT ZONE → 40°

28 OZ. HEAVYWEIGHT WOOL GLOVES – Breathable waterproof laminate • Inside lining is tricot fleece with Thinsulate™ for extra cold-fighting performance

0° ← COMFORT ZONE → 40°

28 OZ. HEAVYWEIGHT BIBS – Double seat and knees for extra durability • Crotch gusset, articulated knees and relaxed fit for comfort and flexibility when climbing through fallen timber • Two slash front pockets, two rear covered pockets and a cargo chest pocket • 34" inseam and lower leg zipper • Adjustable elastic suspenders with quick release buckles

0° ← COMFORT ZONE → 40°

28 OZ. HEAVYWEIGHT WOOL CHAPS – One size fits all • 15" leg zipper with snap closure at ankle • 2" wide web belt with adjustable straps • Intended for added warmth, not for dense brush or barb wire

PERFORMANCE WOOL

FUNCTIONAL DESIGN EXTRAS. The Heavyweight Classic Cruiser Jacket features a large back pocket with button and flap closure. Provides convenient access to extra gloves, hats, maps and small take-alongs.

MACHINE WASHABLE, WEATHERBY® PERFORMANCE WOOL is engineered for durability. Blending synthetic fibers not only reduces shrinkage but adds strength to the woolen fabric. Easy cleaning and care, wash gentle cycle and line dry.

HIGH QUALITY YKK® zippers ensure extra long life and durability. Main zipper is massive #8 for convenience and quick pulls. #5 zippers are used on pockets for easy access in the field.

ARTICULATED, SCULPTED ELBOWS AND KNEES provide extra comfort and ease of movement. We've designed and sewn-in additional panels so your sleeves won't ride up or bind when you bend your arms to shoulder your rifle or shotgun. Articulated knees make it easy to crouch, crawl or step over fallen timber.

HYDROPHOBIC ITCHPROOF, MINI-FLEECE LINING moves moisture away from body and into the wool fabric. Promotes faster evaporation of moisture for better warmth and comfort in cold.

UNLIKE IMPRINTED patterns that sit on top of fabric, Weatherby's camouflage pattern is deep woven into the material with UV neutral pigments. Reduces fading.

WEATHERBY 28 OZ. HEAVYWEIGHT HIGH DESERT BROWN – The perfect choice for true cold weather conditions, rated for temperatures from 0 to 40 degrees F. The complex variation of the natural color tones, combined with the darker contrasting color creates the ability to vanish into the background of any terrain. This pattern is best used when your background is visually noisy and ample cover provides shadowing and shading.

0° ← COMFORT ZONE → 40°

WEATHERBY 14 OZ. MIDWEIGHT HIGH DESERT BROWN – The same quality and benefits of our 28 oz. Heavyweight High Desert Brown. Machine washable and line dry. Midweight High Desert Brown is ideally suited for temperature ranges from 30 to 70 degrees F.

30° ← COMFORT ZONE → 70°

0° ← COMFORT ZONE → 40° 28 OZ. HEAVYWEIGHT CLASSIC CRUISER JACKET (right) – Double front and back yoke protects against cold, bad weather • Two covered upper pockets to store small items • Proven vintage lower pocket design incorporates handwarmer pockets as closure system for lower cargo pockets. Provides more pocket space • Button and flap closure on large back pocket to store extra gloves, hat, maps • Main button closure is deep set for maximum protection, white buttons can be field serviced • Double elbows provide extra protection

0° ← COMFORT ZONE → 40° 28 OZ. HEAVYWEIGHT PARKA (left) – Fully lined with moisture moving, itchproof mini-fleece • Cut long in the body for extra protection • Three-piece, fully adjustable hood provides ample adjustment for peripheral vision, bill length and face closure • Upper handwarmer pockets keep hands and arms up and close to mid-chest for extra warmth • Generous cargo pockets are big, deep and offer plenty of cargo space • Articulated and double wool layer elbows for maximum arm movement and durability • Adjustable wrist closure features buttons for silent movement – field serviceable in the bush

0° ← COMFORT ZONE → 40° 28 OZ. HEAVYWEIGHT CARGO PANTS (WITH HITCHES) (right) – Double layer knees and seat incorporated in a flexible, comfortable jean cut. These pants are made for crawling, climbing and comfort • Fully lined with moisture moving, itchproof mini-fleece • Articulated knee and generous crotch gusset for maximum range of movement for climbing hills and scratching through fallen timber • Full size cargo pockets with directional pleats eliminate hang-ups from branches and brush • 2" inside belt loops, ankle adjustments, jean pockets, and #5 YKK fly zipper are standard • Hitches (included) feature adjustable pack style webbing and elastic to deliver a custom fit

0° ← COMFORT ZONE → 40° 28 OZ. HEAVYWEIGHT CLASSIC CRUISER VEST (left) – Perfect as a stand alone or layering vest • Button-down front, ample arm room for maximum freedom of movement • Handwarmer pockets behind generous cargo pockets

0° ← COMFORT ZONE → 40° 28 OZ. HEAVYWEIGHT OUTFITTER HAT (right) – Fully adjustable external "belt" • Pull down ear flaps lined with mini-fleece

HITCHES INCLUDED

LEATHER SLING — Leather-lined with brushed suede. Embossed logo. Adjustable. | \$64*

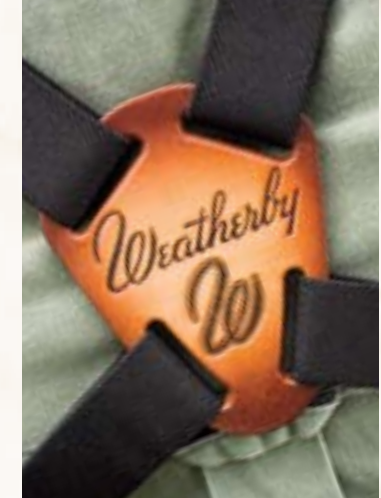

WEATHERBY® CARTRIDGE CARRIER — Fits over buttstock. Velcro® closure. Adjustable. | \$20*

LIGHTWEIGHT MOUNTAIN SLING — 1 1/4" black nylon web with non-slip lining. Adjustable. | \$25*

SPECIALLY-DESIGNED LIGHTWEIGHT Vanguard® mounts by Talley (above) featuring a unique one-piece design of 7000 Series billet alloy, are available for Weatherby Vanguard rifles.

WEATHERBY® ACCUBRAKE™

All Weatherby Mark V® and Vanguard® rifles are available with our special Accubrake option (standard on .30-378, .338-378, .378, .416 and .460 models). By adding an Accubrake, you can significantly reduce felt recoil up to 53 percent...nearly 10 percent more effective than competitive options (see chart at right).

Accubrakes are available for four different barrel diameters, with checkered thread protector, for a near perfect brake-to-barrel contour match. Because the crown is located at the end of the barrel (not the brake), the lands are protected, with no adverse effect on accuracy. Bullets exit the barrel without contact with brake, preserving accuracy while reducing recoil and muzzle jump.

Features heavy 18 oz. canvas with 40 oz. soft batting and flannel liner. Brass zippers, leather tips and slings and embroidered Weatherby® logo. Choose from three styles.

TAKE-DOWN SHOTGUN CASE — Fits up to 32" barrels.

SCOPED RIFLE CASE WITH ACCESSORY POCKET — Ample room for scoped rifles up to 48" long (including Accubrake™).

SHOTGUN CASE WITH ACCESSORY POCKET — Will hold Over/Under or repeating shotguns up to 50" in length.

TAKE-DOWN SHOTGUN CASE | \$106*

SCOPED RIFLE CASE | \$99*

SHOTGUN CASE WITH POCKET | \$91*

SACK-UP | \$11*

WEATHERBY SACK UPS™

Protect your investment. Silicone-treated cotton blend provides the maximum in rust protection. Ribbed fabric wicks moisture away from your firearm and allows gun to breathe. Provides extra protection from marring and scratches during transport or storage.

WEATHERBY MOUNTING SYSTEMS

Custom gunmakers have long sought the quality and durability of Talley mounts. Available for magnum or standard calibers (please specify when ordering), the Talley system features CNC-machined rings and bases of 2024-T4 aircraft-quality aluminum or cold-rolled carbon steel. Precision tolerances ensure a perfect fit where the ring and base contact. The double recoil shoulder base is rock solid and will withstand the repeated pounding of our largest magnum cartridges. All screws are heat-treated to prevent breakage.

For ease of use, the unique system is available in fixed or quick-detach (QD) models with a lever-lock or screw-lock release. With the QD system, a pre-sighted backup scope and ring system can be quickly installed in the event of a scope failure. Available in matte blue or high gloss in low, medium or high, 1" or 30mm. All rings and bases have been carefully finished to complement the finish of all Weatherby rifles.

OUR TALLEY-DESIGNED, Picatinny-style mounting system (right) gives you the ease and convenience of easy on, easy off mounting. The unique base and ring system lets you slide the scope forward or backward to allow for optimal eye relief.

FOUR POINT ADJUSTER—Weatherby's Bino-System features a four-point adjuster system (above) to provide a custom fit for your body size and shape. Leather patch is embossed with Weatherby logo.

NEW! WEATHERBY® BINO SYSTEM

Our new Bino-System uses your shoulders to support the weight of your binoculars, reducing neck fatigue over a long day in the field. Elastic straps allow binoculars to slide up and flex out when in use. Keeps binoculars secure and eliminates bouncing around when walking or on horseback. A quick release hook allows for fast, easy removal of optics. Fits all sizes and is fully adjustable. | \$24*

*Price may vary by model and dealer.

HARD-SIDE LUGGAGE CASES—Fitted cases hold your shotgun (take-down) or rifle and all accessories. Interior features felt-lined, foam padding with blocks and tie-downs for extra protection during transport. Extra compartments for scope, bolt, wrenches, choke tubes and accessories. 1000 Denier DuPont® Cordura® exterior with simulated leather ends, combination locking latches and circular belts. Inside features Weatherby logo embossed on simulated leather patch. Take-down shotgun case accommodates all Weatherby O/U and side-by-side shotguns to 28". | \$179* Rifle case fits all Weatherby Mark V and Vanguard rifles. | \$249*

NEW! MAGNUM ALUMINUM GUN CASES — Produced by Kalispel Case Line, these aluminum gun cases offer the ultimate in heavy-duty protection for your rifle(s) or shotgun. Each case is constructed of .080 natural finish aluminum. Extra strong latches, locks and handles provide for years of dependable use, while high-density foam padded interiors keep firearms from shifting inside. Available to fit single or double rifles with scopes and takedown shotguns. Single Rifle: 52" x 10" x 4 1/2" | \$340* Double Rifle: 52" x 14" x 4 1/2" | \$365* Take-down Shotgun: 38" x 12" x 4 1/2" | \$340*

Weatherby supports or is a member of organizations dedicated to the conservation and management of our wildlife and habitat resources, including Ducks Unlimited, Foundation for North American Wild Sheep, Mule Deer Foundation, National Rifle Association, National Shooting Sports Foundation, National Wild Turkey Federation, Quail Unlimited, Rocky Mountain Elk Foundation, Safari Club International and Wildlife Forever. Weatherby proudly sponsors the Resistol Relief Fund of the Professional Bull Riders, Inc. and the National High School Rodeo Association.

FOUNDATION INTERNATIONAL
HUNTING PRESERVATION & WILDLIFE CONSERVATION

Formerly known as the Roy E. Weatherby Foundation. The mission of the non-profit, tax-exempt Foundation is to educate the non-hunting public on the beneficial role of ethical sport hunting and its contributions to wildlife conservation. Active in its mission, the Foundation currently leads a national initiative to foster the development of educational outdoor expositions, and annually sponsors the prestigious Weatherby Hunting and Conservation Award. Write P.O. Box 1027, Turlock, CA 95381-1027. (209) 634-4400; fax (209) 634-5454; www.weatherby-foundation.org.

WEATHERBY COLLECTORS ASSOCIATION

The Association was formed with the purpose of "creating an association where many Weatherby® admirers could pool their knowledge and experience for the benefit of all..." Members receive a periodic newsletter with buy-sell-swap opportunities and bid opportunities on limited-edition, commemorative firearms. For information, write P.O. Box 478, Pacific, MO 63069; (636) 271-3336; E-mail: wcsecretary@aol.com.

THE HISTORY OF YOUR FIREARM

Learn the history and lineage of your Weatherby firearm, researched and authenticated through our company records. Each certificate is personally signed by Roy E. Weatherby, Jr. and Dean Rumbaugh, Company Historian. \$50 per serial number, (\$75 for Custom Rifles, \$100 for Special Edition or Commemorative rifles). For information, write Company Historian, 3100 El Camino Real, Atascadero, CA 93422 or visit www.weatherby.com.

AUTHORIZED SERVICE CENTERS

Weatherby Authorized Service Centers have been carefully screened and selected for their ability to perform the highest quality of service to exacting standards. Service work includes both metal and wood work and all internal components. For the center nearest you call us at 1-800-334-4423 or (805) 466-1767, or by FAX at (805) 466-2527. By mail, 3100 El Camino Real, Atascadero, CA 93422 or visit www.weatherby.com.
